

San Diego County Fire Chiefs' Association

April 5, 2007

Mike Ott, Executive Director
Local Agency Formation Commission
1600 Pacific Highway Room 452
San Diego, CA 92101

RECEIVED
APR - 6 2007
SAN DIEGO LAFCO

Dear Mr. Ott:

On March 29, 2007, the Joint Boards of Directors representing the San Diego County Fire Chiefs' and the Fire Districts' Associations hosted a special meeting for member agencies. The specific purpose of the meeting was to present recommendations from the Boards of Directors Task Group related to the LAFCO and County fire agency reorganization reports.

Chiefs Ott and Jobs presented an overview of what the Task Group, LAFCO and the County (DPLU) had been discussing and developing related to the reorganization reports. Chief Pavone presented an outline of governance issues related to fire service reorganization. Chief Ghio presented a "cross walk" comparison of the Status Quo, SSP, and County service options.

The "cross walk" provided the following statistics regarding each situation meeting minimum staffing/service requirements. This information led to a motion to support the SSP/LAFCO Micro Report.

	<u>Status Quo</u>	<u>SSP</u>	<u>County Proposal</u>
Exceeds Requirements:	6	7	6
Meets Requirements:	21	40	25
Does Not Meet Requirements:	22	0	15

The floor was opened to discussion which led to a motion by Chief Jarman and a second, to split a motion into two parts as listed below:

Motion: To Support the Micro Study/Report developed by LAFCO.

The motion passed with 19 supporting votes, 6 opposing, and 5 abstaining.

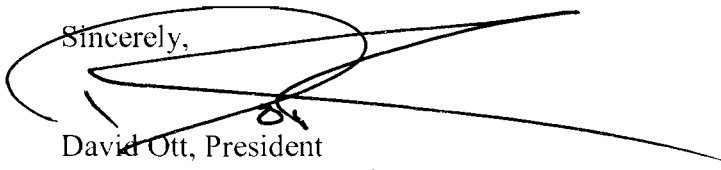

Another motion was presented and seconded as listed below:

Motion: To recommend the formation of an Independent Regional Fire Protection Governance Model.

The motion passed with 15 supporting votes, 5 opposing, and 6 abstaining.

Both associations are pleased with the positive relationship between LAFCO and the Fire Service as we look to the future.

Sincerely,

David Ott, President
San Diego County Fire Chiefs Association

Sincerely,

Darrell Jobes, President
San Diego County Fire Districts Association

SAN DIEGO LAFCO

March 29, 2007

APR - 2 2007

RECEIVED

Michael Ott, Executive Director
San Diego Local Agency Formation Commission
1600 Pacific Highway, Room 452
San Diego, CA 92101

Dear Mr. Ott:

The following is the CAL FIRE (CDF) response to the San Diego Local Agency Formation Commission Micro Report on the Reorganization of Fire Protection and Emergency Medical Services in Unincorporated San Diego County published January 31, 2007.

Under normal circumstances CDF, as a State agency, would be nothing more than an interested observer in the organization or proposed reorganization of local government fire protection services. In this instance, however, CDF is more than just an observer of a local process. CDF currently provides contractual fire protection services to six of the agencies identified as Phase I agencies and is in the process of contracting with a seventh. These contract agencies employ a significant majority of all current paid personnel within the proposed Phase I reorganization. Cancellation of these contracts would create a significant impact to CDF and its personnel. In addition, the Micro Report extensively uses CDF for cost comparison to a reorganized and locally staffed fire agency. While the ultimate decision whether to contract for service with CDF would be made by the governing body of a reorganized agency, reports such as the Micro Report would provide a basis for such decisions. If comparisons contained within the report are not based upon the same premise then erroneous conclusions may be drawn from such comparisons. For these reasons, CDF is compelled to respond to several assertions made in the Micro Report. Our response encompasses four areas:

1. Comparison of costs for safety personnel (Captain and below) in models 5, 6, and 7
2. Dispatching services comparisons and assertions
3. Conceptual Phase I Organizational Chart and assertions regarding support staff and overhead costs (Exhibits One and Three)
4. Combined Paid/Volunteer (Reserve) Staffing

Safety Personnel Costs for Models 5, 6, and 7

The Micro Report's Exhibits 2a, 2b, and 2c provide an exhaustive list of the number, type, and cost of safety personnel (Captain and below) needed to staff the different models. CDF provided salary and benefit figures to be used to calculate projected costs for CDF to staff these models.

The figures provided by CDF were all top step and maximum benefit. We provided maximum cost figures so that "real world" estimates of ultimate cost could be generated. In comparison, the local agency estimates were compiled by using median salary figures from CALPACS. The benefit rates seem unusually low in comparison to actual benefit rates paid by San Diego County Fire Agencies. I have attached a 2006 salary survey using 15 San Diego County fire agencies with three or more paid stations.

Using the average of these salaries and adding a conservative 50% benefit rate, the cost to staff Model 5 locally would be \$3.63 million more than the Micro Report estimate. Model 6 and Model 7 would similarly cost out at \$3.99 million and \$4.97 million more respectively for a locally staffed agency.

We believe that using these "real world" estimates provides a more accurate analysis of potential costs for each model and paints a truer picture of comparison of cost for a locally staffed agency versus a CDF staffed agency. Our experience with contractual service costs has been similar to these estimates throughout most of California. There are very few areas of the state where labor costs are less expensive through a locally operated agency. Our Schedule A contracts are always quoted and written on a highest possible cost basis. This is done so that there are no surprises with the real cost of service. The fact is that similar contracts for service with CDF would typically generate actual costs each year that are at least 10-15% less than the top step, maximum benefit costs used in the Micro Report.

Dispatching Services

The Micro Report correctly point outs that dispatching services are an essential supporting component of fire protection and Emergency Medical Services systems. The Report states that CDF does not provide Emergency Medical Dispatch and that there may be additional costs incurred to provide such service.

CDF has not provided EMD simply because no contracting agency has requested it and the State has not determined it to be necessary for its operation. Since the time that the Micro Report was written, CDF has been asked to provide EMD by one or more of its contracting agencies. We are now researching the upgrading our service to EMD level. For the purposes of comparison, the cost for CDF to provide dispatch services, including EMD, is contained in the attached Conceptual Model 5a-CDF Overhead and Operations Budget.

We might note that CDF dispatch centers operate as the command and control focal point for CDF operations. CDF employs Fire Captains 24 hours a day, 7 days a week that are assigned to the Command Center. These Captains provide a level of field experience in firefighting, emergency response and EMS that non-safety dispatchers cannot provide. CDF San Diego's Command Center is also a joint facility with the Cleveland National Forest. The coordination advantages of this joint operation come into play every day and especially during rapidly evolving emergencies.

Conceptual Phase One Organizational Chart and Overhead Costs

Micro Report Exhibits One and Three provide for a conceptual stand-alone fire agency and an overhead budget to support such an agency. The financial analysis for comparing a locally staffed agency to a CDF contract agency apportions the same overhead costs to both conceptual organizations.

We have provided a conceptual Overhead/Support Personnel Budget and a conceptual Overhead Operations and Capital Budget that show anticipated CDF costs of operation. We have also provided a conceptual organizational chart for a CDF organization. It highlights one of the advantages to a cooperative fire protection contract with CDF. Locally funded personnel are blended with state funded personnel resulting in additional personnel assets being utilized while reducing the overall cost to the local agency. Note that many of the functions are staffed above the levels in Exhibit Three. This is especially true in the operations section. The CDF model includes 4 field divisions and 10 battalions with on duty chief officer strength at 11-13 per day versus the locally staffed on duty strength of 7.

Combined Paid/Volunteer/Reserve Staffing

The Micro Report envisions some staffing models that provide only one paid firefighter on duty at certain stations. CDF will not enter into any new contract that provides less than two paid personnel on duty at all times. We have provided such service in the past but have determined it to be substantially less than desirable due to safety concerns and the ethical and moral dilemmas it places upon the single firefighter in certain situations.

Therefore CDF would not be able to contract with an agency seeking such a staffing level nor would we recommend that any agency actually design and operate such a system. We do however operate combined paid-volunteer/reserve staffing systems with some of our contracting agencies and view this type of staffing as quite appropriate for the type of agency envisioned in the Micro Report.

Thank you for the opportunity to review and comment on your Micro Report. Improving the fire protection system in San Diego County is a daunting task. CDF remains available and willing to assist San Diego County in its endeavor to improve fire and emergency medical services where appropriate.

Sincerely,

Kevin P. Eggleston
Acting Unit Chief
CAL FIRE San Diego Unit

Attachments (4)

***Conceptual Model 5a-CDF
Overhead Operations and Capital Budget***

<u>Category</u>	<u>Projected Expenditure</u>
Directors Fees	25,278
Salaries and Benefits - Overhead/Support Personnel	5,757,472
Volunteer/Reserves	250,000
Dispatch Fees *	35,000
Materials and Supplies	924,000
Rents/Leases **	
Facilities	420,000
Insurance ***	1,200,000
Capital Expense - Equipment	1,500,000
Capital Expense - Facilities	<u>2,700,000</u>
 TOTAL	 12,811,750

NOTE: This budget was derived using the Micro Report Exhibit 1 and inserting the conceptual budget amounts appropriate to a CDF managed agency for the Salaries and Benefits, Dispatch Fees and Rents/Leases line items

- * The dispatch fees line item only contains the operational costs of EMD. All personnel costs are accounted for in the Salaries and Benefits line item
- ** No rents or leases would be anticipated since headquarters/administrative facilities already exist
- *** If workers compensation insurance is included in this line item then it would be reduced accordingly since workers compensation is included in the Salaries and Benefits line item

April 4, 2007

As a member of the Task Force on Fire Protection and Emergency Medical Services sitting on the Task Force for CALFIRE Firefighters, Local 2881, I received a copy of the January 31, 2007 report and have several comments from CDF Firefighters point of view. As CDF Firefighters represents significant majority of the paid personnel within the Phase I, we feel the need to provide the input to the draft report. CALFIRE and CDF Firefighters together partner throughout California to provide fire protection in 146 cooperative agreements in 35 of the state's 58 counties, 25 cities, 31 fire districts and 34 other special districts. Cooperative Fire Protection and Regional response are what the public expects and we are here to provide and we have several new agreements currently working their way through the system throughout California.

In both the Macro and Micro report mention is made of a large increase in our pay and benefits due to a 5 year MOU. This is true, that this old MOU did increase costs but only after years of below average salary increases of other firefighters across the state. CDF Firefighters still work a longer work week and are paid less than their counter parts in other similar sized departments in the state and the nation. In San Diego County the existing Schedule A contracts had over five years to budget and plan for the increase which all of them did. By taking advantage of no increases in the first two years and smart planning the various boards were able to properly plan and budget for their departments. The fact is the current MOU we are under right now (2 years, 2006-2008) has no salary increase for permanent firefighter classes. If one were to look at our salaries in the long term vs. other departments and count in that we generally work a longer shift for less, CALFIRE is a reasonable and costs effective fire protection force. The various cities, fire boards, water districts and other boards would not continue if we were not providing the service that they requested in a cost effective method. Whether it is EMD, or Haz-Mat team, ladder truck, or paramedics on every engine, the governing body sits down with CALFIRE management and asks for the costs of the service requested and then if the board likes what it hears, then they decide to move forward. It is like ordering a new car, pick and choose what you are willing to pay for and then sign the contract. The control of the department remains local.

The report also looked over several other large departments in California and we agree with the departments that were looked at however we feel there is some additional information that should be discussed. Both Orange County and San Bernardino County departments were long time CDF contracts for fire Protection County wide. Orange County switched due to pure politics at the Sacramento level in the 1980 outside of CALFIRE and local Board of Supervisors. Had then elected officials not wanted to make the change, it is very possible that Orange County would still be a CALFIRE contract. In San Bernardino County, it was a local Board of Supervisors decision to consolidate after many years of several separate CSA's and smaller departments. After working on at agreement with the state and other departments that wanted to stay CALFIRE, the switch was made in the 1990's. What allowed these two counties to have the ability to have a County Fire Department was that CALFIRE was there for many years when income was not, providing basic services to the citizens' of the counties. This did not happen in San Diego County due to previous actions in the 1970 and 1980's San Diego County ended up with the many different departments that we are trying to bring back together today. The other department mention that I feel should be really discussed more is the Riverside County Fire Department which in turns contracts with CALFIRE. There too this contract goes back many years with CALFIRE and the county providing fire protection services together. The costs for the Riverside contract with the area and services provided are a good deal for those citizens' and something that should not be glossed over quickly in the micro report. CALFIRE and Riverside County have almost 100 stations, staffed with a combination of both paid and volunteers, paramedics, Haz-Mat teams, Heavy Rescues, Truck companies, water tenders, county wildland engines and their own fire academy at Clark Training Center. Riverside County has a strong volunteer base and supports them countywide. The volunteers are part of the department and the communities they serve and that is something that will need to happen here in San Diego. No one department can do this without the time and effort of the volunteers in the rural areas and whatever the final design ends up, they need to be a large part of it. Through the cooperative nature of the agreements, cities and county and special districts all share the resources and have a unified command and control system in place for any emergency that may take place. A lot of the drive for the task force has been driven by the fires of 2003, but the fire service in San Diego needs to be prepared for any and all emergencies, not just the wildland fires that we have every year. We need a unified approach to emergencies services, one that work with the UDC and County and state OES for that unknown emergency down the road besides the large wildland fire. Using CALFIRE contracts to start working together is what allowed Riverside to develop there department over the years to where they are today.

Third, the Micro report offers some cost for starting a county wide or regional fire district as one option to be considered. LAFCO staff had a huge task trying to compare salaries and costs so that we were all looking at an apple vs. apple bottom line. But CDF Firefighters has to disagree with the final numbers as shown in the report. LAFCO does

CDF FIREFIGHTERS

1731 J STREET, SUITE 100 • SACRAMENTO CA, 95814

(916) 609-8700 • FAX (916) 609-8711

mention several times throughout the report that CALFIRE will add on an “admin fee” of 9.92%. The fee does cover some costs in Sacramento but also provides for the local Unit Chief who acts as the district/department Fire Chief and also use of the CALFIRE services that are already in place and paid for by the state. These do not show when comparing side by side costs and somehow credit for these services should be mention as it will change the bottom line. Just a few items are the ECC Chief and the fire captains in the Emergency Command Center, the use of the CALFIRE CAD (Northrup Grumman Altaris dispatch computer) and the radio and 911 systems, the Fire Prevention Officers, the staffed auto shop and a existing staffed Fire Department HQ’s with finance and personnel policies already in place and working. Representing a large number of the paid staff in Phase I, I doubt very much is any of our current personnel would take a pay cut and lose of benefits to switch over to a newly formed department. In fact in Tulare County (one of the very few that decided to cancel a CALFIRE Contract over the aforementioned MOU) have not yet started service (July 1, 2007) but are already having to go back to the Board of Supervisors requesting additional funding and the initial attempt to hire local firefighters has not meet quota. Over the years CALFIRE has saved many departments money because they do not have to go out and build their own HQ, auto shop, 911 dispatch offices and then hire the staff for all these positions. What the state provides is the basic level and then combined with some additional funding from the local lever. a much higher level of service is provided to the citizens` we are here to serve.

In closing, CDF Firefighters has been here providing emergency services to San Diego County for many years. We have responded when there was a county contract, when there was not a contract, with and without volunteers’ and we are going to be here regardless of the outcome of the LAFCO report and future actions by the Board of Supervisors. We live in the communities that we serve, we consider this home and like much of the discussions at the LAFCO meetings over the last two months we want what is best for everyone, across the board. And we feel that the a continuation of the existing contracts with CALFIRE and the County of San Diego and providing additional contracts as funding becomes available would be in the best interest for the county. As the county, especially the rural areas start to grow, they type of service and contracts CALFIRE can provide are cost effective and combine the use of both paid and volunteer firefighters. It needs to be a partnership with CALFIRE, the County of San Diego and Fire Departments (both paid and volunteer) to work together for a unified fire protection county wide.

Thank you for the chance to provide input into the Micro Report, CDF Firefighters in San Diego County and at the state level are here to help and provide any assistance we can. If you have any additional questions, I can be contacted at

EMERGENCY MEDICAL CARE COMMITTEE COMMUNICATION TO LAFCO REGARDING MICRO-STUDY REPORT ON FIRE REORGANIZATION

The Emergency Medical Care Committee (EMCC), an Advisory Committee to the Health and Human Services Agency has taken a position of no support on one component of the Department of Planning and Land Use (DPLU) proposal on fire reorganization in San Diego County. The EMCC opposes the transfer of management of ambulance service areas to DPLU. EMCC requested that I forward their position to LAFCO.

In accordance with Board Policy A-76, I am forwarding this to you for appropriate action. Please note that that the comment period for LAFCO ends at 5:00 p.m. on April 6, 2007.

San Diego, CA 92101

Dear Ms. Shepard:

The Emergency Medical Care Committee (EMCC) met on Thursday, March 22, 2007 to discuss the LAFCO (Local Agency Formation Commission) Micro-Study Report on Fire Re-Organization in San Diego County. EMCC members reviewed the report in advance of the meeting and focused discussion on the proposal made by the Department of Planning and Land Use to transfer management for the Exclusive Operating Areas (EOA's) for Advanced Life Support (ALS) services and management and supervision of the ambulance providers/contractors to the Office of the Fire Warden. EMCC does not support the transfer of EMS management and supervision of Exclusive Operating Areas for ALS services and ambulance providers/contractors to the County Department of Planning and Land Use. Any such transfer would be a mistake.

The EMCC unanimously approved a Motion to submit comments to the Local Agency Formation Commission (LAFCO) during the open public comment period. We respectfully request that you forward our position on this plan to LAFCO.

Sincerely,

Chief Darrell Jobs, Chair
Emergency Medical Care Committee

Intermountain Supports the SSP as submitted in the Micro Report, however with the following caveats and comments.

Staffing Models. Support models 5a,6a and 7a Career-Volunteer Models, however it should be taken into account that some stations whose run volumes are at less than 3 runs per day should be considered as All volunteer stations with 4 on duty and at least the BLS level. This is due in part to the remoteness of the majority of these stations and the extended response times of additional resources. Using the career-volunteer model is the most fiscally prudent model so that the saved monies can be used to build infrastructure in areas that have a greater run volume and need. While the same options are available under the County Conceptual Plan it has all the appearance of the system that was put into place in the 1970's of which was ultimately deemed too expensive and then abandoned upon the county determining they were not required to provide fire protection. Without a county charter change mandating a county responsibility for such service, this plan and it's models are not acceptable. **Also, if this a Fire & EMS Delivery Service Issue and not a land use issue, as it is beginning to appear, the county conceptual plan need to be moved to the Office of Emergency Services so that Fire & EMS Delivery remain the focus and not driven solely by land use needs.**

Sustainable Revenue – as discussed at the SSP Development Meetings and later LAFCO meetings, securing long term sustainable and protected revenue is an absolute requirement prior to moving forward any further. One of the issues with the County Fire Enhancement Program as well as the County Conceptual Plan is that any funding coming through the County General Fund as well as funds controlled by the county do not appear to be long term sustainable funding, nor do they appear protected unless a Change to the County Charter is put into place, mandating a responsibility of the county to Provide Fire Services. Initially the Macro report was to be completed and no further progress made until Long Term sustainable funding was

Intermountain Volunteer Fire and Rescue Department

identified and secured. A compelling argument was made as to conduct the Micro Report so as to identify the amount needed. Now that this has been accomplished, we need to not take any more action until that funding has been indeed secured. To do so would be ill advised as by the time the funding is secured (possibly as long as 2 years) the system requirements and its costs will have changed and if the funding is not secured then we will have created a larger problem.

Also, while it has been determined that voter approved assessments would remain in the districts where they were approved, some consideration must be given to voter protests as to the widely varied assessments and the fact that many areas will be receiving protection at no costs. This is a very real potential that needs to be addressed as it will give voters and respective FPD a tendency to opt out for cause.

Also the lowest service model indicates an approximate \$22 million dollar shortfall, however, this is also using some monies that are not considered long term or sustainable. Additionally, the future of 8.5 million dollars is in question as it has been alluded that if the fire program does not remain with DPLU, those dollars will disappear, another indication that this may not be an actual Fire/EMS delivery system issue, but instead a land use issue being secreted and presented as a Fire/ EMS delivery system issue.

Governance structures –

The county as a successor agency is not desirable for the following reasons;

The county has no charter mandate to provide such services and without one in place, the county could determine to cease such services. Word of honor and a “handshake” agreement are neither sufficient nor acceptable.

The creation of an office of the Fire Warden within DPLU again makes this appear to be a Land Use issue over and above the safety of the public. Additionally, the creation of the Fire Warden who in all aspects would be the “Fire Chief” would be at the will of DPLU and not placed on a equitable level with either his neighboring peers and within the county Public Safety and Emergency Service program and to be quite honest appears to nothing more than a means to protect the already enacted retirement of certain individuals who would wish to fill this position effectively “Double Dipping” the program.

The use of a CSA is not desirable for the same reasons as above.

Intermountain Volunteer Fire and Rescue Department

Independent regional Fire Protection District –

This governance structure has a lot of merit as it is dedicated to the delivery and planned delivery of Fire/ Rescue and EMS Services. The the district would be elected though instead of at large for all eleven positions, since the region was projected to be broken into 5 divisions, each division could be allocated 2 seats with one at large position thereby creating a more equitable governing body and additionally helping maintain some local control in certain governance issues such as budget and planning.

The Fire Chief would be on a equitable plane with his peers and other public safety counterparts and would not be subject to pressure by the county or DPLu concerning Land Use and thereby keeping the Fire/EMS focus.

The use of CDF resources as a supplemental response to the Structural Fire suppression issue should be considered, however, the majority of these stations are “Wildland” Stations and even though they may backfill, it would be with Brush Engines and not Structural Engines. Additionally even though backfilled, they would be redirected to other state areas if deemed needed by Sacramento leaving the local areas no protection.

The only solution to this, using CDF resources, would be to engage in a Schedule “A” contract which would significantly increase costs in areas where there would be inadequate justification or return of that investment.

The value added of the volunteer agencies is understated as this is the current estimate. Volunteer Companies properly supported in equipment, training and with administrative assistance would increase their value added component significantly more than stated and should be further explored.

In addition a Volunteer/Reserve program that is properly implemented and maintained is a force multiplier during large scale incidents such as the cedar fire, able to be mobilized as paid employees during the scope of the emergency and returning to their reserve status upon being demobilized, much like the national guard and military reserve programs. These programs are highly proven and should be looked as a potential model for the reserve/volunteer program. It would also serve as a “feed ourselves” program by providing the paid component a ready manpower pool of suitable and already trained personnel, saving training and payroll dollars while training.

Intermountain Volunteer Fire and Rescue Department

In closing, it has been stated over and over again that funding is the key component to this program and indeed it is. Unless this has been secured, the furtherance of this reorganization has the very real danger of creating a very large, poorly funded organization that would meet the term dysfunctional as introduced by Supervisor Jacob upon her implementation of Proposition "C". Further based on much review and thought, the county fire enhancement program and associated Conceptual plan would also to be a repeat of history and similarly failed program as well as becoming an agency directed and driven by land use issues and not public safety.

As such Intermountain Fire supports the SSP option 5a, 6a & 7a with a Governance option of an Independent Regional Fire Protection District.

Sincerely

Attn Michael Ott

Recommendations for LAFCO action on Micro Report on Reorganization of Structural Fire Protection and Medical Services.

For a County Fire Department I recommend CSA 135

This recommendation is based on the following information:

I was the Chairperson for Boulevard Fire & Rescue Dept., Inc. (CSA 111) for the last 7 years. When the fire chiefs of greater San Diego County were creating these plans for 80% of the time I was the only totally volunteer department that attended almost every meeting. Every time I would state this plan or that plan will not work the gentlemen listed politely and when on with their business. *IF a CSA is created and the new Chief of that department is accustomed to working with Volunteers that may be a chance that the new County Department will work.*

Volunteers are special people. In most cases they willingly give of their time, they pay their own expenses, including gas expense to and from the station, and in many cases they even provide their own food. Many of them pay for their own training without assistance from and fire department. It takes a very special person to run a department like that. Mixing volunteers and CDF does not work well. CDF can change policy and there is nothing you can do about it once you have signed the contract. One of the statements they made when DPLU tried to

(619) 766-4144
39741 Old Hwy 80
Boulevard, CA 91905

contract with them to cover the smaller departments is “ they would try to take the existing volunteers on as paid fire fighters when ever possible.” The problem with that statement is the volunteers are not trained by CDF, thus they do not qualify and are tossed aside. Are these people just to be tossed aside after years of service for free.

The following are some things that can happen without the proper controls:

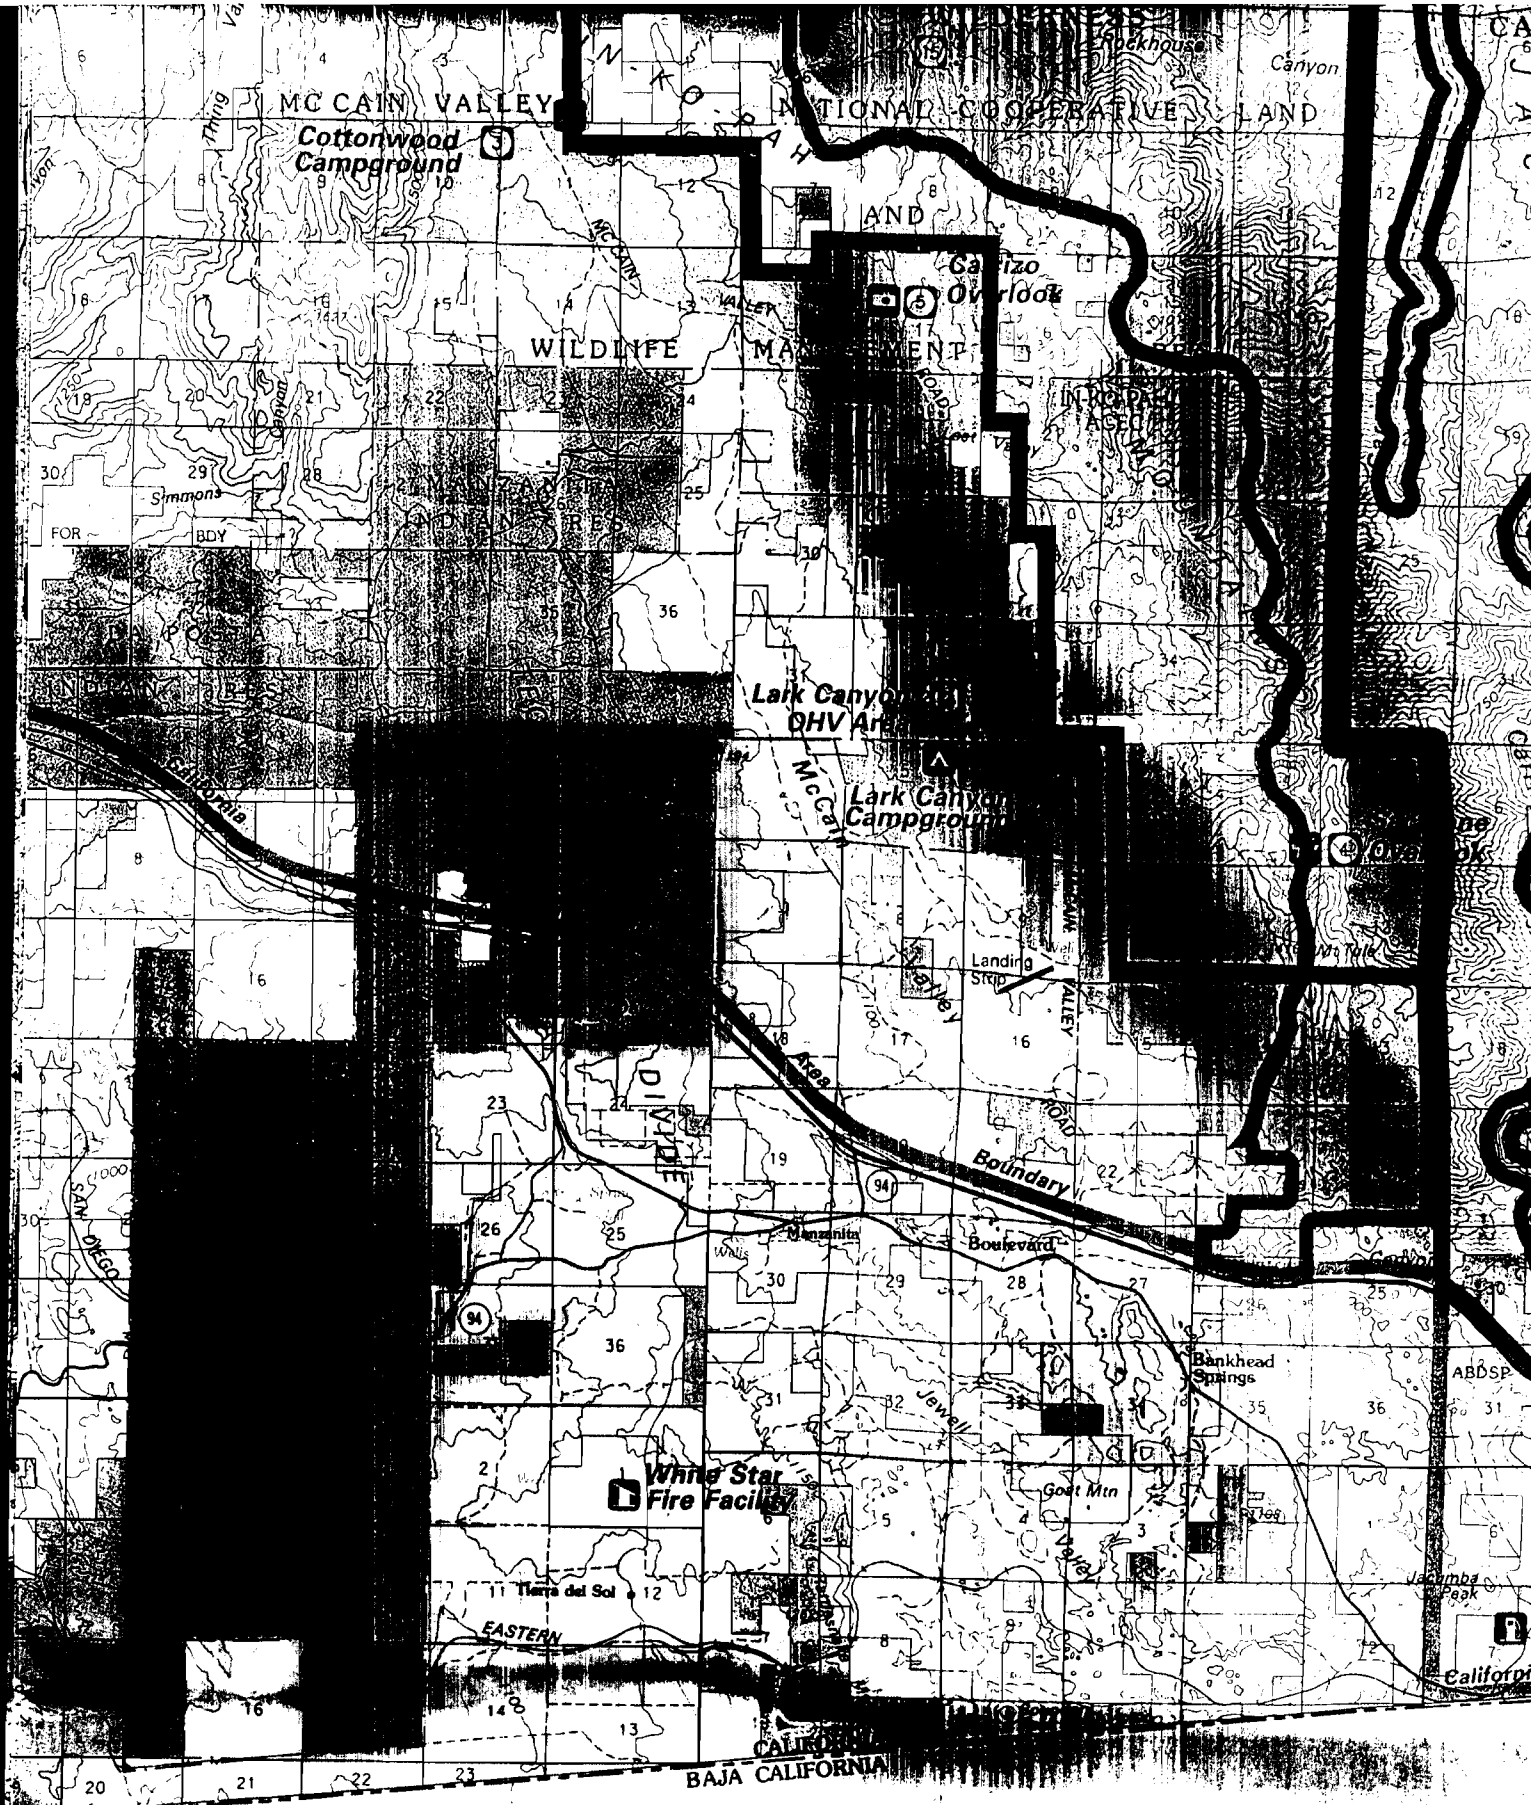

Please see attached map of Boulevard Fire & Rescue Dept. Inc. Responding area as shown in the original application to LAFCO in 1983 when you approved our department . Note both the pink and green areas were the total of Boulevard Fire responding area. Along the way Campo Reservation started a Fire Department in 1993 and in 2000 Campo Reservation became a paid fire department. In 2003 OES sent a letter, see attached copy, in which Campo Fire Dept., stated they did not object to the response area being changed . LAFCO was not fortified of the change for their approval. As shown on the Boulevard Fire Responding Area Map we lost over 1/3 of our area. If the County of San Diego can write a letter without your approval and take 1/3 of our response area, what do you think a County Fire Department with the same type of mind set will do? Isn't your evaluating these areas necessary?

Re: Ltr date September 12, 2002 – Response Area Changes

In response to the letter received from Ralph Goff, I have completed our investigation concerning the request to change response areas. The response areas requested run through the Reservation and are on Highway 94 and old Highway 80. Campo VFD has no problem with this change as well as CDF. I talked to CDF Dispatch and they would be able to make the changes. I see no problem with the requested changes. Therefore, these response area changes should take place.

The other change on Interstate 8 from La Posta Bridge to 1 mile west of Ribbonwood currently falls under Boulevard VFD response area. Putting Boulevard on the run card would keep them involved in any incidents that would occur. Therefore, this would be a mutual response to incidents off of Interstate 8. These changes would better serve the people and the Reservation.

If you have any questions, please contact me at (858) 565-3490.

Respectfully,

Herman Reddick, Fire Services Coordinator

**Reponses to the Reorganization of Structural Fire Protection
And Emergency Medical Services
In Unincorporated San Diego County**

The worth of volunteer firefighters in San Diego County.

A volunteer Firefighter like any Firefighter has to be trained, outfitted, and equipped with tools to do his job. It can take one to two years to train them to a level were the firefighter is a fully functional part of a crew when the departments pager goes off for a call.

A volunteer Department with a Structure Engine and Brush Truck is on different than a Full Time paid Department with a Structure Engine crossed staffed on a Brush Truck. The paid department station that is full time paid cost an average of (\$1,000,000) one million dollars for there employees each year. They operate either one unit or the other as the call requires. The crews consist of 9 members on an ABC shift schedule. During a County or State disaster Emergency the full time Firefighters man up one of their units and responses to the emergency. The department calls back off duty fire fighters at and overtime rate and mans up the unit left behind or a reserve unit.

In contrast the volunteer department consisting of 15 to 50 members who man and or responed to there station to crew up a unit when need. The cost is between \$20,000 and \$200,000 to compensate and keep there volunteers each year. During a County or State disaster Emergency the volunteers Firefighters crew one of there units and respond to the emergency. The other volunteers firefighters will go back to there homes and work, still standing their shifts as schedule, when the next alarm goes off in there district they will respond in the department other units.

What is the cost of the volunteers, well just like the full time firefighters the volunteer must maintain his training on a year in year out basis just as the full times paid fighter. So when a truck with volunteers responds to an emergency whether it's in the district, adjacent city or anywhere in the County or State the cost are the same. We need to quit looking at the cost per hour or person and look at the true response expectation of a truck with a trained crew. That puts the cost between \$300,000 and \$330,000 for truck that is a

RECEIVED

APR - 6 2007

SAN DIEGO LAFCO

available with a crew at each station. An example of this is during the Cedar and Paradise Fires the volunteer and CSA agencies sent 65 units. 65 units with crews at \$330,000 per unit have a value of \$21,450,000.

The County of San Diego must realize the true value of the volunteer firefighter services in the county no matter what option if any is us. LAFCO should put a requirement that a volunteer over-site agency and volunteer coordinator position be part of any plan. The County should budget a true dollar amount to these volunteer and CSA agencies.

The County should have to also explain in writing why the County Charter does not list Structural Fire Protection as missions and have a budget large enough to cover it true costs.

Mr. Michael D. Ott
Executive Director
San Diego LAFCO
1600 Pacific Highway, Room 452

RECEIVED

APR - 2 2007

SAN DIEGO LAFCO

Dear Mr. Ott:

The Borrego Springs Fire Protection District Board of Directors appreciates the extensive time and effort put forth by the many agencies and individuals, especially LAFCO staff, in preparation of the San Diego LAFCO Micro Report published on January 31, 2007. Including Attachment 1 entitled; Conceptual Reorganization of San Diego County Fire Services.

The Borrego Springs Fire Protection District Board has reviewed the Micro Report and participated in the presentation given by LAFCO staff. We want to emphasize that we support the long-term goal of enhancing fire protection and medical services in the unincorporated areas of San Diego County. However, while there are many methods in which increased levels of service can be achieved in areas of inadequate service, we believe a positive first step would be to limit the Phase I study and any resulting reorganization, to volunteer-manned stations in unincorporated areas of San Diego County.

This would be consistent with LAFCO staff statements that under-funded districts should be included in Phase I. As a result, we strongly recommend that the Borrego Springs Fire Protection District be removed from Phase I. The rationale for our conclusion is as follows:

Funding: The Borrego Springs Fire Protection District is not under-funded. To the contrary, In addition to property tax support, the community of Borrego Springs has financially supported the efforts of our Fire Department and Paramedic Programs.

Our District was formed in 1961 as a volunteer department with antiquated equipment. In 1965 Fire Chief Jack Hansen was hired as the only paid staff. During his 20 year tenure his tireless efforts along with community support took the department from volunteers to a fully paid staff with state-of-the-art equipment. This level of operation has continued with improvements in order to meet the requirements of County Emergency Services, and the community.

In 1996, the community of Borrego Springs voted in favor of a Benefit Fee to help support services. In 2000, the community again supported the need to increase the level of service from basic life support to advanced life support with generous donations from the Burnand Foundation and other members of the community which launched our Paramedic Program with 100% community donated funds. In 2004, faced with the sunset date of a benefit fee, the community voted in favor of a special tax with an 86% margin. This is a significantly positive vote, which has helped to provide the District the funds necessary to continue advanced life support services.

Community donated funds, especially from the Burnand Foundation made possible the purchase of an ambulance at a cost of \$115,000 and all the equipment necessary to add an ALS engine to our response vehicles. An additional \$140,000 to purchase another ambulance was received this

month. It is unlikely that this community support would continue should the District continue to be included in the Phase I reorganization contemplated in the Micro Report.

The Borrego Springs Fire Protection District believes that adequate long-term funding must be guaranteed for the proposed consolidation district to ensure that Borrego Springs is not used to supplement the financial inadequacies of the county's unincorporated volunteer stations.

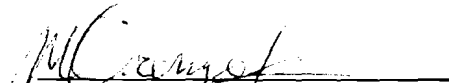

Service Levels: currently, the Borrego Springs Fire Protection District is providing a level of service to our community that exceeds the best model described in the Micro Report.

This District currently staffs four (4) fire personnel per day of which three (3) are trained paramedics. The daily paid staff is augmented by Reserve Volunteers, some of which are also trained paramedics. This level of staffing enables us to respond to the highest needs of our community. Last year, Borrego Springs responded to 506 emergency calls, 371 medical aids, one vegetation fire and two structure fires (all remaining responses were public service related).

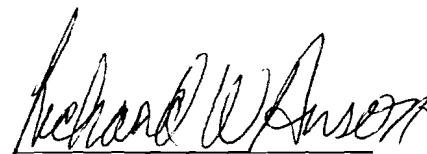

Including the District in the list of agencies that are proposed for consolidation under Phase I would result in a step backwards for Borrego Springs. The level of service we now provide and our community now enjoys would be put in jeopardy.

In summary, the Borrego Springs Fire Protection District Board of Directors supports the long term plan for countywide consolidation of fire protection and paramedic services; however, for reasons stated above, the Board is not in favor of participating in the Phase I plan. The Board considers it to be too high a risk for a District that has a proven track record of operating efficiently and not only maintaining basic service levels, but also continuously increasing service levels as the needs of our community have grown.

Respectfully,

Marty Orenyak, Chairman

Bob Moore, Vice Chairman

Richard Anson, Secretary

Sharon Sewall, Commissioner

Brad Tidwell, Commissioner

RESOLUTION NO. 308

RESOLUTION OF THE BOARD OF DIRECTORS OF THE BORREGO SPRINGS FIRE PROTECTION DISTRICT, OBJECTION TO THE PARTICIPATION IN THE SAN DIEGO LAFCO PHASE I FIRE AND EMERGENCY CONSOLIDATION PLAN AS DESCRIBED IN THE MICRO REPORT PUBLISHED JANUARY 31, 2007 INCLUDING ATTACHMENT 1 ENTITLED; CONCEPTUAL REORGANIZATION OF SAN DIEGO COUNTY FIRE SERVICES.

WHEREAS, the San Diego LAFCO requested a study be performed on a County Fire and Emergency Consolidation Plan for the Unincorporated area of San Diego County and;

WHEREAS, the San Diego LAFCO staff published the Micro Report Published January 31, 2007 entitled; Reorganization of the Structural Fire Protection and Emergency Medical Services in the Unincorporated areas of San Diego County and;

WHEREAS, the Executive Summary of the report proposes Borrego Springs Fire Protection District be included in Phase I of the Consolidation Plan and;

WHEREAS, the stated criteria used for determining which Districts were to be included in Phase I, were Districts with either no funding base or Districts that were considered significantly under-funded and;

WHEREAS, the Board of Directors of the Borrego Springs Fire Protection District does not concur with the findings that Borrego Springs Fire Protection District is "significantly" under-funded and;

WHEREAS, the Borrego Springs Fire Protection District receives financial support from the community in addition to Property Tax and a Special Tax and;

WHEREAS, the Borrego Springs Fire Protection District currently provides the community with a level of service that exceeds that of the best model described in the Mirco Report and;

WHEREAS, The Borrego Springs Fire Protection District believes that adequate long-term funding must be guaranteed for the proposed consolidation district to ensure that Borrego Springs is not used to supplement the financial inadequacies of the County's unincorporated volunteer stations and;.

WHEREAS, we believe a positive first step would be to limit the Phase I study and any resulting reorganization, to volunteer-manned stations in unincorporated areas of San Diego County and;

WHEREAS, the Board considers it to be too high a risk for a District that has a proven track record of operating efficiently and not only maintaining basic service levels, but also continuously increasing service levels as the needs of our community have grown and;

WHEREAS, The Board of Directors of the Borrego Springs Fire Protection District respectfully requests to be removed from the Phase I Consolidation Plan including the plan as described in Attachment 1; entitled Conceptual Reorganization of San Diego County Fire Services and;

THEREFORE BE IT RESOLVED; The Borrego Springs Fire Protection District voted on March 26, 2007 at a special meeting of the Board of Directors to object in the participation in the San Diego LAFCO Phase I Consolidation Plan.

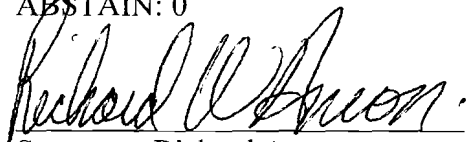

PASSED AND APPROVED This 26th Day of March, 2007 by the following vote:

APR - 4 2007

SAN DIEGO LAFCO

Dear Mr. Ott and Ms. Anderson,

The Borrego Springs Chamber of Commerce, representing 250 members, supports the position taken by the Borrego Springs Fire Protection District in its letter to you of March 26, 2007, requesting Borrego Springs be removed from the LAFCO Phase I Reorganization Plan as outlined in the Micro Report dated January 31, 2007.

As members of the Borrego Springs community, we are fortunate to enjoy a high level of service from the Borrego Springs Fire Protection District, and we especially appreciate the quality of our paramedic program.

The proposed Phase I consolidation including Borrego Springs deeply concerns us with regard to issues of loss of local control, lack of long-term funding, and possible reduction in fire and paramedic services for our community. We believe that the dissolution of our District by the LAFCO Agency would be a detriment to the community and would possibly degrade the services we now enjoy.

We request that the LAFCO Commission honor the position of the Borrego Springs Fire Protection District Board of Directors and remove Borrego Springs from the Phase I consolidation plan.

Sincerely,

Gwenn Marie, President
Borrego Springs Chamber of Commerce Board of Directors

RECEIVED

APR - 3 2007

SAN DIEGO LAFCO

Mr. Michael Ott
Executive Director
San Diego LAFCO
1600 Pacific Highway, 452
San Diego, CA 92101

Dear Mr. Ott:

I, Katherine A. King, a member of the Borrego Springs Community for 15 years support the position taken by the Borrego Springs Fire District in its letter of March 26, 2007. I too request that Borrego Springs be removed from the LAFCO Phase I Reorganization Plan.

It is my understanding that LAFCO has determined that Borrego Springs is grossly under funded and needs to be absorbed into a larger agency that would serve 26 different communities. This absorption would take money away from our community and lower the level of service we receive. Under the LAFCO plan, there is a strong possibility that we would reduce our EMT/Paramedics from 3 to 1. This is completely unacceptable to the residents of this valley. To fully understand how devastating this would be, 73% of the call outs in 2006 were medically related. As the median age of Borrego Springs is between 60 & 70 years and we have no hospital or urgent care facility, to reduce our medical services would be a tragedy.

The Borrego Springs Fire District receives funds from many alternative sources. The LAFCO committee was unable to include these services in their determination as they are not from tax dollars. I request that you revisit this position. It can be shown by our budget and spending reports that these funds have been a part of the District for the past 10+ years and that there is no indication that they will be evaporating. The Fire Department operates within their means and will continue to do so.

As to control, this District is a well managed organization. The Borrego Springs Fire Protection District Board of Directors has continued to do a superb job maintaining the level of service to our area. Under the new plan, the 11 member board will, in all likelihood, not include a member from Borrego Springs. Our voice will be lost.

It is my belief that the dissolution of the District by the LAFCO Agency would be a detriment to both the community and the fire and emergency services that are currently provided.

I respectfully request The LAFCO Commission honor the position taken by the Borrego Springs Fire Protection District Board of Directors and remove Borrego Springs from the Phase I consolidation plan.

Sincerely,

SAN DIEGO LAFCO

April 4, 2007

Mr. Michael Ott
Executive Director
San Diego LAFCO
1600 Pacific Highway, 452
San Diego, CA 92101

Dear Mr. Ott:

The Borrego Springs Real Estate Association, representing 9 local offices and 28 members, supports the position taken by the Borrego Springs Fire District in its letter of March 26, 2007, in requesting Borrego Springs be removed from the LAFCO Phase I Reorganization Plan.

We as members of the Borrego community are extremely pleased with the level of service provided by the Borrego Fire District and especially the paramedic program.

Prospective buyers often ask us about medical services in Borrego, as our community is so isolated from other areas. The level of service currently provided by the Borrego Springs Fire District is an integral component in a buyer's investigation of Borrego as a new place of residence.

The Phase I consolidation concerns us with regard to issues of loss of local control, lack of long-term funding, and possible reduction in fire and paramedic services for the community of Borrego Springs.

We believe that the dissolution of the District by the LAFCO Agency would be a detriment to the community and the fire and emergency services currently provided.

Therefore, we respectfully request The LAFCO Commission honor the position taken by the Borrego Springs Fire Protection District Board of Directors and remove Borrego Springs from the Phase I consolidation plan.

Sincerely,

Kellie Hamilton
President
Borrego Springs Real Estate Association

LA CASA DEL ZORRO Desert Resort

April 4, 2007

Mr. Michael Ott
Executive Director
San Diego LAFCO
1600 Pacific Highway 452
San Diego, California 92101

Dear Mr. Ott:

La Casa Del Zorro Desert Resort supports the position taken by the Borrego Springs Fire District in its letter of March 26th, 2007, in requesting Borrego Springs be removed from the LAFCO Phase 1 Reorganization Plan.

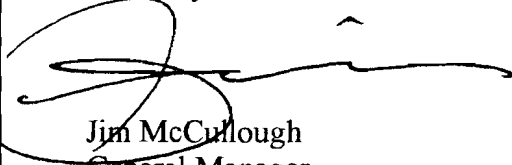

As members of the Borrego community we are pleased with the level of service provided by the Borrego Fire District and the paramedic program.

The Phase 1 consolidation concerns us with regard to issues of loss of local control, lack of long-term funding, and possible reduction in fire and paramedic services for the community of Borrego Springs.

The proposed consolidation would have great economic impact on this business and many of the businesses in the Borrego Valley. The dissolution of the District by the LAFCO Agency would be a detriment to the community and have long term economic effects.

We respectfully request The LAFCO Commission honor the position taken by the Borrego Springs Fire Protection District Board of Directors and remove Borrego Springs from the Phase 1 consolidation plan.

Sincerely

Jim McCullough
General Manager

Re: LAFCO Phase 1 Reorganization Plan

Dear Mr. Ott,

My name is Bill Wright, I am a homeowner and owner of The RoadRunner Club wherein approximately 550 senior residents live. I support the position of the Borrego Springs Fire District as stated in their letter dated March 26, 2007 that requests that Borrego Springs be removed from the LAFCO Phase 1 Reorganization Plan.

I speak to this issue on behalf of these residents, as I have a vested interest in their health and safety. Currently we experience a very high level of capability and expertise in both fire protection and emergency medical services as provided by the Borrego Fire District

Consolidation of the Borrego Fire District into a larger district composed of other rural districts would diminish the capabilities that we currently have, reduce local control of services, dilute or eliminate the local sources of funding that we have developed here, and potentially reduce the quality and availability of fire and medical services.

Borrego Springs is unique among other back country communities in this area in that it has a fully professional fire department, is relatively remote from hospitals and other emergency medical facilities, and has a population that is more retirement oriented, thus generally older and more medically fragile.

Dissolution of the Borrego Springs Fire District would be a detriment to this community and would likely negatively impact the health and safety of the citizens and visitors of this valley. I strongly urge that the LAFCO Commission remove Borrego Springs from the Phase 1 Reorganization Plan.

Sincerely,

A handwritten signature in black ink, appearing to read "Bill Wright", is written over the word "Sincerely,".

Mr. Michael Ott
Executive Director
San Diego LAFCO
1600 Pacific Highway, 452
San Diego, CA 92101

Dear Mr. Ott:

The thirty-five members of Borrego Lutheran Church support the position taken by the Borrego Springs Fire District in its letter of March 26, 2007 in requesting that Borrego Springs be removed from the LAFCO Phase I Reorganization Plan.

We as members of the Borrego Springs community are very well pleased with the level of service provided by the Borrego Fire District, especially its paramedic program.

The Phase I consolidation concerns us with regard to such issues as the loss of control, lack of long-term funding, and possible reduction in fire and paramedic services for our community. We believe that the dissolution of the District by the LAFCO Agency would be a detriment to this community and the emergency services currently provided.

Therefore, we respectfully request the LAFCO Commission honor the position taken by the Borrego Springs Fire Protection District Board of Directors and remove Borrego Springs from the Phase I consolidation plan.

P.O. Box 1316, Borrego Springs, California 92004

April 4, 2007

**Mr. Michael Ott
Executive Director
San Diego LAFCO**

Dear Mr. Ott,

I am writing on behalf of the Road Runner Club residents to register our concerns relating to the Micro Reports inclusion of Borrego Springs in phase 1. We are in support of the Borrego Springs Fire Protection Districts position that this district does not meet the criteria of "under funded". Any reorganization that could result in reduction in Paramedic services will have a serious impact on the health and safety of our residents. Borrego Springs is an isolated community with no major highways to connect to other medical services. The closest emergency treatment is approximately one hour away.

The majority of the population of Borrego Springs is of retirement age and therefore we have a great need for close by Paramedic services. In event of a stroke or heart attack quick medical intervention is necessary to assure the persons survival.

We urge you to consider the consequences of a reduction to the Paramedic services and remove the Borrego District from phase 1

Thank you for your consideration,

A handwritten signature in black ink, appearing to read "Jim Wilson".

RE: LAFCO Phase 1 Reorganization Plan

Dear Mr. Ott,

My name is Dan Wright and I am a homeowner and the owner of The Springs at Borrego RV Resort and Golf Course. I support the position of the Borrego Springs Fire District as stated in their letter dated March 26, 2007 that requests Borrego Springs be removed from the LAFCO Phase 1 Reorganization plan.

The Springs at Borrego serves literally thousands of RV guests and golfers each year. I speak to this issue on behalf of these guests, as I have a vested interest in their health and safety. Currently we experience a very high level of capability and expertise in both fire protection and emergency medical services as provided by the Borrego Fire District.

Consolidation of the Borrego Fire District into a larger district composed of other rural districts would diminish the capabilities that we currently have, reduce local control of services, dilute or eliminate the local sources of funding that we have developed here, and potentially reduce the quality and availability of fire and medical services.

Borrego Springs is unique among other back country communities in this area in that it has a fully professional fire department, is relatively remote from hospitals and other emergency medical facilities, and has a population that is more retirement oriented, thus generally older and more medically fragile.

Dissolution of the Borrego Springs Fire District would be a detriment to the community and **would likely negatively impact the health and safety of the citizens and visitors of this valley**. I strongly request that the LAFCO Commission **remove** Borrego Springs from the Phase 1 Reorganization Plan.

Sincerely,

Dan Wright

Re: LAFCO Phase 1 Reorganization Plan

Dear Mr. Ott,

My name is Bill Ferguson and I am a homeowner and the General Manager at The RoadRunner Club. I support the position of the Borrego Springs Fire District as stated in their letter dated March 26, 2007 that requests that Borrego Springs be removed from the LAFCO Phase 1 Reorganization Plan.

The RoadRunner Club is home to approximately 550 residents who are 55 and older. I speak to this issue on behalf of these residents as I have a vested interest in their health and safety. Currently, we experience a very high level of capability and expertise in both fire protection and emergency medical services provided by the Borrego Fire District. Due to the age of our residents, the fire department is here on a regular basis responding to various types of calls. It would be devastating to this community to lose this life-saving service.

Consolidation of the Borrego Fire District into a larger district composed of other rural districts would diminish the capabilities that we currently have, reduce local control of services, dilute or eliminate the local sources of funding that we have developed here, and potentially reduce the quality and availability of fire and medical services.

Borrego Springs is unique among other back country communities in that we have a professional fire department, we are relatively remote from hospitals and other emergency medical facilities, and has a population that is more retirement oriented, thus generally older and more medically fragile.

Dissolution of the Borrego Springs Fire District would be a detriment to this community and would likely negatively impact the health and safety of the citizens of this valley. I strongly urge that the LAFCO Commission remove Borrego Springs from the Phase 1 Reorganization Plan.

Sincerely,

I, *Sara Antoney*, a member of the Borrego Springs Community support the position taken by the Borrego Springs Fire District in its letter of March 26, 2007, in requesting Borrego Springs be removed from the LAFCO Phase I Reorganization Plan.

As a long-term member of the Borrego community, I am extremely pleased with the level of service provided by the Borrego Fire District, especially the paramedic program.

The Phase I consolidation concerns me with regard to issues to include the loss of local control, lack of long-term funding, and the possible reduction in fire and paramedic services we cherish.

I believe that the dissolution of the District by the LAFCO Agency would be a detriment to the community and the fire and emergency services currently provided.

Therefore, I request that the LAFCO Commission honor the position taken by the Borrego Springs Fire Protection District Board of directors to remove Borrego Springs from the Phase I consolidation plan.

Sincerely,

Sara Antoney

SAN DIEGO LAFCO

Mr. Michael D. Ott
Executive Officer
San Diego Local Agency Formation Commission
1600 Pacific Highway, Room 452
San Diego, CA 92101

Dear Mr. Ott:

The Board of Directors of the Deer Springs Fire Protection District (DSFPD) remains concerned regarding our Phase I status in the LAFCO reorganization and recommends that we be moved to Phase II for the following reasons:

1. Service Comparison for Fire and EMS.

While there are many ways in which to increase levels of service that are considered inadequate, DSFPD believes that Phase I should be limited to volunteer-manned stations in the unincorporated areas of San Diego County that do not meet the minimum standards in the recent (3/19/07) Service Comparison for Fire and EMS.

In this very comparison, the Deer Springs fire district exceeded or met all minimum standards.

On any given day, 24/7, DSPFD has at least 3 firefighters at Station 1 (Circle R Drive) and Station 2 (Deer Springs Road), including one ALS and two firefighters are EMT/ De-Fib combi-tube qualified. At the Amador Miller Station (Lilac Road) we have three firefighters, 24/7, with at least one who is EMT/De-Fib combi-tube qualified. This level of staffing allows us to respond to the highest needs of our community. Last year, DSFPD responded to 713 Rescue/EMS calls and 200 fire calls with an average of 10 members responding to each fire call.

2. Funding

With the passage of Proposition 13, all County fire districts have struggled to ensure sufficient funding. However, compared to several "non- or under-funded" areas, particularly east county and other outlying areas, DSFPD can be considered well-funded. We bring in approximately \$1.4 million through a Special Tax Assessment passed in 2005. Most requests for tax increases in 2005 were defeated by residents; but our neighbors overwhelmingly supported this self-imposed tax increase.

Deer Springs Fire Protection District

8709 Circle R Drive Escondido, CA 92026 tel 760.749.8001 fax 760.749.6572

Our District also receives \$365,000 from property taxes and \$1.3 million through the Standby Availability Charge. While the County generously contributed approximately \$720,000 for staffing through the Fire Enhancement Program which has benefited our District, DSFPD believes that we have the income, or can generate the income, to operate independently.

With all the under-funded districts already in Phase I, DSFPD has serious doubts that additional funds from the County will come our way once the reorganization has taken place. If that is the case, DSFPD loses its ability to improve our district. Therefore, the Phase I reorganization presents an obvious disadvantage to DSFPD and our area neighbors.

As stated in an earlier letter from the Board (10/19/05), the costs borne by DSFPD District residents disproportionately falls on our homeowners when compared to the costs of property owners in pre-1978 Districts. Therefore, if DSFPD remains in Phase I, we expect that that funds raised by the County would totally supplant and replace the Deer Springs Fire Suppression Assessment and the Standby Availability Charge *so that our Assessment and Standby Availability Charges will be totally eliminated.*

3. ISO Rating

The majority of the district has reduced its ISO rating from a 9 to a 6. With a new firehouse starting construction in Hidden Meadows, this can only reduce our ISO rating even further.

4. Local Control

The District is concerned that its responsibility to its residents and property owners will be diluted and seriously diminished if it is considered part of the Phase 1 reorganization. Our local community duly elected Fire Board Directors who would support and protect the communities' interests.

By eliminating the local Fire Board, our communities no longer have the local representation necessary to address the particular needs of our own District.

As an example, without the ability to review fire protection plans for our district, DSFPD would no longer has the ability to comment on how a development would impact the surrounding communities. This is especially a concern for developments incorporating the concept of "shelter-in-place."

DSFPD also is one of the few Districts throughout San Diego County to have both a Fire Safe Council and a community Emergency Response Team (CERT).

- The Fire Safe Council has an operating budget of \$8,500 funded solely through local contributions, which it uses to operate a reverse 911 system, send out newsletters to all neighbors in the District, and implement a large animal evacuation program which has micro-chipped several horses, goats and llamas through a local veterinarian.

Deer Springs Fire Protection District

8709 Circle R Drive Escondido, CA 92026 tel 760.749.8001 fax 760.749.6572

- Our CERT volunteers train to assist with basic emergency response skills in the event of a large disaster and serve as liaisons to disseminate information back to our communities.

Putting DSFPD in Phase I represents a step backward for our District. DSFPD has a proven track record of operating efficiently and exceeding required standards. Once again, we believe that Phase I should only include those districts with volunteer firefighters who have insufficient resources to provide adequate fire protection and emergency medical services for their area. That description does not include the Deer Spring Fire Protection District which is fully-staffed and well-funded.

Furthermore, DSFPD is already under contract with CAL FIRE which provides central control for all of North County in the event of a large wildfire. Also, the local fire districts have reciprocal aid agreements. All together, we believe there is more than sufficient evidence that DSFPD should be moved to Phase II.

Sincerely,

The DSFPD Board of Directors

MAR 27 2007

SAN DIEGO LAFCO

March 15, 2007

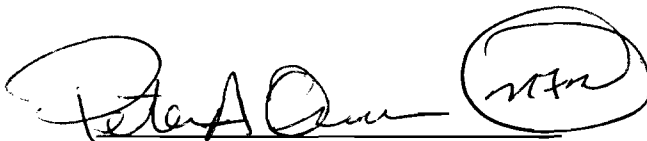

**Mr. Michael Ott
LAFCO
1600 Pacific Highway
San Diego, CA. 92101**

Dear Mr. Ott:

RESOLVED

The Deer Springs District Fire Board respectfully requests that LAFCO remove the Deer Springs Fire District from Phase 1 of the proposed consolidation/merger effort.

**Deer Springs District Fire Board
8709 Circle R Drive
Escondido, CA. 92026**

Peter A. Orner, President

1-1-1
1-1-1
1-1-1

**Remarks to LAFCO Public Workshop
March 7, 2007**

There is a proposed development in North County (called Stonegate/Merriam Mountains) that serves as an example of what is taking place with regard to fire safety in San Diego County at large. It sheds light on the County's plan to disband the independent local Fire Districts and what the disastrous consequences of such an action would be.

Stonegate is a 2,700-unit project proposed in a severe high-fire-hazard, mountainous area of North County. In planning scenarios, the California Department of Forestry and Fire Protection (CDF) designated Merriam Mountain as a likely site for a future major fire catastrophe. CDF predicted that a fire on Merriam Mountain would be intense, highly destructive and virtually impossible to control, taking 10 to 15 minutes to go from the base of the mountain to the crest. The Stonegate project sits atop an enormous fuel load of dense wildland vegetation and chaparral that has been building up for 100 years. 1,200 project acres are preserved wildlands that adjoin thousands of acres with a similar fuel load. The entire Stonegate project is served by only two internal roads, both emptying into **same** rural road, Deer Springs Road, which is rated as a failing road (and will remain failing if widened to 4-lanes or even to 6-lanes). Given Stonegate's extremely limited egress, if a fire occurs during Santa Ana wind conditions, 10,000 to 13,000 residents will be trapped.

Over the Christmas holidays, the County approved the Fire Protection Plan for the Stonegate project, completely bypassing the local Fire Agency Having Jurisdiction (FAHJ), the Deer Springs Fire Protection District. This was an unprecedented action. Never before had the responsible agency been bypassed. In fact, **prior** to the replacement of the entire Fire Board as a result of the November 2006 general elections (the candidates running on an anti-Stonegate platform were swept to victory by a 3-to-1 margin), the County had repeatedly stated that Deer Springs District approval of Stonegate's Fire Plan was **required** before the project could move forward.

When Stonegate's County-approved Fire Plan was examined by the Deer Springs Board, it was found to be grossly deficient. Stonegate's Plan **incredibly** predicts that the majority of wildfires on Merriam Mountain would be easily controlled. The Plan **incredibly** predicts that "there will be **no** loss of structures or loss of life even during a worst case wildfire scenario, freeing up firefighters and allowing them to go elsewhere."

Defying all logic and all principles of wildfire science, the Plan predicts that any wildfire would "bump up" against the fuel clearances and "run out of fuel." The Plan retains the concept of "Shelter-in-Place" in defiance of the specific instructions to eliminate that concept. It introduces yet another objectionable policy called "temporary relocation" within the project. The Plan actually instructs residents to seek safety outdoors in the "park" during a wildfire (in effect, advising people to go "from the frying pan into the fire"). The Plan has no provision for evacuation. It does not address what happens to residents during a fire except to say they would be given brochures at the time of sale on how to avoid panic. There is no mention of how to mitigate smoke inhalation (which accounts for up to 80% of all fire fatalities). The Plan ignores the plight of infants, children, asthmatics, the elderly and the medically compromised. On January 19, 2007, Stonegate's Fire Protection Plan was unanimously **rejected** by the Deer Springs Fire District Board.

Three days later, on January 22, 2007, the County Department of Planning Director Gary Pryor called a special meeting to "educate" an outspoken member of the Deer Springs Fire Board about "the process." Mr. Pryor stated that the "**clients**" of his agency were the **developers** and that his agency's job was to assist them and "level the playing field for them." He said that he would not allow the "silver bullet" of fire safety stop the building of a development. He also stated that the Deer Springs Fire Protection District had no role in the approval of the Fire Protection Plan. The Fire District Board member expressed his objections to the reckless conduct of the DPLU and was asked by Mr. Pryor to leave.

At about the same time, the County issued a draft document proposing to revise County policy on wildland fire protection. It proposed the adoption of "Shelter-in-Place" as acceptable fire protection strategy when "secondary access is unattainable due to topographical or geographical constraints." "Shelter-in-Place," for those who are unfamiliar, instructs people to stay inside their homes in the event of a wildland fire and not to evacuate. It is a myth and a hoax insofar as fire protection is concerned. It is **not** accepted policy anywhere in the United States. It has **never** been tested in a planned community during an actual wildland fire. In August 2006 the American Lung Association wrote a position paper on this subject addressed to the DPLU, imploring that this policy not be accepted because it would result in the deaths of thousands. Incredibly, the County has ignored the overwhelming mass of medical evidence and has forged ahead with this plan that will enable dense development in a highly fire-hazardous wildland area of the County.

With the Deer Springs Fire Protection District refusing to grant Fire District approval to the Stonegate project (a de facto Shelter-in-Place development), the County became instantly motivated to protect its development agenda by eliminating the local Fire Districts **altogether**, a proposal that had been considered for decades without action taken. To claim (as the County has) that the 2003 fires spurred this current move towards consolidation is disingenuous. The 2003 fires occurred nearly four years ago, but this current impetus towards a merger is now taking place against the telltale backdrop of recent events regarding the Stonegate project. In the County's January 22, 2007 consolidation proposal signed by Gary Pryor, the County writes: "All new development should be coordinated and evaluated within the DPLU for fire protection purposes." This would give the County absolute power to approve developments in the wildland-urban interface areas and to ignore fire-safety issues such as evacuation or the impact of new development on existing communities. Many such unsafe developments have already been approved in San Diego County and many more are being planned.

What has occurred with the Deer Springs Fire District and the Stonegate development is a microcosm of what to expect if a merger is allowed to take place that concentrates all decision-making authority with the County. LAFCO's Board is urged to consider the County's action of deliberately bypassing the Deer Springs Fire District and approving a deficient and dangerous Fire Protection Plan over the Christmas holidays without even first making it public as required by law or releasing it to the Deer Springs Fire Board and personnel. The California Public Records Act was repeatedly violated by the County in its attempt to shield Stonegate's Fire Protection Plan from public scrutiny.

When the next major fire occurs in San Diego County (a question not of "if" but "when"), the result will be far more catastrophic than the Cedar and Paradise fires. There will be **massive loss of human life** because of the numerous unevacuatable developments being approved in the wildland areas by the County Planning Department and the Board of Supervisors.

There is now strong emphasis on the Federal government level to **limit** and curtail such development because of the danger of locating population density in highly-fire-prone interface areas. On January 30, 2007, top officials from the U.S. Department of the Interior, the Department of Agriculture and the Government Accountability Office testified at the U.S. Senate Committee hearing on "Costs of Wildfire Suppression." It was concluded that it is the responsibility of local government to **reduce** development in the wildland interface areas, because it has sent fire

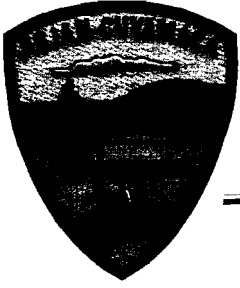

suppression costs soaring, hampers firefighting efforts and recklessly endangers thousands of lives. San Diego County government has failed to heed that advice and is moving 180 degrees in the **opposite** direction by working to promote the economic interests of developers at the expense of public safety.

For all of the above reasons, we urge LAFCO to preserve the current structure of local independent Fire Districts and to reject the proposal to disband these districts. These Special Districts serve the critical function of preventing concentration of power and ultimately, abuse of power resulting from the influence of special interests. The Fire Districts are the watchdogs of public safety, as demonstrated in the Deer Springs Fire District. Given the County's conduct regarding the Stonegate/Merriam Mountain project, together with its proposal to officially adopt the disastrous "Shelter-in-Place" policy as acceptable fire protection strategy, the dangers of centralizing fire-safety decisions become evident.

Julian Cuyamaca Fire Protection District

March 29, 2007

RECEIVED

APR - 6 2007

SAN DIEGO LAFCO

LAFCO Commissioners,

Julian Cuyamaca Fire Protection District (JCFPD) has a twenty five (25) year history of proud and meritorious service to the citizens of our rural, unincorporated portion of San Diego County. Back when other areas were just starting to germinate the seeds of newfound needs for fire service, JCFPD was already staffing their rescue rig with certified EMT's. Long before it was fashionable to have EMT's combi-tube certified, JCFPD had almost an entire department that was EMT D-C's. When the San Diego County Sheriff's Department wanted out of the ambulance transport business *JCFPD was the only volunteer fire department to bid on the contract*. Not only did we bid on the contract, we were awarded the contract based upon our history of providing quality, timely, and consistently superior service to our residents. We have run the ambulance for 9 years now. True to our history, our philosophy, and our dedication to the citizens, we upgraded to Advanced Life Support on our own initiative. Our service area is a huge section of eastern San Diego County. We remain the **only** volunteer fire department in the county providing ALS transport service, but that is just 80 to 85% of our calls. What about the firefighting side of the department?

We can currently place 15 to 25 volunteers on a fire scene in under twenty (20) minutes. Only areas that have an extended travel time to access have a slightly longer response time. This response does vary some depending on the day of the week and time of day. Even if we get just 15 or 20 on scene that is still five

2645 FARMER ROAD, POST OFFICE BOX 33, JULIAN, CA 92036-0033
(760) 765-1510

times as many as any model being proposed by the LAFCO study. JCFPD has consistently met the challenges of the dynamic area we live in. We currently have 800 MHz and VHF radios in all of our rigs so that we have communications with any and all fire forces likely to be operating in our area. We have done such an outstanding job of providing for fire protection that we currently have a rating of 5 / 8 by the Insurance Service Organization, or ISO as they are commonly known. This is one of the best ratings of all the rural volunteer fire agencies of San Diego County. To get this rating, **which is already better than the 7 rating the county hopes to achieve with paid personnel**, we had to show a history of superior service to the community in fire related calls. We could show it because we've done it. Year in and year out we've done it.

Now don't misunderstand me, I feel that the LAFCO staff did an outstanding job in researching the county fire agencies. That being said, I also feel that they didn't fully gauge the feelings of our community when researching the facts and figures that make up a fire agency. Just after the Cedar Fire in which 1 out of 4 or 650 homes in Julian/Cuyamaca were destroyed, we had a town meeting hosted by Diane Jacob and attended by many local residents who lost their homes. When the local volunteer firefighters were introduced they were given a resounding standing ovation which went on long enough to become embarrassing. Why would we be embarrassed from this obvious form of support and admiration by our own community? We were placed in the uncomfortable position of being the only fire department introduced that night that was not met with, to put it mildly, a mediocre reception. Our community knew, from reports of locals that did not evacuate, that this group of volunteers did not quit. We were on the fire line for 7 days straight, eating what we could when we could, and sleeping when and where we could. To a man (or in many cases a woman) they never stopped fighting fire and protecting homes in our district. Their actions were totally and directly responsible for the saving of hundreds of homes both in our district and the greater Ramona

2645 FARMER ROAD, POST OFFICE BOX 33, JULIAN, CA 92036-0033
(760) 765-1510

Fire District. They continued not for the promise of a paycheck or an excellent retirement package but for the satisfaction of knowing that they had helped their neighbor.

You as board members of LAFCO, risk losing that continuity with the community if you elect to go with a new entity - be it the County of San Diego or a new and arguably unmanageable fire protection district. *This has been demonstrated numerous times in our county (i.e. Valley Center Fire, Pine Valley Fire, et. al.)* - when paid staff or paid reserves enter the equation the volunteers of that area end up leaving the fire service. The reasons are as diverse as the volunteers themselves. I don't pretend to know all the answers but I do know this; **it is usually a death knell for volunteer departments when paid personnel are hired.** You can find marginal anomalies to the previous statement (Riverside County may be one) but more often than not when paid crews are placed in a station the volunteers disappear.

The communities of Julian and Cuyamaca can not afford to lose their volunteers and we know it. We do not have the tax base to support a paid fire agency and that is just a fact. That is why I am asking you directly; **PLEASE LEAVE JULIAN CUYAMACA FIRE PROTECTION DISTRICT OUT OF PHASE ONE.** I'm asking both as a resident and as a public official whose job includes working with and understanding what makes a volunteer tick. Why am I specifically asking to be left out of phase one and not phase two? I believe phase one has a very real chance of not being as successful as many of you commissioners believe it will be. If it is only marginally successful we have the very real chance of losing a fire department that has served this area well for a quarter of a century. Most of us in this area are not willing to risk the very good fire department we have for a department that has its genesis in a sham of a proposition, Proposition C.

That's right; I believe that the basis for the concept of a new fire agency is a knee jerk reaction to the devastating Cedar Fire. We got walloped by a
2645 FARMER ROAD, POST OFFICE BOX 33, JULIAN, CA 92036-0033
(760) 765-1510

confluence of factors, most of which were beyond our control (i.e. numerous major fires burning concurrently; horrific Santa Ana winds; fuel primed by drought and bark beetle kill; etc). Proposition C came along shortly thereafter and basically asks; "Would you like a paid county wide fire agency that won't cost a dime in new taxes". Who wouldn't want that? But what are we really doing here? We are robbing Peter to pay Paul. Any money we take for this new fire agency is coming out of some other tax supported venture. Budgets are like a Julian apple pie - it has just so many slices. If we take someone else's slice they have to replace it from somewhere. Someone down the road is going to lose a slice of their pie. I just hope Peter, whoever he is, is keeping an eye on his pie.

I wouldn't be as distressed about this whole idea if we had only been truly honest with the voters from the beginning. Voter's in Julian Cuyamaca Fire Protection District recently passed a proposition, Proposition S. It called for the voters to approve charging each parcel as much as \$50.00 a year in new taxes to allow us to build a new station. 73.5% of the voters agreed with us that this was a good idea. We didn't use language which inferred that there was no cost to fund our proposition. We were upfront about the cost to taxpayers and they still overwhelmingly approved the new tax.

There is an absolute cost of at least \$22,000,000.00 in new expenses to fund this proposal before you today. Until the voters are honestly informed of the actual cost of this proposal I urge you to do the right thing and vote not to establish a new fire agency. If you don't agree with me and find you can't do that, at least leave Julian Cuyamaca Fire Protection District out of phase 1.

Sincerely,

Kevin C. Dubler, Chief

(760) 765-1510

Julian Cuyamaca Fire Protection District

Supervisor Bill Horn
1600 Harbor Drive
San Diego, CA 92101

Dear Supervisor Horn,

Earlier this year our district was offered the opportunity of funding for 3/0 staffing on one of our fire engines (3 people, 7/24). This offer came from you, the Board of Supervisors, through the Department of Planning and Land Use. Some of the many stipulations laid out were: that the engine staff must be California Department of Forestry (CDF) employees contracted through negotiations with CDF; that we must "...bargain in good faith..."; and the contract needed to be signed in this (2006-2007) fiscal year.

We initiated the process in a letter to Chief Maner, dated August 16, 2006, requesting a proposal for Schedule A contract services between JCFPD and CDF. We received a response in mid October (which was dated August 31, 2006) with a totally unsatisfactory proposal. It called for CDF to take over all functions of our district including: the Ranger Unit Chief of CDF being named as "Chief" of JCFPD; the CDF Battalion Chief named as "Supervisor" of our ambulance crew as well as our volunteers; et.al. at a cost to us of \$10,000.00 more than the DPLU contract.

On November 1st we (two board members and I) met with a cadre of chiefs from CDF to discuss the proposal. Chief Maner, the South Operation

Assistant Chief, assured us that the proposal was just that and that "...everything is on the table." This appeared to be true as we commenced to having a productive negotiations toward what Chief Maner called an "Operational Plan", an addendum to the proposal/contract. Although notes were taken, *no official contract proposal was put forth*. Due to time constraints it was agreed that we would meet again to work out the terms of the Operational Plan based upon the November 1st meeting.

On Wednesday, December 13th, we met with the CDF representatives which now included Acting Ranger Unit Chief Kevin Eggelston. He informed us that CDF's proposal was a take it or leave it proposal and there would essentially be no "Operational Plan" if it altered the basic scope of the boiler plate state contract. The working relationship between JCFPD and CDF, as delineated in the CDF proposal, is deemed by the Board of Directors to be detrimental to the long term good of the District. It would drive volunteer firefighters away from the department due to a perceived diminished need for their services. The Board fears that at the end of three years, when the funding may no longer be available, we will be without many of our volunteers who would have quit due to the diminished need of their services. This could result in the total disintegration of the operational side of the Julian Cuyamaca Fire Protection District. The sequence of events we described here is a distinct possibility and the District Board has an obligation to protect the District against such a potentially crippling turn of events.

Due to both the determinations made above (that this proposal as written is not in the best interest of the citizens of the District) and CDF's failure to bargain in good faith (evidenced by a complete reversal of

position) we are choosing to not avail ourselves to this offer.

We would, however, like to offer an alternate plan that will improve the fire service in the whole backcountry far more than having 3 firefighters on an engine in Julian. With respect to the intent of your offer, \$1,014,000.00 is a staggering amount to pay for such a limited benefit (3/0 staffing). This is particularly true in light of the Amador contract which currently provides for a staffed CDF engine, year round, at the Julian CDF station. We propose that due to the time constraints of using the money this fiscal year, you allow these *million dollars* to be dispersed throughout the unincorporated area of the county not being serviced by a county funded Schedule A contract. This could be accomplished via a grant process similar to the current Fire/EMS Trust Fund Grants. The process could be set up using the existing criteria of the Fire/EMS Grants with OES. This would allow the funds to be dispersed quickly and more equitably than just dumping a million dollars into any one agency's pockets for such limited coverage. It could assist many small struggling departments with a real influx of much needed assistance. It should be noted that we believe the volunteer fire agencies of San Diego County probably have a very realistic idea of their own needs. These volunteers respond daily with the limited resources that come with being a rural volunteer department in a sparsely populated area. As they struggle to complete the vehicle extrication, structural fire suppression, or assisting CDF and USFS in battling vegetation fires, they are painfully aware of their own needs. Listen to them and assist them in funding these needs. The entire fire service in the backcountry could get a much needed boost if you could see fit to

redistribute the funding from this grant. The money we are talking about has already been approved and funded by you and your colleagues on the Board of Supervisors. This plan won't cost any more than what is already allocated *but consider the regional difference this money could make if disbursed in this manner!*

Thank you for taking the time to consider this adjustment to previously funded monies. We, the JCFPD Board of Directors and I, would appreciate a response to this letter with your opinion about the feasibility of our proposal - shifting these grant monies to gain area wide benefit.

Sincerely,

Dean Stowers, President

SAN DIEGO LAFCO

Dear John,

I was advised at last night's Zone 8 meeting that you would like to see a copy of the letter the Julian Cuyamaca Fire Protection District sent to the County Board of Supervisors rejecting the offer of 3/0 staffing for our department. Here is a copy.

It should be noted that the *primary reason* we elected not to accept this offer was only touched upon in this letter, that being that the amount offered was not enough to fully fund this staffing. At the time this letter was written we were still hopeful that more funding was available from the County. In a nutshell- the county offered us \$1,014,000 (and change) for this program. That figure was less than CDF was indicating it would charge for the first year by approximately \$11,000.

We had been told early on in the negotiations with Ken Miller and Ralph Steinhoff that in year one we would receive about 10% **more** than was required to fully fund the "Schedule A" contract. Year two we were promised about a 5% surplus. We were warned that we should save this money because year three a new CDF employee contract would be in effect and nobody could estimate what would happen to the contract costs.

**RESOLUTION OF THE BOARD OF DIRECTORS
OF THE JULIAN CUYAMACA FIRE PROTECTION
DISTRICT REQUESTING REMOVAL FROM PHASE 1 OF
LAFCO PLANED "REORGANIZATION OF STRUCTURAL FIRE
PROTECTION AND EMERGENCY MEDICAL SERVICES IN
UNINCORPORATED SAN DIEGO COUNTY".**

RESOLUTION: 2007 – 1

ON MOTION of Director Seifert, seconded by Director Bragdon, the following resolution is adopted:

WHEREAS, Julian Cuyamaca Fire Protection District (JCFPD) provides fire and medical services and maintains a largely volunteer staff; and

WHEREAS, JCFPD was formed on March 14th, 1983, by the Local Agency Formation Commission and has diligently served the communities of Julian, Cuyamaca, and the surrounding unincorporated areas adjacent to District boundaries; and

WHEREAS, JCFPD was instrumental in acquiring Advanced Life Support for the Julian Service Area of the unincorporated portion of the county and has provided said ALS transport service since July, 2000; and

WHEREAS, JCFPD is supported by the communities it serves evidenced by the approval (by 73.5%) of an additional benefit fee for the construction of a new Julian Fire Station - District Office; and

WHEREAS, JCFPD is currently rated as 5/8 by the ISO which is a superior rating than the 7 rating being sought by the County via this reorganization; and

WHEREAS, the County of San Diego is proposing a change in the structure and governance of fire and emergency medical services in the unincorporated San Diego County; and

WHEREAS, the County of San Diego Board of Supervisors directed LAFCO to study the Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County; and

WHEREAS, the County of San Diego Board of Supervisors directed the Department of Planning and Land Use to create a Conceptual Reorganization of San Diego County Fire Services

IT IS HEREBY FOUND THAT:

- a) The Julian Cuyamaca Fire Protection District is relatively well funded, well trained and well managed. It does not, because of its use of volunteers, fall into the classification of "...un-served and underserved areas of unincorporated San Diego County..." as delineated on page 1 of the LAFCO Micro Report dated January 31, 2007.
- b) JCFPD residents support the guiding principle behind the LAFCO Micro Report, which is the improvement of fire and emergency medical services by improving command and control, communications, pooling equipment purchases and standardizing training and emergency operations. The JCFPD embraces these goals and is an active participant within Zone Eight and fully co-operate with CDF Training Division to attain these goals.
- c) JCFPD believes the aforementioned goals *could be attained* via a Joint Powers Agreement with involvement by the County but with each entity remaining sovereign within the JPA..

NOW, THEREFORE, THE BOARD OF DIRECTORS HEREBY RESOLVE THAT:

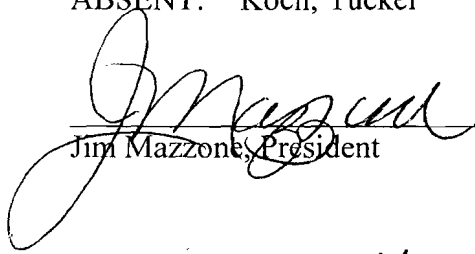

- 1) The Julian Cuyamaca Fire Protection District Board of Directors request that JCFPD and the EMS Julian Service Area (advanced life support ambulance), be removed from Phase I and be placed in Phase II of the LAFCO Micro Report.
- 2) JCFPD Board of Directors also request that all existing funding and future revenue recommended by the LAFCO Micro report for JCFPD and the EMS Julian Service Area be turned over to JCFPD until such time as Phase II is implemented.
- 3) The JCFPD Board of Directors further requests to be removed from any and all actions of DPLU's Conceptual Reorganization of San Diego County Fire Services. This plan is viewed by the JCFPD Board as the least likely to succeed due in large part to the severe under funding from the very conception.

Passed and Adopted by the Julian Cuyamaca Fire Protection District Board on this 5th day of March, 2007, by the following roll call vote:

AYES: Seifert; Braggdon; Mazzone

NOES: None

ABSENT: Koch; Tucker

Jim Mazzone, President

Harry Seifert, Vice President

Kevin C. Dubler, Chief

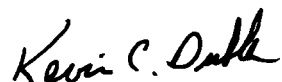

Instead of having 10% surplus, we in fact were in deficit spending in year one of a three year contract. This was apparently due to an honest mistake by Chief Black of CDF. He made a mistake, reporting to Ken and Ralph, a figure of \$1,014,000. To his credit, when the error was questioned by JCFPD he indicated that he was willing to work on that figure for year one, but not years two and three.

So my district's dilemma was this: a. take the offer and subsidize year two to the tune of \$65,000 to \$75,000 (remember year two was projected by Ken and Ralph to cost a minimum of 5% more than year one which was already in the red \$12,000); or b. turn down the offer and be accused of any number of mental shortcomings. Being as I am accused of such shortfalls anyway, we took the latter option.

So to succinctly clarify our position, we turned down this offer for the reasons stated in our letter to the Board of Supervisors as well as our financial inability to accept another County contract that we must subsidize (our current ALS ambulance contract being the first one we subsidize).

I hope this does in fact clarify our position, if not call me at the office or my cell phone (760) 519-2885.

Sincerely,

A handwritten signature in black ink that reads "Kevin C. Dubler". The signature is written in a cursive, slightly slanted style.

San Diego, CA 92101

SUBJECT: Inclusion of the Julian Cuyamaca Fire Protection District into the San Diego Fire Consolidation Plan Phase I

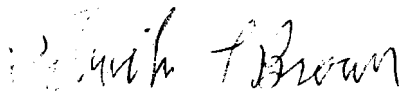

DISCUSSION: The Julian Cuyamaca Fire Protection District is well managed and has good community support. This was demonstrated by the tax measure for a new fire station which was passed by 74%. The said fire district has a good reputation in and out of the Julian community.

If the district were to change to a paid and reserve system we would lose our volunteer support. Pine Valley and Valley Center are examples of that happening.

The Julian Cuyamaca Fire District does extensive training itself and with the California Department of Forestry.

CONCLUSION: Considering the above facts, we strongly recommend LACCO exclude Julian Cuyamaca Fire Protection District from The Phase I San Diego County Fire Consolidation Plan.

Sincerely,

Patrick L. Brown

Subject: Proposed Reorganization of Structural Fire and Emergency Medical Services in Unincorporated San Diego County.

I urge that the Julian-Cuyamaca Fire Protection District be deleted from the Phase I proposed program.

My background: I have been involved in various iterations of backcountry fire and emergency medical services for over 30 years. This includes stints on the Watershed Fire Council of Southern California., the State Board of Forestry (twice), the Julian Volunteer Fire Company, and as a founding volunteer and Board member of the Julian-Cuyamaca Fire Protection District.

After reading the Micro Report Summary and much of the Micro Report I believe that the Julian-Cuyamaca Fire Protection District (JCFPD) currently provides a level of service equal to (and likely superior to) that proposed in model 5a, and at far less cost.

My observations have been that attempts to meld paid personnel and volunteers in a single organization generally lead to the volunteers losing interest and leaving (check Valley Center fire, and even the Julian Library where stresses have been evident). The JCFPD firefighters have been unpaid volunteers since 1983 (as was the Julian Volunteer Fire Company before). Most of these volunteers are local residents, and have a vital long term interest in their neighbors and the community. I believe that the loss of volunteers over time would lead to rapidly rising costs not estimated in the economic analysis of 5a.

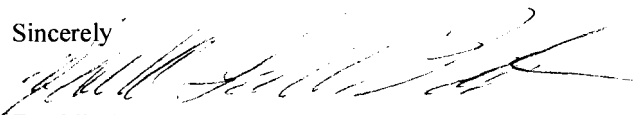

The people of the Julian area have twice voted tax increases for the JCFPD, the most recent being in Nov. 2006 to fund a new station. It is evident that the people of the JCFPD district are willing to fund the District and are pleased with the quality of service the District provides.

While all agencies (and individuals) would always like more money, the JCFPD in my opinion is not underfunded , and the residents are not underserved. The personnel are well trained , well led, have good communication and vehicle equipment, and frequently train with other agencies. I would urge you not to tinker with the operation or funding of this well run District and to omit JCFPD from the phase I proposal.

Finally it needs to be pointed out that in large measure the impetus for this reorganization was a result of the Cedar fire. Fires of this magnitude need three things: lots of fuel, "fire weather" and an ignition source. We can't control the weather, we can reduce but not eliminate ignition sources, so the only thing that is left is reducing fuel. For a variety of reasons public land management agencies (BLM, State Parks, USFS, County Parks, JPA etc) have failed to manage fuel accumulations in their respective jurisdictions. Far more damage both structurally and environmentally was done in this one fire than can ever be prevented under any of the 12 reorganization proposals. I believe much of the money proposed to be spent on phase I should be directed toward fuel management instead.

In closing I urge you to delete JCFPD from Phase I. I would be happy to discuss this issue with you in more detail.

Sincerely

Franklin L. "Woody" Barnes Jr. P.O. Box 1570, Julian ,CA 92036 (760) 765 0516

To LAFCO,

Please consider this letter of recommendation in the matter of the creation of a consolidated fire protection district for the County of San Diego. I recently attended a meeting in Julian, presented by the Julian-Cuyamaca Fire District, which featured presentations by LAFCO, the County of San Diego and the Fire District. The meeting addressed the plans to create a consolidated fire district for the County of San Diego. The result of that meeting left me no doubt that the Julian/Cuyamaca Fire District did not want to be a part of the consolidation plans. There were several compelling reasons given by the Fire District for their position. Those positions are already documented by you. There are some good reasons for being a part of the consolidation plan and Chief Dubler was very fair to point these out. However, despite the fact that better funding would always be desirable, nothing said at the meeting indicated that the County of San Diego could fund the project let alone manage it responsibly. The Julian-Cuyamaca Fire District is a well managed district. It has an outstanding reputation within and outside of the community. I left the meeting with this conviction: If it's not broken, why fix it? It is easy to understand the position of the District. In my opinion it is also the position of a majority of the residents of the District. I believe that a majority of the residents also feel a great deal of mistrust toward the County of San Diego. This mistrust is often the topic of conversation of anyone who has had to deal with the DPLU. Trust toward authority is an integral part of any community, but it is the backbone of a small town like Julian. I am the fourth generation of my family to live in Julian. Until I reached high school, there was no ambulance in Julian and there was only one highway patrolman and one sheriff. CDF was the only fire protection available. Residents of that time relied on one another as much as the professionals for help. In the beginning, the Volunteer Fire Department was the brunt of many jokes, some of which were deserved. Over the years, the Julian/Cuyamaca has transformed itself into a professional organization. They have earned the trust of the community. I myself recently was struck with a life threatening illness. I can't say for sure that their professional service saved my life, but I can say for sure, that when you are in a tough spot like that, having people you know and trust helping you is as important as getting a good doctor. Imagine the pressure they face saving people they know. So trust is the key word here. We the residents have no way of knowing that our standard of service (I am not talking about the number of personnel and equipment here) will be maintained by this new agency. The District and the residents have no way of knowing if this new agency will be viable. As with any startup business, there will be problems to work out. We have a well managed and professional District already in place and can see no good reason the jeopardize it for an unknown commodity. The District can always join the consolidated district if it proves its worth. Please allow the Julian-Cuyamaca Fire District to opt out of Phase One of the plan.

In regards to the meetings held at Julian Town Hall. Last night for Lafco and today by Deane Jacobs we wish to express our opinion.

We are very happy with the performance of our fire dept. We have reported smoke two times and were very pleased with the quick response from our fire dept. Also our neighbors had a friend who needed ambulance service to their home and it was a very quick response. We would like it to remain as it is. We appreciate our fire dept.

Also we would like to express our opinion on Deane Jacobs, she hold a very informative meeting this morning. We appreciate her efforts to be factual and informative.

Sincerely

RE: Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County

We have read both the LAFCO report and the Conceptual Reorganization of San Diego County Fire Services by the County Department of Planning and Land Use. We oppose the plans cited in both reports.

We do not support reorganization of fire service in the unincorporated area without a knowledgeable vote of the people effected. Proposition C, often cited as support for these plans, was a knee-jerk reaction to a catastrophic event, without any knowledge on the part of the voters of what such a comprehensive plan might entail. Further, the ability to assess fees by some governing agencies, to make up unfunded costs, is not what the voters understood when they were told that there would be no additional cost.

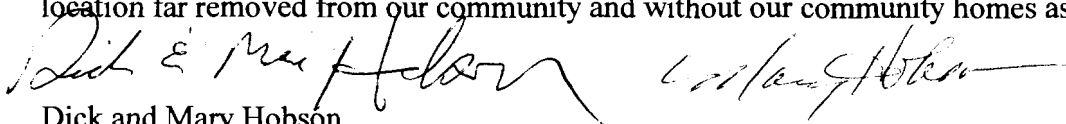

We do not support any plan that does not have guaranteed multi-year sustainable funding.

We do not support any plan that carries over \$14 million in overhead costs.

We do not support dissolution of the very effective Julian Fire Protection District, with it's Fire Chief, round the clock ALS service and 35 volunteer firefighters, without an informed vote of District residents.

While we much appreciate the local benefits of the County's Fire Enhancement Program and Fire Safety and Fuels Reduction Program, we do not support any comprehensive fire district governed by the ever changing County Board of Supervisors, only one of whom has an interest in the Julian area. We do not support establishing an expensive new County bureaucracy, resulting in a second layer of overhead costs. Nor do we support a program governed by the County Department of Planning and Land Use.

While we admire and support the activities of individual CDF firefighters, we do not support a comprehensive program under the direction of CDF, with firefighting decisions made at a location far removed from our community and without our community homes as a priority.

Dick and Mary Hobson
cc Office of Supervisor Jacob.

**NO THANKS TO PHASE I FOR CONSOLIDATING THE EXISTING
STRUCTURAL FIRE PROTECTION AND EMERGENCY MEDICAL
SERVICES FOR ALL OF THE UNINCORPORATED AREAS OF SAN DIEGO
COUNTY.**

My husband and I bought a home in Julian nearly four years ago. We love the small-town community and the bond between the people who live in Julian, whether we know each other or not. There are few places like Julian left.

Are you aware that 7 out of 10 firefighters in the United States are volunteers? What would have been the impact on Volcan Mountain last year had the volunteers not been first on scene to lay out 1700 feet of hose and cut a line in the fire to direct it way from town? The volunteer firefighters are an integral part in the lives of all Julian residents.

I would request that the Julian-Cuyamaca Fire Protection District (JCFPD) be removed from Phase I of the consolidation plan for these reasons:

- (1) JCFPD is adequately funded and can continue to provide service to the community. Chief Dubler is very savvy in the use of grants and other programs whereby his department benefits from the grant programs and our volunteers have everything they need to protect our area.
- (2) The negative impact on the volunteers who dedicate their LIVES and service to THEIR community. Consider, for example, the weekly motorcycle crashes in the backcountry. It takes more than three people to control the scene of a motorcycle accident. Without the volunteers I feel there would be a greater risk to all who pass over our roads.
- (3) With our full-time staff of medics (and unselfish volunteers) we are already providing Advanced Life Support for one of the largest service areas in the county. Consider, again, the impact of not having the volunteers. They are there loading up the casualties onto Mercy Air. What would the scene be like if they weren't there?

RECEIVED

APR - 6 2007

SAN DIEGO LAFCO

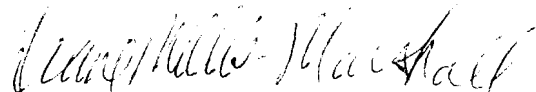

- (4) JCFPD's current ISO rating is lower than the rating being sought through reorganization. Wouldn't a lower rating be better for everyone? Wouldn't a higher standard of quality be better for everyone?
- (5) The possible negative financial impacts of reorganization of the current benefit fees being assessed the Julian-Cuyamaca residents. Life is hard enough and expensive enough in these times. It is incomprehensible to charge higher fees for reduced services.

I also want to know how consolidating the numerous small under funded districts into one large under funded organization (a proposal based on a \$22 million shortfall) is going to provide better service, or even maintain service at current levels.

("San Diego's Local Agency Formation Commission consists of eight commissioners from five different membership categories: two commissioners are members of the County Board of Supervisors; one commissioner is from the San Diego City Council; two commissioners are city council members from the 17 other incorporated cities; two commissioners are directors from independent special districts; and one commissioner represents the public. In addition, there are five alternates to the regular members -- one for each membership category." Quoted from the LAFCO website.) The people comprising the membership of the Commission are not locals. Please don't bring the city to the Julian backcountry. We have chosen to move away from the city.

Don't go and fix something that isn't broken, and by "fixing it", you break it. There is no logic in that. Politicians' (and politicians comprise the Commission) motives are usually self-serving disguised as a benefit for the community and I do not believe or trust that what is being proposed by the LAFCO consolidation will benefit the wonderful people who call the Julian backcountry home.

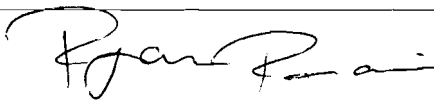

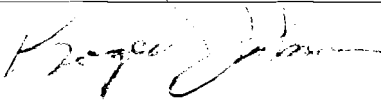

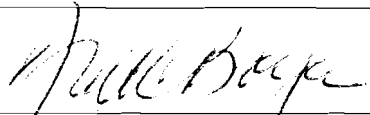

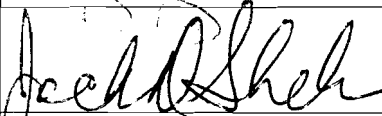

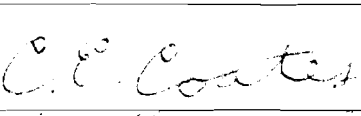

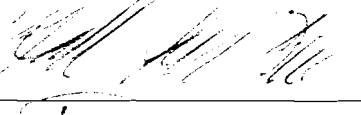

Regards,

Diane Millis-Marshall

WE THE UNDERSIGNED, AS RESIDENTS OF THE JULIAN CUYAMACA FIRE PROTECTION DISTRICT (JCFPD), DO HEREBY REQUEST THAT THE SAN DIEGO LOCAL AGENCY FORMATION COMMITTEE (LAFCO) ACCEPT THE POSITION OF THE BOARD OF DIRECTORS OF JCFPD AS STATED IN RESOLUTION 2007 - 1. IN ESSENCE WE ARE REQUESTING THAT JCFPD BE REMOVED FROM PHASE I OF ANY LAFCO PLAN TO REORGANIZE FIRE DISTRICTS AND THAT JCFPD BE PLACED INTO PHASE 2 OF SAID LAFCO PLAN.

To Whom It May Concern:

We are writing in order to provide our opinion of the current plan for the "Reorganization of Structural Fire Protection and EMS." As Julian residents, we are deeply concerned that our current level of protection and care will be compromised by the suggested reorganization. We are very happy with our current system and want our opinion to be noted. We do NOT support the reorganization. We wish to

Subject: Reorganization of Structural Fire Protection in Unincorporated San Diego County

Dear Mr. Ott,

On behalf of the Firefighters who serve at Station 84 in Pine Valley thank you for the opportunity to submit comments on the subject LAFCO Micro Report. We commend the LAFCO Micro Report. We find it to be a document that affords everyone the opportunity to understand the breadth and scope of the matters at hand. Of the four options for regional governance proposed in the Micro Report, we recommend:

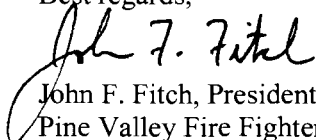

Option 1: Regional Fire Protection District.

We put forth the following points for your consideration:

- Securing additional sustainable revenue, from existing sources is required.
- Build on what is already in place:
 - Do not dismantle existing programs and replace them with a patchwork of sole source CDF contracts. It is counterproductive with respect to the existing available revenues.
 - Distribute discretionary revenue equitably across all areas.
 - Relatively small amounts of money go a long way when using local resources.
 - Use step increases in compensation for longevity.
- Use Combination Stations as a model.
 - Utilize fulltime and part-time resources to fill three platoon-staffing levels.
 - Provide academy training for reserves and volunteers.
- Maintain Emergency Medical Dispatch as the 911-service standard.

In the complex landscape of multi-agency responsibilities for Wildland Fire and Structural Fire protection, as well as Emergency Medical Services, there are no black and white answers. Much work lies ahead and we encourage you to step forward to lead all parties in making incremental improvements together.

Best regards,

John F. Fitch, President
Pine Valley Fire Fighters Association

RE: Micro Report Comments

Dear Sir or Madam:

The Board of Directors of the Valley Center Fire Protection District (the "Board") hereby respectfully submits its comments on LAFCO's Micro Report on the "Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County (the "Micro Report").

A Special Meeting of the Board was held on March 29, 2007 for the main purpose of formulating its comments regarding the Micro Report and to incorporate into its comments input received from the citizenry of the Valley Center Fire Protection District (the "District").

This letter presents the results of that process.

The Board is firmly of the opinion that the Micro Report does not provide adequate provision for attainment of the established standards for implementing a regional fire agency. These standards are: that "... no area would experience a reduction in service ..." and that "...funding to support regional fire protection services should come from reprioritized use of existing revenue." (Page 2 of Micro Report).

REDUCTION IN SERVICE CONCERNS

The District currently adheres to a "Four on-duty at Basic Life Support" standard of operation. In addition, the District provides Advanced Life Support Ambulance Services to the District pursuant to an agreement with the County of San Diego Health and Human Service Agency and a related agreement with Mercy Medical Transport, Inc. It is clear from the estimated cost of providing equivalent service that, as projected in Model 7a of the Micro Report, it is extremely unlikely that the current level of service would be maintained since funding to support service at that level is not reasonably expected to be attainable. In fact, the District would experience a reduction in service under any of the lesser Service Models proposed in the Micro Report.

Fire Station #72
28234 Lilac Road
Valley Center, CA 92082

Fire Station #73
28205 N. Lake Wohlford Road
Valley Center, CA 92082

There is no mechanism set forth in the Micro Report that would adjust its 'one size fits all' approach from Model 5a, which is apparently the chosen approach for a service model, to preclude the reduction in service which the District would suffer under the proposed reorganization. Furthermore, the estimated costs for Model 5a do not include provision for any cost adjustments in that service model which may be required to preclude a reduction in service in this District and elsewhere.

Therefore, the standard prohibiting a reduction in service for this area would not be met.

LACK OF SUSTAINABLE REVENUE CONCERNS

The Board also respectfully submits that it has very serious concerns whether the proposed Reorganization will be able to satisfy the second standard regarding the infusion of sustainable revenue in order to support implementation of the Reorganization.

It is not financially responsible to include funds now provided through the County of San Diego's County Fire Enhancement Program as a potential source of secured sustainable revenue.

It is very doubtful at best that California Assembly Bill 806 will become law. The super majority vote required for its passage by each house of the Legislature, when considered alone, makes its passage unlikely. The necessity of a super majority vote, when considered with the added political pressures anticipated from the County and state-wide educational lobbies, makes its passage even more doubtful.

Much is made in the Micro Report of the contribution and value of volunteer operations to the success of the Reorganization. There is currently a significant shortfall of sustainable revenue available to support the Reorganization under even its most modest levels of service. This situation places a significant premium on the necessity to incorporate continual volunteer services at levels sufficient to preclude experiencing a reduction in service in the region or its areas. Strangely, the Micro Report does not address the important issue of volunteer services. No provision is made for the recruitment, training or retention of volunteers. No cost estimates are made for this endeavor. There are a number of existing volunteers and volunteer agencies who have expressed their concerns about their evident lack of place, function and consideration in the Reorganization. It is unwise to bank on volunteer services to ameliorate the attainment of sustainable revenue funding when no plan is specified for volunteer operations and for funding the related expenses.

The District does not have any volunteer firefighters or emergency medical technicians. Model 5a would have the District partially manned on a 24/7 basis by a volunteer component. The Micro Report does not satisfactorily address the lack of currently available and fully trained volunteers. The Micro Report does not address the costs of backfilling the lack of volunteers with paid personnel. The annual cost of paid replacements would range from \$67,000 to \$97,000.

The Board submits that the Micro Report entirely fails to address the impact on the Reorganization of the necessity to satisfy the requirements of recently adopted Governmental Accounting Standards Board Statement 45 ("GASB 45"). GASB 45 requires a public employer to both calculate and report how much it owes for health care costs and other post-retirement benefits for its present and future retirees and how it will pay for these benefits.

The omission of the substantial GASB 45 costs in the estimated annual costs of the Reorganization is a significant contributing factor to the Board's concerns over the lack of available sustainable revenue to support implementation of the Reorganization. Since ..." the underlying goal of the micro report is to determine what amount of additional revenue would be required in order to fund Phase I...", (Page 36 of Micro Report), the omission of provision for compliance with GASB 45 is very troublesome to the Board.

The Micro Report does not address the Board's concerns that the District's voter-approved special assessment revenues would both, in fact and in all instances, be applied for the benefit of the District without direct or indirect diminution or diversion. It is all too easy to manipulate the exclusivity of special assessment revenue flow to the District by offsetting charges applied against this revenue which are not solely authorized by appropriate representatives of the special assessment district. As an additional concern, the Micro Report does not provide a mechanism to determine who will act in the Reorganization solely on behalf of the voters approving special assessment revenues in determining the most prudent application of those revenues within the District.

GOVERNANCE CONCERNS

The Board strenuously objects to the prospect of the loss of the District's governance over its own fire protection and emergency medical service matters without any improvement in such service as a consequence of the proposed Reorganization.

SUMMATION

It is obvious to the Board that much work and thought by many devoted people was involved in the proposed Reorganization. The Board, however, holds firmly to the belief that the proposed Reorganization is not in the best interests of the District and consequentially, the Board will not support implementation of the proposed Reorganization.

Sincerely,

The Valley Center Fire Protection District Board of Directors

By: 
Mel Schuler

ELFIN FOREST/HARMONY GROVE FIRE DEPARTMENT INC.
C.S.A. 107
20223 Elfin Forest Road
Elfin Forest, California 92029

Wednesday February 28, 2007

RECEIVED

MAR 01 2007

RESOLUTION: 2007 1.1.07

SAN DIEGO LAFCO

ON MOTION of Director Ken Dubs, seconded by Director Byron Macfarlane, the following resolution is adopted:

WHEREAS, County Service Area 107 – Elfin Forest, is a County Service Area, provides fire and medical services and maintains a largely volunteer staff;

WHEREAS, the County of San Diego is proposing a change in the structure and governance of fire and emergency medical services in the unincorporated San Diego County; and

WHEREAS, the County of San Diego Board of Supervisors directed LAFCO to study the Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County; and

WHEREAS, the County of San Diego Board of Supervisors directed the Department of Planning and Land Use to create a Conceptual Reorganization of San Diego County Fire Services.

IT IS HEREBY FOUND THAT:

- a) The Elfin Forest/Harmony Grove Fire Advisory Board supports the findings of the Micro Report that states on page 48 of that report that, “CSA 107 (Elfin Forest/Harmony Grove) is geographically isolated from other territory that would be consolidated within Phase 1.” The board further supports the finding on the same page that states; “The Districts remoteness could possibly produce service and coordination issues with a Phase I regional agency...”
- b) In 2004, the North Zone fire agencies retained Emergency Services Consulting Inc. to develop what became the North Zone Fire Effectiveness and Regionalization Study. The study released in March of 2006 recommended the consolidation of the Fire Departments of Solana Beach and Del Mar. The report also recommended the consolidation of Rancho Santa Fe Fire Protection District and CSA 107 Elfin Forest.
- c) For the last two years the Elfin Forest/Harmony Grove Fire Department has been developing a mechanism with the Rancho Santa Fe Fire Protection District (FPD), the Cities of Del Mar and Solana Beach, for CSA 107 to become a part of the Rancho Santa Fe Fire District or a member of a potential Joint Powers Authority.

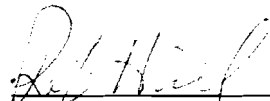

- d) The area of CSA 107, Rancho Santa Fe FPD, and the cities of Solana Beach and Del Mar is approximately 60 square miles. This 60 square mile area is an island surrounded by cities and has no common border with other unincorporated Phase I volunteer departments, CSA's and districts. The demographics of the areas are similar in that they share for the most part common schools and boundaries, and have both areas of rural estate and higher density housing.
- e) The 2020 plan clearly shows a preference for higher density in areas west of I-15. CSA 107 is experiencing continued growth and is becoming more urban than the other Phase 1 areas. For example the Elfin Forest/Harmony Grove Fire Department is working with developers who are in process of developing one hundred and fifty, two hundred and fifty, and seven hundred and fifty home developments in CSA107. Our town council was recently presented a proposed additional development, called University Heights, which could add as many as 1200 addition homes. These new residents will expect the same levels of advanced life support services (ALS) provided by paramedics and ALS transport services in this area, which are not part of the County Conceptual Reorganization of Fire Services Plan for CSA 107. The department is also in negotiations for a second station in the Harmony Grove area, which will have paid paramedic firefighters and Emergency Medical Technicians volunteers.
- f) North Comm, the EMD dispatch JPA center for most of the north Zone Fire Agencies, dispatches the department. The Elfin Forest/Harmony Grove Fire Department has adopted the North Zone Training and Emergency Operations Manual and participates in North Zone joint training exercises. It makes little sense to have the department dispatched by another agency, which would add a delayed response when giving or receiving automatic aid.
- g) The Elfin Forest/Harmony Grove Fire Department participates in joint projects such as the North Zone video conferencing system for training and is an active participant in the Zone mapping and MDC's, (Mobile Data Computer System), project which will add common mapping and data to computer terminals in the North Zone engines which will allow the identification of the closest engine to an incident.
- h) The North Zone Agencies have automatic aid with each other, share the Rancho Santa Fe training tower, and have a number of common personal protective equipment and minor equipment purchase specification agreements.
- i) Elfin Forest and Harmony Grove residents support the guiding principle behind the LAFCO Micro Report and the County Conceptual Plan that is the improvement of fire and emergency medical services by improving command and control, communications, pooling equipment purchases and standardizing training and emergency operations. The Elfin Forest/Harmony Grove Fire Department embraces these goals and is an active participant within the North Zone to attain these goals.
- j) It only makes sense that CSA 107 (Elfin Forest/ Harmony Grove), be moved to Phase II and all existing funds and future revenue recommended by the LAFCO Micro Report continue to be used to provide the superior service demanded by the Elfin Forest and Harmony Grove residents.

IT IS HEREBY RESOLVED THAT:

- 1) The Elfin Forest/Harmony Grove Fire Advisory Board directors, request that County Service Area, CSA 107 (Elfin Forest/Harmony Grove) as well as all existing funding and future revenue recommended by the LAFCO Micro report for CSA 107, be removed from Phase I and be placed in Phase II of the LAFCO Micro Report.
- 2) The Elfin Forest/Harmony Grove Fire Advisory Board Directors, request that County Service Area, CSA 107- Elfin Forest, as well as all existing funding and future revenue, remain with CSA 107- Elfin Forest and CSA 107- Elfin Forest be removed from any and all actions of DPLU's Conceptual Reorganization of San Diego County Fire Services.

Passed and Adopted by the County Service Area 107 – Elfin Forest, Fire Advisory Board and the Elfin Forest / Harmony Grove Fire Department Inc. Board of Directors on this day of February 28, 2007, by the following vote:

AYES: 7

Re: LAFCO Micro Report for CSA 107

Gentlemen,

I'm writing to request that LAFCO and the County Board of Supervisors remove Elfin Forest CSA 107 from Phase 1 of the proposed Fire Services Reorganization plan. I attended 2 of the public info sessions held at Ramona and San Diego. First I want to thank and express my appreciation to Michael Ott for the excellent, fair minded approach he had towards the public who participated in these sessions.

Considering all the factors which were brought out in the hearings I would like to share 3 main reasons why I believe CSA 107 should be excluded from Phase 1:

- **Local Control** – CSA 107 already has it's own tax benefit fee with demonstrated effective local leadership. We already have effective regional communications and training cooperation, and a developed volunteer program that's working well. The proposed CDF plan would have CDF leadership in Valley Center which is at least 30 minutes from Elfin Forest, a much longer time than we have now.
- **Ambulance Service** – We already have ambulance service in Elfin Forest / Harmony Grove which is supported by benefit fees from CSA 17. There is no need to include us in Phase 1 since ambulance service is already being provided in this area.
- **ISO Ratings** – Our ISO ratings have already been improved by our Dept to a point where 79% of CSA 107 has a rating of 4. This already exceeds what the proposal is suggesting, so we don't need to be included for that reason.

Sincerely,

Robert McGurk

Re: Reorganization of Structural Fire Protection and Emergency Medical Services in
Unincorporated San Diego County

It is apparent that sustainable funding is insufficient for both a Regional Fire Protection District and for the County Plan. For this reason, it is unrealistic for LAFCO to approve either option. I urge LAFCO to recommend the Status Quo, until such a time as funding can be secured, and I urge the County to use their \$8.5 million in a different fashion. I already see too many problems with the County Plan as it stands. When one department turns down \$1,000,000, there is a problem. When another community is circulating a petition to have their fire department cancel their contract with CDF, there is a problem. When volunteer firefighters are leaving as CDF steps in, there is a big problem.

I would like to see the county spend it's money on a unified communications system. My understanding is that this was the biggest source of difficulty during the Cedar fire. A unified communication system would be a huge step toward consolidating operations. Then, should any money remain, I would like to see the county approach individual fire departments and ask how they could help. Each department is unique and has unique needs. Filling in the gaps would have to be far more cost effective than trying to force a "one size fits all" plan. In this way, the county would be building on what is working, rather than tearing things apart.

The power of Judo is not in resisting, but rather in taking advantage of the flow of energy. I urge the county not to try to change the direction of volunteer fire departments. This is resistance. Rather, I urge the county to lend a helping hand to build on the many strengths of the volunteer fire departments. The momentum is already there. Take advantage of it. Support the spirit of volunteerism and the resulting building of community. These people are willing to protect their communities at no cost. They do need help in terms of equipment, facilities, etc., but they ask for nothing in terms of labor. Theirs is a labor of love. How can the county possibly think of destroying that? Please listen to them and please support them. It can only result in gain.

SAN DIEGO LAFCO

Re: Department of Planning and Land Use

Dear County Board of Supervisors,

After attending all three of LAFCO's Public Hearings on the "Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County", I am left with the uneasy feeling that the County Board of Supervisors has created a monster in the form of the Department of Planning and Land Use. I would like to think it was done unwitting and I would like to think that it was done with the best of intentions, but the current situation is very disturbing.

During the 05/06 fiscal year, the County Board of Supervisors gave the Department of Planning and Land Use \$8.5 million to be used toward fire protection. This was an admirable use of discretionary funds, but the DPLU's use of those funds began to raise eyebrows almost at once. They started by offering volunteer fire departments approximately \$20,000 each. This seemed a pittance given what they had to work with, but worse were the strings that came attached to their offer. One such string - use the funds on equipment and the equipment becomes ours. (Replace a fan belt in your fire truck and the fire truck becomes ours.) What kind of an offer is that?! In hind sight, it seems their first step in building an empire.

Come the 06/07 fiscal year, the County Board of Supervisors again provides DPLU with another \$8.5 million. Now the monster starts to take on a life of its own. In fact, \$8.5 million is no longer enough to satiate its appetite. Now the DPLU starts stealing fire mitigation fees. Four years ago, with the county's approval, Elfin Forest negotiated for funds above the standard mitigation fees from the Cielo del Norte development project. Then, in January of 2007, the DPLU took those funds away from Elfin Forest and claimed them as theirs. Now alarm bells really start to sound. How is any community supposed to offset the impact, of projects approved by the DPLU, when the mitigation fees are also in the hands of the DPLU? At the April town council meeting in Elfin Forest, DPLU assured the community that mitigation fees, by law, had to be used in the area of impact. However, if you read their Conceptual Plan, they propose pooling mitigation fees for use at their discretion. This monster is not to be trusted.

Worst of all, at LAFCO's public hearing in San Diego, I hear that the director of the Department of Planning and Land Use has been recorded on video as saying that developers are the clients of the DPLU and that the silver bullet of fire safety will not be allowed to stop any development! Now this is truly alarming! Fire safety takes a back seat to developers wishes?! Is it any wonder that this model of joining fire protection with the Department of Planning and Land Use is found no where else in the state? It is clearly a case of the fox guarding the hen house, and this fox has made its intentions very clear.

I feel you **MUST** put an end to this **NOW!** To do nothing implies complicity. If the county feels that it must be in the fire protection business, something Dianne Jacob once said was inadvisable, then the fire service should at the very least fall under the Office of Emergency Services. Better still, an independent agency, like that proposed in LAFCO's micro study, would leave no room for accusations of the county being a party to corruption. This

proposed board, which would consist of 11 members elected from the various fire service areas in the county, would leave people feeling that they are being represented by fire professionals, not county personnel, that understand the needs of their area. In the same way that you feel you know better than the State of California the needs of San Diego County, communities feel they know better than the county the needs of their community.

Reassure me that you acted with good intentions and that this monster was created unwittingly. Do not leave yourself open to cries of corruption. Restore my faith in government and right this situation NOW.

Sincerely,

Gail Twolky

February 28, 2007

Dear San Diego County Board of Supervisors,

I attended LAFCO's public workshop regarding the "Reorganization of Structural Fire Protection and Emergency Services in Unincorporated San Diego County" in Pine Valley on February 27, 2007. I was struck by a couple of reoccurring themes.

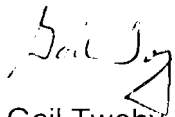

First, I heard that as CDF is stepping into volunteer fire departments, volunteer firefighters are leaving. Even if you do not appreciate the resulting, devastating loss of community spirit and activism, you can surely appreciate that this drives up the costs of fire protection. The studies show and common sense dictates that it is cheaper to run a station with a combination of volunteer and paid firefighters than it is to run a station of strictly paid firefighters. For financial reasons alone, you have a responsibility to question the effectiveness of the County Fire Plan.

Second, I heard several communities express concern over a loss of level of service. The communities expressing concern have ISO ratings lower than the 7 that is being sought in the County Plan. Does the County Plan have the same standards as the SSP? I'm referring to page 2 of the Micro Report which says, "The SSP established standards for reorganization - including a requisite that no area would experience *reductions* in service as a consequence of consolidation...". If not, the County Plan is unacceptable for that reason alone. Besides being counterproductive, Proposition C stated that a consolidation plan would not come at an increased cost to taxpayers, and a lower ISO rating translates to higher insurance costs.

I would appreciate a response to these concerns. I understand your desire for action regarding fire protection, but an ill conceived plan developed in haste can come back to haunt you. I urge you to respect and consider the findings of the Micro Study. It has been carefully considered, for over two years, by fire professionals from all of the varied fire districts with their many varied needs. As well meaning as your plan may be, it is the plan of outsiders looking in. I place much more trust in the professionals to sort it out.

Finally, I was also struck by the sincerity and professionalism of LAFCO representatives Mike Ott, John Traylor and Shirley Anderson. Please acknowledge their good work!

Sincerely,

Gail Twohy

Re: Reorganization of Structural Fire Protection and Emergency Medical Services in
Unincorporated San Diego County

The Conceptual Reorganization of the San Diego County Fire Services prepared by the Department of Planning and Land Use calls for the use of fire mitigation fees to help fund the plan. Elfin Forest has recently had fire mitigation fees confiscated by the Department of Planning and Land Use. My concern is how and where these fees will be used. If the County intends to use the fees in Elfin Forest, why take them away in the first place? If the County does not intend to use the money in Elfin Forest, the whole purpose of mitigation fees is defeated. It is rather like having a fire in Elfin Forest and having the County shooting water elsewhere. Fire mitigation fees should stay and be used in the area of impact and should not be used to fund a county wide plan.

The timing of the loss of those mitigation funds is also very disturbing. Those funds were negotiated four years ago. For four years, the County had no problem with those funds remaining in Elfin Forest. It was not an unusual arrangement. Rancho Santa Fe has a very nice new fire station built with mitigation fees that the Fire District negotiated for with developers. Yet suddenly, only a few weeks ago, the Department of Planning and Land Use says that Elfin Forest has overstepped its bounds. Mitigation fees are the domain of the DPLU. Since when? It would seem that the DPLU is already setting about funding a program which has not yet even been officially approved. Perhaps LAFCO should ask whether the County has already made up its mind. Just what is going on behind closed doors?

The Conceptual Reorganization Plan was certainly developed behind closed doors. On the one hand, for over two years, at the behest of the County and with County funds, fire professionals have been meeting to determine the best way to consolidate services for the benefit of all. All proposals had to be submitted by a certain date, presumably so that they could be studied and critiqued. On the other hand, the Conceptual Reorganization Plan made its debut only a couple of weeks ago. Why was it allowed to be introduced at the eleventh hour? Why the secrecy? What makes the County, in its infinite wisdom, the wisdom of an outsider, think it knows better than the fire professionals what is needed?

I say the County should stop playing armchair quarterback and respect and consider the recommendations of the professionals. I do not see how LAFCO, in good conscience, can support a plan thrown together in secrecy by an agency with little or no experience in fire services. I can only support the Micro study, which was compiled by fire professionals after much collaboration and consideration.

LAFCO Micro Study
1600 Pacific Highway Room 452
San Diego, CA 92102

Bill Horn
1600 Pacific Highway Room 335
San Diego, Ca 92101

To our Board of Supervisors, LAFCO commissioners and DPLU director,

I am writing as a concerned citizen who resided in Elfin Forest for fifteen and a half years. I have become aware of the plans outlined in LAFCO's Micro Report.

I would like you to remove CSA-107 – Elfin Forest from phase 1 implementation of this report and place it into Phase 2. I would also like to request you remove CSA -107 – Elfin Forest from the DPLU's Conceptual Reorganization of San Diego County Fire Services Plan.

My family and I have a very special reason why we want these changes made and why we feel the Elfin Forest/Harmony Grove Fire Department is so valuable to this area.

We lived in Elfin Forest during the 1996 Elfin Forest/ Harmony Grove Fire. We have first hand experienced the dedication and expertise this department has. David Hammond, my late husband and father to my two children was burned in the fire and died three weeks later. This fire department and the other fire departments that came to Elfin Forest on October 21, 1996, are our hero's.

They worked around the clock to get the fire under control; they tried to get everyone out as fast and safely as they could. I just learned at the ten year event last year, at the fire station what these dedicated volunteer fire department personnel went through during that fire. They left their families, animals and homes to help others in need and to protect the community of Elfin Forest, Carlsbad and La Costa. I was humbled to listen to them describe this fire and how it has affected them all. They had this event to remind people what can happen to a community devastated by a fire, bring attention to the need of a fire safe home and community, to educate new neighbors how to prepare for a fire and protect your family and home.

The Fire Department immediately brought the community together at a pot luck, they checked on us daily and helped us rebuild our lives. They evaluated every aspect of the fire and how they could improve the response time, equipment, communications if there ever should be another fire (which in this area is a given). This fire department is well trained and a valuable part of the community.

Our best memories are the 4th of July parade/picnic, and various holiday parties. Attending many council meetings regarding our community and fire department future. A fire safe garden went up to help show the community how to plant fire wise. You can call and show up anytime and there is always someone to answer your questions.

Since 1996, the area around Elfin Forest has grown. It is hard for me to imagine how all these communities are going to leave if there is ever another 1996 fire! It frightens me. I am sure the community knowing the Elfin Forest/ Harmony Grove Fire department is there reassures them that they are well protective.

Elfin Forest is a unique area and community. The Fire Department is the center of our community. These men and women dedicate many hours to training and improving the fire department.

This fire department is not east of I-15, like the others in the report.

Please remove CSA 107 from Phase 1 implementation of LAFCO's Micro Report, and from DPLU's Conceptual Reorganization of San Diego County Fire Services Plan.

Please reassure us that all existing and future funding as well as funding recommended by the LAFCO Micro Report will continue for the Elfin Forest/ Harmony Grove Fire Department.

Sincerely,

Gail G. Hammond

March 6, 2007

To County of San Diego Supervisors, LAFCO and all others concerned with
Reorganization of San Diego County Fire Services,

I am an Elfin Forest resident homeowner in County Service Area 107, hereafter referred to as CSA 107. I am opposed to the method, study groupings and proposed plan for reorganization of County fire service. In particular CSA 107 services and its exclusive fire and mitigation funding cannot be thrown into a County general fund melting pot. Basing study on such ridiculous assumptions can only cause a major battle with Elfin Forest, while in the big picture you are wasting everyone's time by misleading other areas about availability of real and secured funding to sustain their service operations. As there is no authority to use CSA 107's special funds outside of CSA 107's boundary, this is a County -wide crisis in the making, not a reorganization solution.

The Elfin Forest/Harmony Grove community independently funds and operates our Fire Department and CSA 107. CSA 107 should be recognized as an independent special district in any fire reorganization plan the Board of Supervisors adopts. I request that the Board of Supervisors work with Elfin Forest/Harmony Grove Fire Department Inc., the Elfin Forest/Harmony Grove Fire Advisory Board and the Elfin Forest/Harmony Grove Town Council towards finalizing countywide recognition of CSA 107 as the independent special district it is. And see that CSA 107 is appropriately addressed as such in all County studies and plans for fire/ emergency services.

As for LAFCO , it is important to remove CSA 107 and its revenues from Phase 1 of the LAFCO Micro report, where we are essentially an island with no relationship to the other phase 1 service providers. Please place CSA 107 in Phase 2 with our neighbors with whom we have mutual aid agreements and work relationships with.

As for the County, it is important that CSA 107 and its funds be removed from DPLU's Conceptual Reorganization of San Diego County Fire Services Plan and I hereby request that you do so immediately. It is important that in an further plans proposed that special assessments collected in Elfin Forest/Harmony Grove community be retained in the Elfin Forest/Harmony Grove community and applied solely as a funding source for CSA 107 services. Additionally no current services in CSA 107 should be reduced by implementation of a County reorganization plan.

It is extremely important to me and the health, safety and welfare of my community that:
1) The Elfin Forest/Harmony Grove Fire Department Inc. continues to operate the Elfin Forest/Harmony Grove Fire Station and provide fire services to CSA 107. The Elfin Forest/Harmony Grove Fire Department Inc. is a non-profit corp. created by the citizens of CSA 107 to service CSA 107, which again is the boundary of the Elfin Forest/Harmony Grove community. CSA 107 itself was created by the Elfin Forest/Harmony Grove community and approved through a special initiative ballot in 1982. It would cause wide spread outrage if the County of San Diego failed to continue service contracts with The Elfin Forest/Harmony Grove Fire Department Inc. for CSA 107.

2) It is extremely important that the directors of the Elfin Forest/Harmony Grove Fire Advisory Board (who are elected by CSA 107 residents) continue to govern CSA 107 and provide input to the Board of Supervisors.

3) It is also extremely important that you are clear that the Elfin Forest/Harmony Grove Fire Advisory Board will continue to administer CSA 107 funds, special tax revenues and moneys unless the Citizens of CSA 107 vote otherwise. Not only did the Elfin Forest/Harmony Grove community vote to fund CSA 107 through a special tax of its citizens in 1982, but in 2001 CSA 107 voters approved a tax rate increase to cover the Elfin Forest/Harmony Grove Fire Department Inc.'s long term funding needs. The beneficiary, scope, purpose and jurisdiction of the special assessments in CSA 107 was made clear in both initiatives and cannot be changed by some reorganization plan or subsequent Supervisor vote.

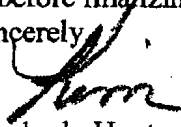

4) Likewise additional revenues and /or assets CSA 107 citizens and/or Elfin Forest organizations and non-profits achieve through fundraisers, grants, mitigation fees, developer negotiations, CFD's etc again is generated within and for the benefit of the Elfin Forest/Harmony Grove community and should be retained and administered where collected. It would be outrageously unjust for the County to allocate any Elfin Forest funds/ revenues, assets or money outside CSA 107. Again we generate CSA 107 funds and elect our Fire Board, and non-profit directors to administer them.

My community worked and funded the blessing of crews not only trained in firefighting, but in heavy rescue, swift water rescue and in advanced first aid as Emergency Medical Technicians. We do not want any changes in their governance or administration and especially do not want the County, CDF or anyone else to take over operation of CSA 107. Likewise Our Fire Auxiliary who supports and provides good spirit, food and drinks to more than just our firefighters and appreciates that CDF loves their cooking, do not want CDF or the County running our Fire Station.

In summary CSA 107 deserves special recognition and consideration by the County and LAFCO. We are a role model and exceptionally good neighbor to other County communities. We are organized beyond organized and home to numerous non-profits and committees that benefit not only our community but the County as whole. We respond to countless community service calls in and beyond our boundaries. We put in countless hours of our own blood sweat and tears voluntarily to aid the County in protecting its resources and keeping its roadsides, waterways and resources clean. We do more than our part to not only be self sufficient but to educate and help others in countless ways. We host training events and workshops. We created and host the educational fire wise garden. On and on. We are involved and show in countless way our caring for the County's health, safety and wellbeing. All we ask in return is recognition of our community's uniqueness and respect for our assets during County planning.

In closing, Please honor the incredible job the Elfin Forest/Harmony Grove Fire Advisory Board has done and honor their incredible wealth of knowledge and experience by respecting their input into reorganization planning and by granting their requests for CSA 107 before finalizing any plan.

Sincerely,

Kimberly Hunter

March 9, 2007

To our honorable LAFCO commissioners,

I am writing as a landowner and registered voter in Elfin Forest. I live within the boundaries of CSA 107 - Elfin Forest, and recently became aware of the plans outlined in LAFCO's Mirco Report.

After carefully considering the various alternatives proposed in LAFCO's Micro Report (SSP plan, county plan, CSA 135, and status quo), I strongly encourage you to remove CSA 107 - Elfin Forest from the Phase I implementation of this report and place it into Phase 2. I also request that you remove CSA 107 - Elfin Forest from the DPLU's Conceptual Reorganization of San Diego County Fire Services Plan. My reasons are listed below:

1. The Elfin Forest / Harmony Grove communities are unique in that our fire department is a key component of our community character. Most residents know Chief Twohy and our many captains by their first names. Our fire house is our community gathering place for our annual 4th of July parade, Christmas party, many fundraisers, and our monthly Town Council meetings. Volunteers have created a Fire Wise garden at the fire house for the use and enjoyment of other residents. Residents know they can call their fire personnel for information and advice on many safety topics.
2. We believe in our local fire personnel. They live here, work here, and have fought many fires here. They are the people we want making the important fire decisions for our community, and showing up at our front door when there's an emergency.
3. This entire community has a strong volunteer ethic, of which our firefighters are only a part. We have a network of volunteer block captains who are the phone tree for the fire department, disseminating information in the event of an emergency. Volunteers run so many other aspects of our community - our Town Council, our Community Foundation, our Landscape Foundation.
4. If you look at the map of fire districts that would be affected by the Micro Report, they are all contiguous and east of the I-15, except CSA-107 - Elfin Forest. We are an island (in many ways) in the middle of incorporated communities. We've fought hard to stay that way so we could maintain control of our density and zoning. And we have also built relationships with our neighboring fire departments, with whom we have more in common than we do with the expanse of unincorporated county east of the I-15. We don't belong in a district tailored for the open country east of I-15.
5. Our fire personnel and our community take responsibility for having a superior fire response capability. Years ago, our community approved an additional property tax for fire department funding; our fire department recently obtained their ISO certification. We know what needs to be done, and are willing to do it.

RECEIVED

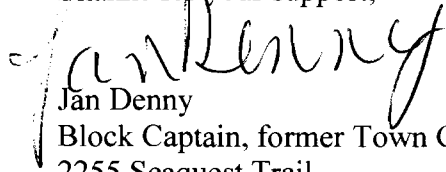

MAR 12 2007

SAN DIEGO LAFCO

For these and many other reasons, please remove CSA 107 from the Phase 1 implementation of LAFCO's Micro Report, and from DPLU's Conceptual Reorganization of San Diego County Fire Services Plan.

To ensure we remain on par with other fire districts, please also ensure that we have access to all existing funding and future revenue (mitigation fees, developer fees, CFDs), as well as the existing funds and future revenue recommended by the LAFCO Micro Report.

Thanks for your support,

A handwritten signature in black ink, appearing to read "Jan Denny". The signature is written in a cursive, flowing style with some loops and flourishes.

RE: MICRO study of Reorganization of structural fire protection and emergency services - Elfin Forest/harmony Grove.

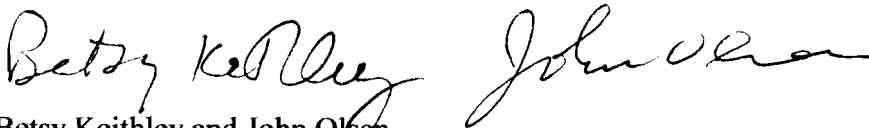

Dear Mr. Ott,

We have given a great deal of consideration to the County proposal to reorganize the county emergency service areas including attending the workshop in Ramona on March 1, 2007. While this idea falls under the recurrent struggle between central and local control, we have to say that in this situation, there is no evidence that central control will provide better service than the current local control. There is no guarantee that the level of service will even stay at the current level.

Elfin Forest/Harmony Grove is a community whose focus is the Fire Department. Many people contribute to its well being. The motivation derives from our sense of independence and the need to take care of each other. While this sounds very schmaltzy and saccharine it is valuable and true. Why, in the name of service to the County, would you want to destroy the ideal of the American lifestyle? If there were strong evidence that your plan would indeed provide better service, then we would not object, but at this point, there is no evidence that it will.

We request that the Elfin Forest/Harmony Grove Fire Department (CSA #107) be taken out of Phase 1 of the plan.

Sincerely,

Betsy Keithley and John Olsen
19918 Elfin Forest Rd.
Elfin Forest, CA 92029

cc: Bill Horn, County Supervisor
Gary Pryor, San Diego County, Department of Planning and Land Use
Nona Barker, CSA 107, Chair, Fire Advisory Board

Dear Public Officials:

I am a property owner and resident of the Elfin Forest Community. My wife and I purchased our home over four years ago upon falling in love instantly with the rural environment, as well as the intimacy of a unique community bonded by common vision of how its members wish to live their lives. Our assurance that many others like ourselves moved here for the same reasons has consistently found its moorings through the various functions and activities rooted within our local Volunteer Fire Department, which we have come to appreciate as the pillar, both in symbol and concrete form, our community.

Needless to say, given the depth of our emotional ties to our way of life and community, we are greatly concerned about the new proposals and their related agendas recently articulated in your draft version, "Micro Report on Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County." In response, rather than spelling out in an item-by-item format our concerns and issues to your proposals, for the sake of expediency, I will assume that you are quite familiar with the majority sentiment and legitimate issues spelled out by previous letters from others that will be potentially impacted by the implementation of the Micro Report.

Please understand that the Elfin Forest/Harmony Grove community is unique in the way its constituents have allied themselves to preserve our way of life. To mention one of many examples, we imposed at over an 80% approval an additional tax on ourselves to fund our civic and common expenses in order to maintain a greater degree of our own autonomy over multiple functions. Since then, we have achieved what many in the County of San Diego have characterized as an exemplary model of fiscal management for our Volunteer Fire Dept.'s operating expenses. Our community has also consistently cohered as one voice in the face of multiple challenges over the year from developments that had plans which would have greatly altered and compromised our standard of living. In essence, we have demonstrated that we are unique and therefore different from the other regions that are presently included in your Phase I category of your Micro Report. This uniqueness is similarly inherent in geographical factors in that we are not local to the East County region, unlike many of the other entities included in Phase I of the Micro Report. Instead, our fire dept has enjoyed a very longstanding collaborative relationship with the Rancho Santa Fe, Solana Beach, Encinitas, and Escondido.

Given this, we ask that you consider both retaining us as CSA 107 and also place us into Phase II of the LAFCO Micro Report. We also ask that all existing funding and future revenue, including but not limited to, fire mitigation fees, developer mitigation, and CFD's for fire and emergency medical services remains with CSA 107. Moreover, that Elfin Forest/Harmony Grove Fire Dept, Inc. continue to provide the services consistent with the Contract for Fire Services dated, April 28, 1992, between Elfin Forest/Harmony Grove Fire Dept, and County Service Area 107.

We, as taxpayers to our local community and property owners are requesting that you please work with us as a team so we can all continue to enjoy our quality of life as it presently stands.

Mr. Michael D. Ott
1600 Pacific Highway, Room 452
San Diego, CA 92101

Dear Mr. Ott,

Help---what is going on regarding our fire department? More formally; Community Service Area 107-Elfin Forest. It seems that LAFCO is getting us out of phase----or I should say why aren't we in Phase 2?.

Elfin Forest is very similar to Rancho Santa Fe as both their fire departments are very, very much involved in all of their community affairs. Over the past years I have watched their development as they have grown into the fantastic departments that now represent their districts. I'm sure that you know they are now discussing merging or some other method of joining together. Has the North Zone Fire Effectiveness and Regional Study been eliminated? LAFCO's Phase 1 would reverse those plans and make it impossible for them to ever get together?

I feel that there is an urgent need to keep us out of Phase one. You have by this time received a letter from Elfin Forest Fire Board, that lays out the position of the Board. Included herewith are my concerns regarding this matter.

Being in Phase 1 brings up a few questions:

- Why are we the only fire protection area west of I-15?
- Why are we not contiguous to any other Phase one district?
- Will we loose any equipment if we are in Phase 1?
- How much revenue will we loose?
- Has population projection studies been investigated within CSA 107?
- Is CSA 107 , with its projected population really aligned with areas east of I-15?
- Has 2020 Plan been considered by LAFCO?
- Are there any other Phase1 fire protection agencies increasing their property taxes to more fully fund their agency?

If CSA 107 is included in Phase one there will be irreparable damage to our Fire Department! Consider what the fire fighting equipment is in CDF operations. How many structure type rigs do they have as compared to brush rigs? How can they protect areas that have residential density (see plan 2020) like Elfin Forest and Harmony Grove and be protected by brush rigs? How many CDF firefighters are EMT's? Also, what will

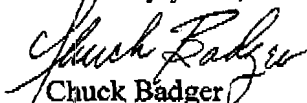

happen if any of the developments that are in the planning stage be adopted? All of the years of planning CSA 107 will be lost and this area, that is rapidly growing, will find itself without adequate fire protection. How can we give up our emergency EMTs' teams that will be lost if we are to be in Phase 1? Not only CSA 107 residents will lose this coverage but those that we now have mutual aid pacts will be at risk as they too will lose that service. San Elijo Hills residents are one of the areas so affected as last year, one small child was treated by our EMT teams within minutes after she had been bitten by a rattlesnake.

A few years ago we passed a humongous tax increase, for fire fighting, on all of us living in the Elfin Forest and Harmony Grove area. This increased our property tax @ five times what they were! It makes possible, over a fifteen year period to enable us to build another Fire Station in Harmony Grove and full time paid staffing. How many other phase one fire entities are doing this???

We, who live in Elfin Forest, feel that we are faced with a life and death issue. We know from past experience, that our lives and our property will be at risk if we are not realigned in Phase 2.

I feel that you can assist us or at least correct actions to reflect that we should be in Phase 2. By doing so you will be doing us a fantastic favor that will long be remembered by the residents of Elfin Forest and Harmony Grove!!!!

Sincerely yours,

Chuck Badger

REF: LAFCO MICRO STUDY

Dear CHAIRMAN ANDREW VANDERLAAN:

As a long time farm owner and current resident of the Elfin Forest Harmony Grove community I am very concerned with the recent LAFCO study of Reorganization of Structural Fire Protection and Emergency Medical Services in the Unincorporated San Diego County (MICRO). Our Fire Department is more than a Service Agency providing Fire and Medical to the community, it is the community. I ask that you continue to support this agency as a separate CSA for now.

I support this Micro study with the following recommended changes.

CSA 107 should be removed from Phase I and be placed in Phase II of the LAFCO Micro Report. CSA 107 should not be included in the CSA 135 roll up as it would create an isolated Island west of Interstate 15. The current service level and ISO rating would be costly for the new CSA to maintain despite the level of funding provided by the area of CSA 107. Please keep the funding for this area in CSA 107 until the next Phase so we can accomplish the 15 year plan already in place and being implemented.

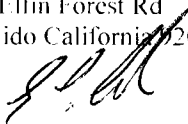

The Elfin Forest/Harmony Grove Fire Department Inc. (EF/HG FD Inc.) should continue to provide the service for Elfin Forest and Harmony Grove. This organization is one of the most cost effective local agencies for the superior level of service that it provides in San Diego County. It serves as a model for what can go well for the rural Fire departments and should not be replaced at the expense of our community idea. I ask that you recommend removing the EF/HG FD Inc. from DPLU's Conceptual Reorganization of San Diego County Fire Services Plan.

As the Micro study goes forward I strongly support the Regional Fire Protection District with the 11 person board as the best option for Governance for the future of the Fire and Medical services in the Unincorporated County Areas.

My personal experience with Department of Planning and Land Use (DPLU) Fire Management team is that when the local EF/HG FD Inc. had authority to issue Project Facility Availability forms they completed this for my families 6 unit Tentative Parcel Map project in 2 weeks in 2000/01. Last year DPLU required I update this eligibility for fire service form. I submitted this form over 1 year ago and have not had a response from DPLU. Along with all the additional testimony from the public during your hearings on this issue, it is clear that there is a good reason that the model of DPLU management of Fire Services is not done elsewhere in most California Counties. It is just a bad idea.

I along with the rest of the Elfin Forest Harmony Grove community stand united in support of our Fire Department and we ask that you support our community and its future. Please add me to the contact list for notifications on this issue. Thank you.

Respectfully
Eric Anderson

April 6, 2007

Dear Mr. Ott;

As you are aware, the Elfin Forest community has been diligently reviewing LAFCO's study, "Reorganization of Structural Fire Protection and Emergency Medical Services in the Unincorporated San Diego County (MICRO)" and the San Diego County Department of Planning and Land Use's (DPLU) report entitled, "Conceptual Reorganization of San Diego County Fire Services." As part of our review, we invited DPLU to attend last evening's Elfin Forest/Harmony Grove Town Council meeting to make a presentation regarding their report and to answer questions from the Town Council members and the community. We spent a great deal of time developing thoughtful questions for the County staff and believe that it would be helpful to you, the LAFCO commissioners and staff to have the benefit of the following questions that we discussed last evening.

1. We all support any improvement that can occur in fire projection. In particular, we support LAFCO's attempt to improve regional fire projection in the East County. However the Elfin Forest/Harmony Grove community is an island, and is an integral part of Zone 1. We are surrounded by a number of highly qualified independent City Fire departments and one Fire District that along with Elfin Forest/Harmony Grove comprises Zone 1. We absolutely believe that the most effective fire service for our community is one created in alignment with our surrounding fire departments. Therefore, we have 2 questions:
 - a. What would be the basis for recommending that Elfin Forest/Harmony grove be removed from Zone 1? And,
 - b. Will you recommend that Elfin Forest/Harmony Grove be put into Phase II?

RECEIVED

APR - 6 2007

SAN DIEGO LAFCO

2. In 2000, our community developed a 15-year plan for fire and EMS service. It was an intense, collaborative process that culminated in putting before the community Proposition S. By a yes vote of 84%, the community overwhelmingly showed support and accepted financial responsibility by assessing ourselves a substantially increased tax assessment. Can you explain how the DPLU proposal would better serve the needs of the affected residents, vs. the plan that they overwhelmingly approved?
3. Under the proposed plan, there are guarantees that all collected assessments will remain in the CSA in which they are collected. Within CSA 107, the Fire Department provides service that exceeds existing fire services in most unincorporated areas, as measured by the ISO rating for example. We have three questions:
 - a. What guarantees will ensure that we will receive “our fair share” of county funding from the new proposed plan?
 - b. Also, could you address the concern that the DPLU plan will be more expensive to taxpayers because of the increased overhead costs?
 - c. What assurances do residents have that level of service and ISO ratings in CSA 107 will be maintained or improved?
4. Harmony Grove is part of CSA 107 and is currently served by the Elfin Forest/Harmony Grove fire station. The new Harmony Grove Village development will be served by a new fire station that will be funded by a special facilities district. This new fire station will be the closest station to existing homes in Harmony Grove. Which entity will provide fire and emergency service for these existing homes if the new fire station is not part of CSA 107?
5. What other jurisdictions in the State of California have their Planning Departments manage and supervise fire and emergency services? Please explain this model.
6. If LAFCO votes to support the “MICRO Report” over DPLU’s “Conceptual Reorganization Plan” will the County continue to implement DPLU’s “Conceptual Reorganization Plan” or support LAFCO’s “Micro Report?” What will DPLU recommend?
7. Even if the DPLU plan is approved, virtually all automatic aid for our Fire Department will continue to come from the surrounding fire departments and fire district, not from the new countywide fire district. What assurance do we have that our training, communication and other programs which are presently coordinated with our surrounding fire departments will continue?

8. What assurances do residents have that level of service and ISO ratings in CSA 107 will be maintained or improved and how do you justify spending more money under the new plan to do this?

Thank you for taking the time to read these questions. The Elfin Forest/Harmony Grove Fire Department is the foundation of our community and we want to ensure that any decision involving its future is the correct one. Please do not hesitate to contact me if you have any questions or would like additional information regarding these issues.

Respectfully,

A handwritten signature in black ink that reads "Jeff Swenerton". The signature is written in a cursive, flowing style.

Subject: Comments to LAFCO Micro Report and the County Conceptual Plan
Attachments: header.htm

April 6, 2007

Shirley Anderson
Chief, Policy Research
San Diego Local Agency Formation Commission (LAFCO)
1600 Pacific Highway, Room 452
San Diego, CA 92101

Ms. Anderson,

Thank very much for presenting to the San Dieguito Planning Group the LAFCO Micro Report and the County Conceptual Plan at our March 29, 2007 meeting. We appreciated the opportunity to provide comments on the 'Report' and 'Plan'.

The San Dieguito Planning Group supports the guiding principle behind the LAFCO Micro Report and the County Conceptual Plan, that is the improvement of fire and emergency medical services in the unincorporated areas of San Diego County by improving command and control, communications, pooling equipment purchases and standardizing training and emergency operations.

The San Dieguito Planning Group has the following comments:

1. We support the concept of organizing a unified, independent fire district where the San Diego County Department of Planning and Land Use does NOT have responsibility or authority over fire or emergency medical services in the County of San Diego.
2. Funding sources for fire or emergency medical services in the County of San Diego should not be consolidated into or processed through the County's General Fund.
3. County Service Area 107 – The Elfin Forest/Harmony Grove Volunteer Fire Department should be removed from Phase I and be placed in Phase II of the LAFCO Micro Report.

The CSA 107 is geographically isolated from other territory that would be consolidated within Phase I. CSA 107's remoteness from the other territory would produce service and coordination issues with a Phase I regional agency.

4. County Service Area 107- The Elfin Forest/Harmony Grove Volunteer Fire Department should

of San Diego County and own land or reside within the legal boundaries of County Service Area 107 – Elfin Forest.

Do hereby support the following:

1. The Elfin Forest/Harmony Grove Fire Advisory Board directors, request;
 - a. County Service Area, CSA 107- Elfin Forest be removed from Phase I and be placed in Phase II of the LAFCO Micro Report.
 - b. All existing funding and future revenue recommended by the LAFCO Micro report for CSA 107, be removed from Phase I and be placed in Phase II of the LAFCO Micro Report for CSA 107- Elfin Forest.
2. The Elfin Forest/Harmony Grove Fire Advisory Board Directors request;
 - a. County Service Area, CSA 107- Elfin Forest, remains CSA 107- Elfin Forest
 - b. All existing funding and future revenue, including but not limited to fire mitigation fees, developer mitigation, CFD's for fire and emergency medical services remains with CSA 107- Elfin Forest
 - c. CSA 107- Elfin Forest be removed from DPLU's Conceptual Reorganization of San Diego County Fire Services Plan.
3. The Elfin Forest/Harmony Grove Fire Advisory Board Directors request;
 - a. Elfin Forest / Harmony Grove Fire Department Inc. Continue to provide the superior service demanded by the Elfin Forest and Harmony Grove residents of County Service Area 107 – Elfin Forest, as provide in the Contact for Fire Services dated April 28, 1992. between Elfin Forest / Harmony Grove Fire Department Inc. and County Service Area 107 – Elfin Forest for the County of San Diego.

And,

I William S. Telesco pledge to protest to cause a vote,
(Print name)

If either the Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County or Conceptual Reorganization of San Diego County Fire Services go forward without secured, sustainable funding in place prior to the implementation of either plan.

1. The Elfin Forest/Harmony Grove Fire Advisory Board directors, request;
 - a. County Service Area, CSA 107- Elfin Forest be removed from Phase I and be placed in Phase II of the LAFCO Micro Report.
 - b. All existing funding and future revenue recommended by the LAFCO Micro report for CSA 107, be removed from Phase I and be placed in Phase II of the LAFCO Micro Report for CSA 107- Elfin Forest.

2. The Elfin Forest/Harmony Grove Fire Advisory Board Directors request;
 - a. County Service Area, CSA 107- Elfin Forest, remains CSA 107- Elfin Forest
 - b. All existing funding and future revenue, including but not limited to fire mitigation fees, developer mitigation, CFD's for fire and emergency medical services remains with CSA 107- Elfin Forest
 - c. CSA 107- Elfin Forest be removed from DPLU's Conceptual Reorganization of San Diego County Fire Services Plan.

3. The Elfin Forest/Harmony Grove Fire Advisory Board Directors request;
 - a. Elfin Forest / Harmony Grove Fire Department Inc. Continue to provide the superior service demanded by the Elfin Forest and Harmony Grove residents of County Service Area 107 – Elfin Forest, as provide in the Contact for Fire Services dated April 28, 1992. between Elfin Forest / Harmony Grove Fire Department Inc. and County Service Area 107 – Elfin Forest for the County of San Diego.

And,

I Roxanne deMick pledge to protest to cause a vote,
(Print name)

If either the Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County or Conceptual Reorganization of San Diego County Fire Services go forward without secured, sustainable funding in place prior to the implementation of either plan.

 - b. All existing funding and future revenue, including but not limited to fire mitigation fees, developer mitigation, CFD's for fire and emergency medical services remains with CSA 107- Elfin Forest
 - c. CSA 107- Elfin Forest be removed from DPLU's Conceptual Reorganization of San Diego County Fire Services Plan.

3. The Elfin Forest/Harmony Grove Fire Advisory Board Directors request;
 - a. Elfin Forest / Harmony Grove Fire Department Inc. Continue to provide the superior service demanded by the Elfin Forest and Harmony Grove residents of County Service Area 107 – Elfin Forest, as provide in the Contact for Fire Services dated April 28, 1992. between Elfin Forest / Harmony Grove Fire Department Inc. and County Service Area 107 – Elfin Forest for the County of San Diego.

And,

I Jamie Costanzo pledge to protest to cause a vote,
(Print name)

If either the Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County or Conceptual Reorganization of San Diego County Fire Services go forward without secured, sustainable funding in place prior to the implementation of either plan.

ELFIN FOREST LAND - 20012 ELFIN FOREST LANE
HOME IN FINAL CONSTRUCTION

**Elfin Forest / Harmony Grove Fire Department
County Service Area 107 – Elfin Forest**

Petition

I, Claudia Costanzo am a registered voter
(Print name)
of San Diego County and own land or reside within the legal boundaries of County
Service Area 107 – Elfin Forest.

Do hereby support the following:

1. The Elfin Forest/Harmony Grove Fire Advisory Board directors, request;
 - a. County Service Area, CSA 107- Elfin Forest be removed from Phase I and be placed in Phase II of the LAFCO Micro Report.
 - b. All existing funding and future revenue recommended by the LAFCO Micro report for CSA 107, be removed from Phase I and be placed in Phase II of the LAFCO Micro Report for CSA 107- Elfin Forest.
2. The Elfin Forest/Harmony Grove Fire Advisory Board Directors request;
 - a. County Service Area, CSA 107- Elfin Forest, remains CSA 107- Elfin Forest
 - b. All existing funding and future revenue, including but not limited to fire mitigation fees, developer mitigation, CFD's for fire and emergency medical services remains with CSA 107- Elfin Forest
 - c. CSA 107- Elfin Forest be removed from DPLU's Conceptual Reorganization of San Diego County Fire Services Plan.
3. The Elfin Forest/Harmony Grove Fire Advisory Board Directors request;
 - a. Elfin Forest / Harmony Grove Fire Department Inc. Continue to provide the superior service demanded by the Elfin Forest and Harmony Grove residents of County Service Area 107 – Elfin Forest, as provide in the Contact for Fire Services dated April 28, 1992. between Elfin Forest / Harmony Grove Fire Department Inc. and County Service Area 107 – Elfin Forest for the County of San Diego.

And,

I CLAUDIA COSTANZO pledge to protest to cause a vote,
(Print name)

If either the Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County or Conceptual Reorganization of San Diego County Fire Services go forward without secured, sustainable funding in place prior to the implementation of either plan.

**Elfin Forest / Harmony Grove Fire Department
County Service Area 107 – Elfin Forest**

Petition

I, O. Donn Grace am a registered voter
(Print name)
of San Diego County and own land or reside within the legal boundaries of County
Service Area 107 – Elfin Forest.

Do hereby support the following:

1. The Elfin Forest/Harmony Grove Fire Advisory Board directors, request;
 - a. County Service Area, CSA 107- Elfin Forest be removed from Phase I and be placed in Phase II of the LAFCO Micro Report.
 - b. All existing funding and future revenue recommended by the LAFCO Micro report for CSA 107, be removed from Phase I and be placed in Phase II of the LAFCO Micro Report for CSA 107- Elfin Forest.

2. The Elfin Forest/Harmony Grove Fire Advisory Board Directors request;
 - a. County Service Area, CSA 107- Elfin Forest, remains CSA 107- Elfin Forest
 - b. All existing funding and future revenue, including but not limited to fire mitigation fees, developer mitigation, CFD's for fire and emergency medical services remains with CSA 107- Elfin Forest
 - c. CSA 107- Elfin Forest be removed from DPLU's Conceptual Reorganization of San Diego County Fire Services Plan.

3. The Elfin Forest/Harmony Grove Fire Advisory Board Directors request;
 - a. Elfin Forest / Harmony Grove Fire Department Inc. Continue to provide the superior service demanded by the Elfin Forest and Harmony Grove residents of County Service Area 107 – Elfin Forest, as provide in the Contact for Fire Services dated April 28, 1992. between Elfin Forest / Harmony Grove Fire Department Inc. and County Service Area 107 – Elfin Forest for the County of San Diego.

And,

I O. Donn Grace pledge to protest to cause a vote,
(Print name)

If either the Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County or Conceptual Reorganization of San Diego County Fire Services go forward without secured, sustainable funding in place prior to the implementation of either plan.

Note: We have an extremely effective and involved group of firefighters in Elfin Forest under Chief Twohy. Our firedept. does more than just protect our community from the threat of fire. They're composed of our citizens, they are my neighbors, they epitomize the spirit of our community. Elfin Forest should be excluded from the proposed reorganization.

3. The Elfin Forest/Harmony Grove Fire Advisory Board Directors request;
 - a. Elfin Forest / Harmony Grove Fire Department Inc. Continue to provide the superior service demanded by the Elfin Forest and Harmony Grove residents of County Service Area 107 – Elfin Forest, as provide in the Contact for Fire Services dated April 28, 1992. between Elfin Forest / Harmony Grove Fire Department Inc. and County Service Area 107 – Elfin Forest for the County of San Diego.

And,

I ARIE FRANKEN pledge to protest to cause a vote,
(Print name)

If either the Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County or Conceptual Reorganization of San Diego County Fire Services go forward without secured, sustainable funding in place prior to the implementation of either plan.

 - c. CSA 107- Elfin Forest be removed from DPLU's Conceptual Reorganization of San Diego County Fire Services Plan.
3. The Elfin Forest/Harmony Grove Fire Advisory Board Directors request;
 - a. Elfin Forest / Harmony Grove Fire Department Inc. Continue to provide the superior service demanded by the Elfin Forest and Harmony Grove residents of County Service Area 107 – Elfin Forest, as provide in the Contact for Fire Services dated April 28, 1992. between Elfin Forest / Harmony Grove Fire Department Inc. and County Service Area 107 – Elfin Forest for the County of San Diego.

And,

I CARI KRUMME pledge to protest to cause a vote,
(Print name)

If either the Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County or Conceptual Reorganization of San Diego County Fire Services go forward without secured, sustainable funding in place prior to the implementation of either plan.

ATTN: Michael Ott, Executive Officer

Dear Mr Ott & Associates,

Recently 8.5 million dollars was set aside to enhance our present East County fire departments. The monies were turned over to the Department of Planning and Land Use (DPLU) for management and disbursement. Each of the departments that signed up with DPLU was awarded a sum of monies to help with overhead, training and small equipment (the typical amount being \$20,000-\$25,000). This was a good thing. In addition, each department was awarded the use of a new apparatus, to be County owned. This included Water Tenders, Type 1 Engines, Type 2 Engines, and so forth. Again, this was good. Additional monies were used to support CDF stations in the Amador program to increase coverage in the outlying areas. Another good move.

Some departments require additional support (i.e. Pine Valley and Julian) due to high run volume and area. These two districts were offered monies to convert to Schedule "A" CDF stations. Pine Valley received an offer of \$762,239 and Julian received an offer of \$1,014,000. Pine Valley has accepted the proposal and Julian rejected the offer. After careful thought and consideration, I offer these comments.

The DPLU/CDF proposal offers negative repercussions for the County of San Diego and the involved departments in the following areas:

- a. Enhancement of the Volunteer Program.
- b. Fund Disbursement for Maximum Benefit.
- c. Timing of DPLU/CDF Actions.

Enhancement of the Volunteer Program

It has been estimated by LAFCO, that the Volunteer/Reserve Program represents a value between 14 and 20 million dollars for services rendered. This is a program that should be encouraged, enhanced and respected. The present Volunteer/Reserve involvement in the CDF program is that one may respond with CDF personnel while

additional personnel can standby at the station in case a second engine is needed. The reality of this method is that Volunteers will initially respond to calls day and night and standby at the station. After a period of time, they won't be so anxious to get up at 3 a.m. for a medical aid, because the CDF personnel will handle it and they don't need to standby at the station. Eventually they will feel unneeded and drift away. The volunteer and reserve personnel will go away unless they are utilized. Presently, Volunteers participate and are appreciated.

Julian FPD recently turned down the offer to be funded for a CDF Schedule A program. Julian sent a letter to the Board of Supervisors suggesting that the already allocated 1,014,000 dollars might be better spent through a grant program offered to all Volunteer agencies. Monies such as these could truly enhance and strengthen the Volunteer and Reserve programs. Dollars could be earmarked for stipends, health insurance, workers compensation insurance, and more. The County would then be openly supporting these agencies, developing an attitude of encouragement and enhancement.

The report submitted to LAFCO from Ralph Anderson and Associates by John Goss states that Volunteers are the life-blood of the Phase I agencies. The report is in-depth and suggests ways to improve and enhance these programs. The methods for enhancement need to be compared to the CDF program and evaluated.

Fund Disbursement for Maximum Benefit

During the negotiations with both Pine Valley and Julian, it was suggested that the same level of service could be provided for substantially less funds by not submitting to a Schedule "A" contract, but instead hiring qualified in-house personnel. Each department was told that this was not an option. Pine Valley could have easily done this for about \$225,000 versus \$762,000 and Julian could have done the same for about \$600,000 versus \$1,014,000. Both infrastructures were in place and qualified personnel available. The savings would amount to about \$951,000. This amount of monies distributed for stipends, health insurance, workers compensation insurance, etc to needy departments trying to enhance their Volunteer/Reserve programs would go a long way.

I'm not sure where the real decision comes from—the County Board, DPLU or somewhere else that we're not aware of. But, it's not in the best interests of our departments or more importantly, our citizens.

Timing of DPLU/CDF Actions

LAFCO and the County Chiefs have proceeded in a predetermined process to determine the best route for reorganization that best serves the population in the outlying areas utilizing available funding. Many options are on the table for consideration including contracting with CDF at all levels. DPLU and CDF have circumvented the process through the County enhancement program. It seems that

DPLU is representing CDF with County funds, and the welfare and enhancement to our fire service is secondary. The timing of these actions seems, at best, suspicious. The following questions come to mind:

1. Are they (CDF) establishing a permanent foothold to squelch other and possibly more effective plans?
2. What is the connection between DPLU and CDF?
3. Why is it necessary to give control to CDF to have additional help?

Questions such as these without answers generate mistrust. Mistrust is a poor foundation to build upon. It seems that DPLU is representing CDF with County funds rather than supporting and building the departments struggling to provide service.

Other concerns include state versus local control; working within the constraints of the CDF Union and staffing. Looking at the DPLU proposal, page six states, "There must be at least two CDF personnel per engine". CDF no longer allows one CDF employee supplemented by Volunteer or Reserve firefighters. This suggests that a minimum of six CDF personnel would be required for each station instead of three. A substantial price increase to the LAFCO estimate may be required.

In conclusion, I ask that LAFCO not support the DPLU/CDF proposal for Phase I. In addition, I ask that LAFCO recommend the removal of DPLU and CDF from the current county enhancement program unless they are overseen by another agency such as OES, GAO or possibly the County Public Safety Group. Phase I cannot work without the full involvement of the Volunteer agencies. We do not need a CDF takeover—we need support. An independent Fire Protection District can provide the ability to include all the involved agencies. That is what we need to do.

Thank you for your time and consideration of this matter.

SAN DIEGO AFCO

TO: LAFCO

Webster's New World Dictionary defines **Volunteer** as: "one who offers to enter into service of his own free will".

A little over 20 years ago, I became part of the Mt Laguna Volunteer Fire Department (MLVFD). No one was more surprised than I was. Recently relocated from the Los Angeles to the San Diego County area, I found myself concerned about possible medical responses to the needs of my family. I certainly knew I couldn't be of assistance—I could barely even speak the word "blood"—much less deal with it. But that all changed...

Faced with a shortage of personnel, the Chief of MLVFD invited me to become a part of the department. I went to school and became an EMT; attended drills each Wednesday night to learn about firefighting; tested and got my commercial Class B license and was certified by the State of California to test and certify DMV Class B firefighter exempt licenses. Certifications (Hazmat, S-190, ICS-100, Instructor 1A&B, etc) became a part of the learning experience and more importantly, a stepping-stone to knowledge.

MLVFD has taken the principle of being a stepping-stone and turned it into one of the most successful volunteer departments in the nation. Through the trials and tribulations of a two-man department with old, unsafe equipment; sparse coverage and little financial ability, MLVFD has been reborn as a station with 30 personnel for 24/7 coverage, the finest equipment in San Diego County and the ability to meet its financial obligations. What was the catalyst for this change? **Volunteers.**

The Volunteers came in two population segments: one was the residents, the other was the reservists. MLVFD had a resident population of 60 people to draw from—most were senior citizens. The volunteer sector had to come from out of the area—that is where the Reserve program was developed.

For 10 years, MLVFD has hosted Physical Agility Tests (PATs) and followed with a panel interview for open positions on the department. The requirements are stiff: EMT/D-C; four 24 hour shifts per month; every Wednesday drill night; a 16 week Firefighter I Academy consisting of Thursday night and all day Saturday; Class B license; participation in Strike Teams (until the fire is out); community events (Rummage Sale); and safety talks at the campgrounds on Saturday afternoons; and last, but not least, the commitment is for a minimum of one year.

What is the importance of these requirements? It provides a stepping-stone for men and women to enter the fire service. Without this opportunity, many would not be able to make the transition from high school/college into paid fire service. Currently, our department has placed 68% of our volunteers into paid service as firefighters and paramedics across the United States.

Mentorship of these men and women is important as their work ethics, attitudes and life skills are developed. At a recent Wednesday night drill, we discussed what it is to be a team—and what kind of firefighter they wanted to become. Listed below are the qualities they sought: wisdom, discernment, character, humility, integrity, patience, honesty, trust, consistency, selflessness, perseverance, dedication, love, loyalty, dependability, compassion, respect, accountability, pride, professionalism, determination, compromise, attitude, tolerance, communication, teamwork, giving, conviction, motivated, reliable, tactful, work ethics, proactive and cohesiveness. While these concepts are admirable—they take work! And that's where a Volunteer station can guide, direct, discipline and correct.

While I can prattle on forever, I'd like to submit a few letters from these young firefighters. It is for them we fight to retain our way of life as Volunteers. I ask that you carefully consider the enhancement of the Volunteer program as part of the solution to the challenges of fire service delivery.

A handwritten signature in cursive script that reads "Susan Raimond". The signature is fluid and elegant, with a large initial 'S' and a decorative flourish at the end.

Susan Raimond, Board Director

SAN DIEGO LAFCO

"So what do you do if there is a real fire", one of my friends asked me after learning I had just been hired by Mount Laguna Volunteer Fire Department.

"Well we fight it, I guess?" I responded as if I knew what I was talking about, but in all reality I joined Mount Laguna to teach me the fundamentals of firefighting so my friends questioned was actually not that far off base to my mind-set at that moment.

There were many paths to a career in the fire service I could have taken after I obtained my EMT-B, but no reserve program was held in such high regard from the people I spoke with other than Mt. Laguna. I wanted to be tested and be able to see for myself if I had what it takes to be a firefighter, and that was something I could not get in a College classroom, or even through a College FF-1 academy. I needed hands on experience with all aspects of the fire service from the little things such as daily station duties to big ones such as engineering a Type-1 engine on a Wildland incident. Mt. Laguna F.D. was able to provide so much of those things and a lot more you can't learn in books.

I've been working with Mount Laguna Volunteer Fire Department for two years now and I owe so much to this department, the people who have come and gone, as well as to the very important people who keep the show running behind the scenes. Each and every one person that has been a part of this department has helped me achieve every goal I have set and build the type of character I believe the fire service is looking for.

The goals are completing a Firefighter-1 Academy, staying true to your commitment of 4-24hour shifts plus drills a month for a year, obtaining a Class-B driver's license and the ability to operate Type-1, Type-3, and Water tender Apparatuses. What builds character and which I feel can only be obtained with a volunteer department such as Mt. Laguna is the level of fast paced learning we have. The volunteers are the Captains, Engineers, and Firefighters when the call goes out, so we are required to learn a lot more information than most paid probationary firefighters. It's learning all these aspects of the fire service that give you the fundamentals to be a well rounded Firefighter.

Without Mount Laguna Volunteer Fire Department I would be just another EMT-B applying for a paid position with a fire department. The tools they have given me and the doors they have opened I feel have prepared me for my path to a career in the fire service. I think it is essential to have a volunteer fire department such as Mt. Laguna for aspiring firefighters like myself. I've learned so much and will leave a big piece of my heart here when I have to leave. I came here 2 years ago to see if I had what it takes to be a firefighter and I have learned far beyond my expectations. Now when a friend of mine asks me, "So what do you do if you get a real fire?" They better be prepared to for a long explanation.

Sincerely,

Michael Schultz
Firefighter/EMT D/C
Mount Laguna Volunteer Fire Department

SAN DIEGO LAFCO

My name is Mike Di Martino, recently I was hired at Mt. Laguna Fire Dept. I started training with E.M.T. schooling. Throughout the course my interest in emergency response grew, and by the end I desired it as a career.

So some time passed and a friend of mine told me about a PAT, Mt. Laguna was having. So I showed up on a Saturday, met with firefighters and ran through a gauntlet of strength and agility tests. At over 6,000 ft air is hard to come by! A few days passed and I received a call, informing me of a formal interview. I'm not giving away all the surprises but it was very intense. Next thing I know I'm being asked if I'm ready for a commitment, and there was no question.

Now this is a volunteer dept, so if your heart is not 100% in it, there's no need wasting everyone's time, including your own. Now I have only just started, and the little time I've spent here has been positively overwhelming. The training you'll receive here is second to none. I'm going to put everything I have into this, learn as much as I can, move on and not forget where I came from.

SAN DIEGO LAFCO

My name is Jesse Richards. I am a volunteer for Mt. Laguna Fire Protection Department. Being a volunteer gives invaluable experience to those who are willing to give their time to a cause they believe is just. My cause is public service. I want to be able to help give myself to my community while learning and exposing myself to countless options of emergency situations.

During my search to become a Firefighter I turned to a friend who has experience as a volunteer. As he spoke about his roots as a volunteer, I found in him a passion and drive that inspired me to seek out that side of firefighting.

In the six months I have been with Mt. Laguna I have been to a Firefighter 1 Academy with recruits from Heartland Fire. I have been licensed to drive Firefighting Vehicles. When my team responds to an incident I talk to Dispatch, I am IC, I give the medics patient turnover and I have to make those critical decisions that are usually left to upper level officers in a paid department. The occupational and life lessons I am learning as a volunteer is making me a better person as well as a better Firefighter. I would not be able to get this level of training if I was a six month probationary firefighter on a paid department.

If you look at the employment positions available on FireCareers.com most departments want recruits with at least 1 year volunteer experience as well as a Firefighter 1 Academy before they will even accept an application. How are people supposed to get this experience if we don't have volunteer stations?

To Whom It May Concern:

I Lawrence Crow started my career to become a firefighter at Miramar college taking fire classes. Then I went to EMT school, got a job with an ambulance company. After a year of experience as an EMT I wanted to get on the fire department! So went to find a job and found that I could not get hired without experience. I thought to myself, how am I going to get experience? Through word of mouth I found Mt. Laguna volunteer fire department! I went through the interview and got hired! I've been working for Mt. Laguna fire department for almost six months and have learned so much about firefighting. Mt. Laguna sent through an awesome fire academy with heartland fire training! Up here at Mt. Laguna volunteer fire dept. we train hard. In this last six months I have come to find that Mt. Laguna is not just a fire dept. but a family also! The second home! From the chief to the probies, we all help, motivate, and strive to be the best firefighters we can be! I will never forget where I got started and who is guiding me to reach my dream! !Mt. Laguna!

To Whom It May Concern:

The purpose of this letter is to provide some insight as to what being a volunteer firefighter has and will do for my career as a paid firefighter.

My main career goal is to become a paid, professional firefighter in southern California. Becoming a firefighter in southern California is perhaps one of the most competitive, demanding and rewarding careers in the world. Two weeks ago, I took the open competitive written examination for the Long Beach Fire Department. I was one of 9000 applicants taking the test at a chance to get one of twenty spots available for the department. This was the first test the department has administered in 3 years.

Now, in order to achieve my goal, I must do everything I can to set myself apart from the competition. This means that over the course of the next 2-5 years, I will be building my resume to that effect. Paramedic school, work experience as an EMT and paramedic, physical exams and various licenses will all be pursued. All of these things offer great experience in preparation as a career firefighter.

However, experience working as a firefighter, performing firefighter duties, is only available through volunteer fire departments such as Mt. Laguna. And it is crucial towards fulfilling my goals. Nowhere else can better prepare me to fulfill my duties as a firefighter. Everyday I am training. Everyday I am learning. Everyday I am giving it my all and taking advantage of this opportunity which will push me and my fellow firefighters over the top in achieving our career goals.

Station duties, engine operations, pump operations, Class B firefighter licenses, radio operations, breathing apparatus donning and usage, advanced medical calls, landing helicopter operations, brush fire operations, structure fire operations and a multitude of other skills that will give me crucial hands on training and ultimately allow me to be a better firefighter are solely available through volunteer fire departments such as Mt. Laguna.

Sincerely,

Bruno Araujo

To whom it may concern,

SAN DIEGO LAFCO

My name is Travis Medina and I am a Firefighter/ EMT D/C with the Mount Laguna Volunteer Fire Department. I have been with this department since November of 2005 and put in well over 3000 hours of my time into this department without pay or compensation of any kind. I have been on numerous traffic accidents, medical aids and fires, all of which advanced my skills to where they are today. I began at this department with absolutely no experience what so ever. All I had was the determination to become a full time paid firefighter. Once joining Mount Laguna, I was immediately thrown into the mix; much like a full time firefighter would be, with one difference. There were no said captains or engineers...just well rounded firefighters who had to do it all; captain, engineer, firefighter. You name it these guys did it, and these are the same people who taught me everything that I needed to know to get my start in the fire service. Now, a year and a half later I am that guy who is spreading my knowledge to the new people who are just like I was...green and inexperienced. While being with Mount Laguna I have attended two fire academies. The first academy I attended was put on by Mount Laguna itself and required 6 months to complete. I found out who I was as a person and that I really want to make this my career. I am stronger both mentally and physically because of Mount Laguna, and know that I am ready to step into a paid station and excel. The second academy I attended was put on by Heartland Fire, which included paid full time firefighters and was made possible by El Cajon Fire, La Mesa Fire, Santee Fire, Lakeside Fire and San Miguel Fire. We were in academy 5 days a week for 10+ hours a day for 10 weeks. During this time I honed my skills and excelled because of my previous experience at Mount Laguna. This department has given me so much that I can't even begin to explain how thankful I am to be a part of it. Yes, it may have been the hardest time in my life, but I would do it again in a heartbeat. I feel that this department has so much to give to prospective future firefighters who accept the challenge, from training, to experience to the close family like atmosphere which embodies the fire service. I owe everything I have in the fire service today and everywhere I am going in the future to this small volunteer department with high expectations.

Sincerely,

A handwritten signature in black ink, appearing to be "Travis Medina", written over a horizontal line.

To whom it may concern:

My name is Danny Chandler, and I thank you for taking the time to read how the volunteer fire department has affected my life. It has not only affected my life but the life's of everyone I know. Working for a volunteer fire department has shown me the love and passion I have for the firefighting and medical services. Before working at a volunteer fire department I knew I wanted to be a firefighter but now I have the true understanding of the love for the life style of firefighters. Being a volunteer firefighter has helped me crawl and take my first few steps toward becoming a career firefighter.

To me, it takes a special person to fill the volunteer firefighter position. They have to be compassionate toward all people. The volunteer has to take pride in everything they do. We take pride in our station, equipment, appearance, and in what we do. We learn this throughout their journey as an unpaid volunteer firefighter. As I put more time and effort into this journey I gain the experience I will need in my future as a firefighter and my everyday life. This time I put into this journey will build my foundation of the man I will evolve to. I will cherish this time as a volunteer firefighter, and plan to continue well into my career as a paid firefighter. Once again thank you for your time.

To whom it may concern,

I am writing this letter to explain to you how much of an opportunity and honor it is to be a Mount Laguna Volunteer Firefighter!

6,000ft many years back Station 83 was constructed. Since then Mt. Laguna has played an important role during many events around San Diego County. On January 23rd Chairman Bill Horn commended the Mt. Laguna Fire Department for outstanding service, leadership, and commitment to the east county communities and the Viejas Fire on January 3rd. Mt. Laguna assisted in saving more than 1,400 homes valued at \$336 million in termination of the Viejas Fire that consumed more than 10,000 acres! The Chairman officially declared January 3rd "Mount Laguna Fire Department Day" throughout San Diego County.

For our contributions during the Cedar Fire, October, 2003. Member of Congress Duncan Hunter awarded a certificate of Congressional Recognition to Mt. Laguna Volunteer Fire Department, on March 13th 2004.

In my short two months on the job I have learned and experienced so much about the fire service: the firefighting operations, station duties, tactics and strategy, physical conditioning and medical protocols! I am also about to attend a firefighter 1 academy. In 8 awesome weeks I have done more as a Mt. Laguna Probationary firefighter than I would have done on a paid department. I have taken fire science courses in college but at Mt. Laguna I get to put what I learned in school in to real life firefighting situations!

Thank you for your time.

Sincerely,

Probationary Firefighter Richard Zizzo

SAN DIEGO LAFCO

To whom it may concern,

The experience that I am getting by volunteering as a Firefighter/EMT has been and will always be invaluable. The shortest list of reasons why is; number one experience, strength both physically and mentally, learning humility, and how to prepare myself to become a career Firefighter.

I have gained experience running calls from the Firefighter up to Captain, which I don't believe that I could have got anywhere else. Opportunity to Captain a Brush Engine for a week on a campaign fire, that just blows peoples minds that I did that. Completing the Firefighter I academy was an experience I will hold for the rest of my life. I have had the opportunity to become more than just a Firefighter. I am also the Safety Officer, Driving Instructor, Recruiter and Board Member all with in a year and a half. As a career Firefighter this would never be possible in such a short time. This opportunity is only available as a VOLUNTEER. I have grown physically stronger because of the academy and work that I get to do here. I had to gain mental strength to be an academy graduate and that has carried with me and will carry me to be a success. Humility taught to me during the academy and my duty days here will also make me a success. All these reasons are why I will remain a volunteer and be damn proud of it!

To whom it may concern:

I have been a volunteer firefighter for a short amount of time. But in a short amount of time I have learned numerous skills that will serve me well for the rest of my fire service career. I don't believe that I would be able to gain the same experiences. Experiences such as obtaining a class B firefighter license. I will also be afforded the opportunity to attend a firefighter 1 academy. Not to mention all the certificates I can obtain and classes I will attend over the course of my commitment to Mt Laguna.

I have wanted to be a firefighter for most of my life and until I joined Mt Laguna I had no direction. Since coming on I have been given direction and a set of goals to accomplishing my ultimate goal of being a firefighter in a paying department. Without Mt Laguna volunteer the only way I would have to gain experience would be through school. After my time here whichever department hires me will get a well rounded and experienced firefighter.

Sincerely,

Naiche Kennedy

SAN DIEGO LAFCO

To Whom It May Concern:

I have had the honor and the privilege of being a volunteer firefighter for Mt. Laguna Fire Department for the past year. This department, along with all the other volunteer departments throughout the county, has offered people the chance to experience what so few get to. That is the chance to see what it's like and what it takes to become a firefighter. In my year here I have been able to get a Class B Firefighter license, attend a 10 week Firefighter I academy, and respond to a multitude of different type emergencies.

I don't believe I'd have these opportunities if it wasn't for volunteer fire departments. No where else can offer this much to people who have little or no experience in fire service. These departments are a huge stepping stone for people who are looking to obtain careers as paid firefighters. The kinds of certifications and classes that these departments offer can make the difference in whether or not someone may get offered a job. Without places like Mt. Laguna, the selection pool for paid departments would be much smaller and much less desirable.

Thank you for taking the time to read this and hopefully it will help in deciding the direction of future fire service in San Diego.

Sincerely,

Jacob Rossoll

SAN DIEGO LAFCO

To whom it may concern:

I have had the honor of being a Mt. Laguna volunteer firefighter for three months. But in the short amount of time I have gained endless amount of experience, and learned New skills. Without Mt. Laguna my direction on being a firefighter was lost. This being a Normal department in East County the experience is endless. Not to forget the Certification I can obtain from this department. This is the chance for me to be the Responding firefighter, and respond to a whole multitude of different emergencies.

I don't believe I'd have these opportunities if it wasn't for volunteer fire departments. This department is putting me threw a Firefighter I academy and allowing me to obtain My class B driver's license. This department is a vital stepping stone on my search to Become a paid firefighter. Without Mt. Laguna Volunteer Fire Department I wouldn't Have gained the experience I need to excel in the fire service.

Sincerely,

Joseph Cumpston

SAN DIEGO LAFCO

Written comments to be incorporated into the final draft micro report to be presented on May 07, 2007.

Gentlemen:

The Community of Palomar Mountain and the Palomar Mountain Fire Board of Directors are concerned about the longevity of our volunteer firefighters. It is our belief that *the plan must support the volunteer firefighters* who are providing a level of service that matches the demand in the remote back country areas of San Diego County. *Not have the volunteers support the plan.*

Unless this important change is made to the current proposal, I must ask that the Palomar Mountain Volunteer Fire Department (CSA110) be removed from the Phase One Reorganization of Structural Fire Protection and Emergency Medical Services in unincorporated San Diego County and be placed into the "Phase Two" category. Any errors in predictions or loss of funding may cause the current volunteers to go away, never to return. It may be Palomar Mountain Fire Department's intent to file a petition with LAFCO requesting that dissolutions be submitted to confirmation of the voters

I want to commend the LAFCO committee and the County of San Diego for the continued professional approach to improve emergency services to all areas of San Diego County. As Fire Chief of Palomar Mountain Fire Department, I fully support any upgrade to emergency services for the local residents and visitors in the rural tourist area of Palomar. Please review and consider the following concerns which I believe support the request to be moved into Phase Two.

Dysfunctional

The Governor's Blue Ribbon Fire Commission recommended improvements in San Diego County Fire Operations and Fire Prevention after the 2003 Firestorm.

The description of "dysfunctional" was used to describe the existing fire protection systems in service in the rural back country of San Diego.

Although the firestorm was the event that brought fire protection into focus, most professionals agree that any amount of fire protection (suppression) in place prior to the firestorm would not have stopped a fire fueled by bad weather and years of relaxed fuel reduction.

The fact is that early into the Fire Storm incidents, Volunteer staff (Zone 8) had immediate and sustained crews in place conducting structure protection and evacuations before many paid strike teams were in place. Further, most volunteer groups were able to respond and still continue to protect their local area, as opposed to required move up delays in some career departments.

P.O. BOX 235 PALOMAR MOUNTAIN, CA 92060-0235 (760) 742-3701

The Palomar Mountain Volunteer Fire Department dedicates itself to providing a professional service that protects life and property, and preserves the Palomar Mountain quality of life.

PALOMAR MOUNTAIN VOLUNTEER FIRE DEPARTMENT

The Palomar Mountain Volunteer fire department does not leave our area unprotected as does some city fire departments. Cal Fire units under the current "Amador" service agreements may allow up to 45 minutes for station move-up.

I take great umbrage to the term "dysfunctional".

The Fire Protection Issue

My review of Fire Protection history within the Palomar Mountain (CSA 110) response area has found that no serious fire loss has occurred. Further, all fire / medical related incidents have been fully covered by the Palomar Mountain Volunteer Fire Department.

No structure fires or vehicle fires have transmitted to any exposures causing any additional loss. The fire station, property and rolling stock of the Palomar Mountain Fire Department are fully paid up, currently modern, state of the art fire equipment and independently owned and operated by the Palomar Mountain Volunteer Fire Department. Our staff has increased to 28 active members with no paid staff. The local community is very satisfied with the level of professional volunteer service provided to them. Palomar Mountain continues to operate in concert with Cleveland National Forest Engine 36, with a full crew during fire season (and specially staffed days) to all calls on the mountain. Should a serious fire event occur on Palomar Mountain, the local volunteer fire department is well staffed and equipped to make an initial attack and will be supported by all contiguous fire agencies within a reasonable time frame. I find that the LAFCO proposal may not improve the current fire protection (result vs. cost) and will actually curtail continued and future volunteerism.

The EMS Issue

It has been my experience that the real issue is EMS service in the back country and rural areas of San Diego. The western US culture automatically connects fire and medical. In fact, most fires are controlled by automatic fire suppression (fire codes) or quick, early fire attack by fire crews (or not). Emergency Medical Incidents have an automatic clock that counts down to death. Fire Departments are a good provider of emergency medical service but not the only provider. In fact, the fire service may be the most costly provider when data shows that more than 90% of ALS incidents can be downgraded to BLS incidents.

Palomar Mountain Volunteer Fire Department currently provides EMT B service to our entire response area. We have taken a proactive stance by also installing more than 12 AED units in the community to improve our saves due to the rural travel times. Our nearest ALS support is Mercy Ambulance stationed in adjacent communities (more than 30 minutes away at best case) or Mercy Air at 15 minutes (best case and good weather). My solution for better EMS service to Palomar Mountain may be an ALS ambulance stationed in our area (at least during high call volume times – weekends)

PALOMAR MOUNTAIN VOLUNTEER FIRE DEPARTMENT

Volunteer Fire Fighters

The value of the Volunteer FireFighter is under rated.

The entire United States shows successful statistics regarding Fire Protection using Volunteer Fire Departments. This valuable resource needs to be cultivated and supported by the State of California and the County of San Diego.

The recent report (see attachment 2 by Ralph Anderson and Associates) does indicate the value and need of the volunteers. The predicted professional firefighters union pressure and lobby may destroy the volunteer incentive

(See Riverside County Fire Protection history).

The Palomar Mountain Volunteer Fire Department is the core of the small rural community. The staff who always responds from their home and family when the pager beeps are the same neighbors who help in snow storms, earthquakes, family problems and barn raising. The connection of these neighbors will be destroyed by the loss of volunteer firefighters. The cost per call of Paid staff to the limited volume of emergencies compared to the loss of the neighborhood knowledge is not worth the trip.

Special Rural Community

Palomar Mountain is really an Island.

We have no immediate neighbors and very limited access.

We really are almost always on our own for at least an hour until "off mountain" mutual aid responds to our call for assistance in a fire or medical emergency.

The people who live and work on the mountain know the dangers of its remoteness.

They understand that the beauty, quiet, dark trails and nature also comes with no sewers, streetlights, police patrol, and maybe a longer wait for medical or fire assistance. The emergency services are still professional and dependable, but rural.

Just as the mountain folk resist street lights, I believe the current level of emergency services continues to satisfy our taxpayers.

Cost compared to effect

Palomar Mountain has 250 roofs to protect today.

The projected growth over the next 20 years may increase to 500.

The infrastructure will never change ever.

There will be no commercial or industrial growth

The cost per call based upon Volunteer Fire protection compared to career Fire protection is not justified.

The low volume of call activity and limited growth will not support a career fire station which is locked to the mountain

PALOMAR MOUNTAIN VOLUNTEER FIRE DEPARTMENT

Conclusion

As Fire Chief of the Palomar Mountain Volunteer Fire Department, I continue to strive for professional excellency in our emergency services. When an incident occurs, there is a good chance it will involve my family or neighbors.

I want the best mix of quality care and cost, along with continued good rural "quality of life". I ask that Palomar Mountain Volunteer Fire Department be moved out of Phase One and into Phase two. I support the concept of reorganization and increased emergency services for San Diego County. I will cooperate with all agencies involved, but I must continue to review all offers of service for sustained funding, quality service and rural traditions. I must provide a guarantee that the solid volunteer infrastructure, command and control will remain with the Palomar Mountain Volunteer Fire Department.

Yours in Safety

Re: Reorganization of Fire Protection and Ramona Municipal Water District

Dear Mr. Ott,

The Board of Directors of the Ramona Municipal Water District has reviewed the Micro Report on Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County including Attachment 1 Conceptual Reorganization of San Diego County Fire Services.

The District fully supports the conclusions in the Micro Report and Attachment 1, that the Municipal Water Districts could not be considered for the Phase 1 reorganization and that the Ramona Municipal Water District should be excepted from consideration for Phase 1 reorganization.

Sincerely,

RAMONA MUNICIPAL WATER DISTRICT

Robert Kryszak

To Whom It May Concern:

This is to let you know as Chief of the Ocotillo Wells Volunteer Fire Department, how I feel about the job that the DPLU has done so far. In the beginning they filled us with half truths about the whole thing. We as zone 8 Chief's were called to the Julian station to hear about a proposal that Ken Miller and Ralph Stinoff wanted to purpose to The San Diego Board of Supervisor's. They wanted us to approve the idea. It was like they were letting us in on the ground floor. But a week later we found out that it was a last ditch effort to cover their butts. We found out that it had already been in the works and they had the poor Volunteer Fire Company out front as we need help. That is very true when they got the money first thing they did is give CDF over 2 million first thing out. Now we are suppose to be happy with just a few crumbs that are left and any equipment that is bought for us to use will not belong to us but belongs to the county. It may or may not fit our needs but we are supposed to be happy with it. At the last two meetings on equipment I have turned down two engines because they are two wheel drives and in my area a four wheel drive is necessary. Ralph & Ken had agreed to order us a 4 wheel drive with a grant from Indian gaming, now it seems to be slipping by. I was told at the Feb. zone 8 meeting that 2 wheel drives engines might be all we get. I'm very sorry to report that this is not what most of zone 8 chief or my self had in mind when we first signed up for help.

The training is hard for Volunteers to adjust their schedule to meet the dates and times most training is set up. Going to training means to leave our zones short handed and some zone uncovered. The two training Capt. are doing their best with what they have to work with and we do appreciate their effort.

This is a big order to put together a county fire dept. and I'm not sure that CDF is the rout to go to get it done. The way it looks to me DPLU has tried to take over any volunteer fire company that has a tax base and leaving the non tax Dept. to sink or swim. They offered over two million dollars to two fire companies that already have a tax base and are doing well but this is to only hire CDF crews to run their first out ENG. What is wrong in offering the poor volunteer that busted butt to build the sta. up to what it is to day a job? After all I thought we were all ready paying CDF fire fighter with state taxes.

RECEIVED

MAR 01 2007

SAN DIEGO LAFCO

ALL I ASK IS WHERE WILL THIS HELP US? We do appreciate all the help we can get but DPLU is tearing zone 8 apart. All I see most the help is going to already paid dept. Stop and think where will we be with out the Volunteer Fire Dept. across the U.S.A. 70% would be with out help. Support your Volunteers we love what we do and we give from the heart and most fire fighter come from Volunteers. Don't forget your roots because with out them just like a tree you will wither a way

Sincerely,

Re: LAFCO Micro Report, Written Comments

On February 7, 2007, the San Pasqual Fire Department (CSA 113 – San Pasqual) was made aware of the Land Agency Formation Commission (LAFCO) Micro Report posted on the LAFCO website. To date, we have attended three public workshops in Pine Valley, Ramona, and San Diego. San Pasqual also attended the LAFCO presentation made to the community of Julian, community meetings in Valley Center and Elfin Forest, and the San Diego Fire Chiefs Association and Fire Districts Association meeting. Also having carefully reviewed the LAFCO Micro Report - Reorganization of Structural Fire Protection and Emergency Medical Services in Unincorporated San Diego County, Attachment 1 - Department of Planning and Land Use (DPLU) Conceptual Reorganization of San Diego County Fire Services, and Attachment 2 - Micro Report Background Study on Governance by John Goss, we have endeavored to understand the intentions of these reports. After intensive review of the reports and their associated programs, the San Pasqual Fire Department, in concert with its Fire Advisory Board, makes the following determinations.

- **That no reorganization, consolidation, merger, dissolution, modification or change to the current structure of the CSA 113 - San Pasqual begin without secured, on-going sustained funding**

After careful consideration, the San Pasqual Fire Department can not support any form of reorganization without secured, on-going sustained funding. By its very nature, a Regional Fire Protection District will only be successful if adequately funded. The concept is an attractive one, only if the end result is a well functioning and adequately funded organization that provides the better coordinated and enhanced delivery of fire protection services stated in Proposition C, without any degradation of service. Also important is that enhanced service in the back country must be provided without impeding the increase in level of service for any agency by taking money from one area to give to another area. The new organization should be formed such that it provides a cohesive work environment with Volunteer and Career personnel...and in the rural Volunteer Fire Departments, those Career personnel must be in support of the Volunteers. Volunteer Firefighters in rural areas such as ours are the backbone of our departments and communities. If the transition is not done in such a way that it fosters participation and retention, it will be the demise of the Volunteers. Once they are gone, it will not be possible to get them back, and additional costs to replace them with reserve paid call, part time, or full time Firefighters will only increase the already uncertain cost estimates.

RECEIVED

APR - 6 2007

SAN DIEGO LAFCO

- **Removal from the DPLU Conceptual Reorganization of San Diego County Fire Services**
After careful consideration, the San Pasqual Fire Department can not support the DPLU Conceptual Reorganization. The eventual meetings to attempt to have some understanding of how the plan will work have been nothing more than double talk. If adopted, it is clear that the DPLU Conceptual Reorganization could take many paths. It is also clear from the organizational chart provided, that the DPLU Conceptual Reorganization would be under the California Department of Forestry (CDF), a state organization far removed from our rural community and with very different priorities.
- **Removal from the Phase I agency list and placed in Phase II status**
After careful consideration, the San Pasqual Fire Department requests removal from Phase I of the LAFCO Micro Report, and placement into Phase II so to continue service to our residents and the citizens and travelers of the San Pasqual Valley, unimpeded by the uncertainty of both programs. If Phase I is successful, the San Pasqual Fire Department would like to reevaluate the program as it exists then.
- **Retain our autonomy and governance structure**
Currently the San Pasqual Fire Department is governed by a six member Fire Advisory Board for the Board of Supervisors. Our Board governs and makes decisions with one purpose...that being what is best for our community and our residents in San Pasqual. The removal of that local control causes great concern among our Board, our community and many other communities. Loss of local control has everything to do with the future of these communities, futures that we are not willing to risk to such uncertainties. Futures that we are afraid of putting into the hands of those who may not have our best interest at heart.
- **Retain, in whole, all Automatic Aid Agreements and Mutual Aid Agreements**
Additionally, we request that all Automatic Aid and Mutual Aid agreements remain in place, and the Department retain the authority to negotiate those and future agreements. Automatic Aid Agreements with San Diego account for some 70% of our call volume, affording us much needed experience and providing the opportunity to respond and train mutually. To ensure that we are promptly dispatched without delay, the city of San Diego has for years had our units entered in their CAD, and issued San Diego pagers. An Automatic Aid Agreement with Ramona is also in place, and the Department wishes to ensure that there is no change to that agreement unless it is at the request of the two parties involved.
- **Reorganization of the Fire Enhancement Program under the Office of Emergency Services (OES)**
It is important to note that the Department appreciates the Board of Supervisors annual discretionary funding towards the current Fire Enhancement Program. Much needed funding has assisted our Zone 8 Departments with operational costs and apparatus purchases. That funding has been life blood to some of the smaller Volunteer Fire Companies (VFC's) and should absolutely continue. As stated in the power point presentation, however, most of the funding has gone to contracts with CDF. CDF contracts are not desired by the San Pasqual Fire Department, as it would not increase the level of service currently provided by the Volunteers. If, as feared, the result is the death of Volunteerism in San Diego County...the result would then be a decrease in the level of service currently provided. We cannot approve of any program with so much uncertainty in the retention of the Volunteers, as clearly stated in the Background Study by Mr. Goss.

Due to the mistrust and misinformation, it would be highly beneficial to the County of San Diego to remove the Fire Enhancement Program as it exists today from the control of DPLU. By their own comments, the developers are their clients, it is their job to level the playing

field, and silver bullet of fire safety will not stop development. Again, by their own comments, it is a conflict of interest that has inflamed the fire community. The Fire Enhancement Program should be moved to the control of the San Diego County Office of Emergency Services, to ensure checks and balances provide public safety and not make developers rich.

- **Continue the Fire Enhancement Program assistance to Fire Departments**

When the infusion of \$20,000.00 makes the difference it has to some of the back country VFC's and CSA's, it should be obvious that the need is great. Continue that assistance. Continue the training effort with a training budget that allows for more flexibility to get formal classes geographically located and at a frequency that helps the Volunteers ability to attend. Consider video conferencing. Consider whatever it takes, because money spent today will save money on high priced salaries tomorrow.

It has been suggested by DPLU that a change would occur to allow VFC's to collect mitigation fees. Those mitigation fees could be handled through the existing program with special districts, or with a Fire Enhancement Program administered by OES. If there is any doubt, the bookkeeping and record keeping would be such that the Supervisors are comfortable.

We further request that the Board of Supervisors, through the Fire Enhancement Program, make available to the San Pasqual Fire Department the funding to hire at least one full time paid Captain to work a 40-hour work week to staff the station from 8am to 5pm, Monday through Friday. That Captain would support the Volunteers during the critical period of the normal work week. Strict minimum criteria would ensure a full time person capable of medical, fire and rescue response, and operation of the apparatus was always available to the Volunteers. Due to low call volume, another criteria would be administrative duties to assist in recordkeeping. The Department will use strict hiring criteria to select a qualified applicant, with the intent to give first priority to qualified in house Volunteers.

- **That no reorganization, consolidation, merger, dissolution, modification or change to the current structure of the CSA 113 - San Pasqual begin until the County has the responsibility to provide fire protection in San Diego County**

As stated in the March 1st LAFCO Public Workshop, the County Board of Supervisors has the **authority** to provide fire protection in the County. We feel strongly that the County must have the **"responsibility"** to provide fire protection. Noting the San Diego County is one of the few, if not the only County in California that does not have the responsibility to provide fire protection, we cannot take the chance that the process will fail again as it did before. We believe the County's own policy is to not fund a sustained program with discretionary money. Discretionary money is just that...discretionary, and subject to current priorities. Today, the fire service in San Diego County is a priority. It wasn't yesterday. Will it be tomorrow? We would be kidding ourselves if we do not recognize there are disasters looming on the horizon that can, and will, re-prioritize our future.

- **Retain our CSA boundaries in whole with all money, past, present and future made available to the San Pasqual Fire Department so to allow us to continue to improve service to our residents**

The San Pasqual Fire Department has made many accomplishments since its formation in 1970, and formation as a County Service Area (CSA) in the mid 1970's. We, as have all the VFC's and CSA's, weathered through the County's divorce from fire protection and for over 35 years have served our community. We have worked hard to become a well trained and very dependable Volunteer Fire Department. We built our fire station from the ground up,

almost completely on Volunteer labor...an enormous savings to our residents. Recognizing the importance of emergency response, in 1997 the Department implemented a policy of round the clock staffing.

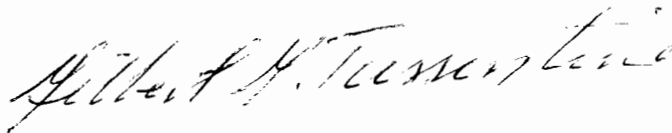

Since 1996, the Department has conducted an annual Fire Academy, currently 434 hours in length. We train regularly six times a month, and attend special trainings and multi agency drills.

Each year we improve and each year we get stronger. To continue that process, the San Pasqual Fire Department also requests that all monies, past, present and future be available to us so that we may continue to serve and continue to strive to increase service to our community in this proven cost effective manner.

In closing, we have taken great care in considering what is best for our community. We are in need, and we do need assistance. But we can not, in good faith, chance what we have toiled to build for so many years on programs as uncertain as those before us. If this regional effort is to be done, we implore you to insist it be done the right way. Carefully, painstakingly, and over time, ensuring adequate on-going funding and a cohesive atmosphere where agencies want to be a part of something good. Do not allow them to break us and put us back together broken, possibly even more broken than we were to start with.

Additionally, we respectfully request that we be ensured no punitive action, formal or informal, will be taken as a result of our position on the programs we are discussing today.

Respectfully Submitted,

SAN DIEGO LAFCO

Re: LAFCO Micro Report, Written Comments

I am speaking as a Volunteer Firefighter, serving in San Diego County since 1991, and currently a Volunteer at two San Diego County Volunteer Fire Departments.

I am not a politician, and only partially understand the whirlwind of controversy in the options before us. I am a simple person, unpracticed at politics, with strong morale beliefs.

What I do know is Volunteers. I understand their motivations, their reason for giving, and their desires. I know how they learn, why they are willing to punish themselves, and what drives them away.

At the Public Workshop in Ramona, it was stated by the CDF union representative, Mr. Scales, "Volunteers, paid call Firefighters, and Reserves are all the same...we just call them different names". That is not true. I admit there is a great deal of confusion over the terms and what they mean to different individuals...but Volunteers are special people. Volunteerism, in its truest form is the spirit of giving of oneself. By definition...*"the policy or practice of volunteering one's time or talents for charitable, educational, or other worthwhile activities, especially in one's community"* is a very different definition than that of Reserves and Paid Call Firefighter's whose motivations are monetary and career oriented. These special people, these Volunteers, are the backbone of our rural departments and our communities. That has been stated repeatedly throughout this process, as has the importance to the communities of retaining those Volunteers.

The value added to Volunteerism in San Diego County has been estimated at a minimum of some 20 million dollars per year in the LAFCO Micro Report. I can not speak to that number. I can speak to the value of a true Volunteer, and that value is incalculable. Incalculable not only in man hours, as stated by Mr. Goss, but also in the willingness to sacrifice themselves for their community and even surrounding communities whenever there is a need. Sacrifice for even the smallest emergencies. Sacrifice that often results in great personal loss. The recent Giorgio incident in Borrego Springs is an example. Borrego put out the call for help within our zone. Some 25 Volunteers responded immediately, allowing them to rest their crews on this extended incident. They stayed up all night and missed work the next day, but they answered the call for help from a neighbor...just as they always do.

Volunteering is a way of life. The Volunteers I have come to know in the last 16 years are some of the most giving, understanding, hardworking and willing people I have ever known. They are the very infrastructure, making the Departments what they are, and I have never been more proud of any affiliation. I am steadfast in my conviction that Volunteers do it because they want to do it, not because they get paid. I always felt getting paid would change everything. With paid personnel, it's always all

about the money. On strike teams they count how much money they are making. At trainings, they are willing to admit to the instructors they are there because they get overtime. It's only natural, I guess, but we have a very different motivation for what we do.

In discussing the programs, I wish to specifically address to the Department of Planning and Land Use (DPLU) Conceptual Reorganization of San Diego County Fire Services. It is clear from the organizational chart that the intention of the reorganization is to contract with the California Department of Forestry (CDF). All Volunteer County Service Areas (CSA's) are plotted on that organizational chart under various CDF Battalions. The attempts to understand the program and what will happen to us have been fruitless. Their explanations have been few and contradictory.

The sad part is that most Volunteers are typically not politicians. We live in rural communities, and maybe if we are lucky, we work in rural communities. Some have simple and fairly uncomplicated lives, but we all take pride and honor in what we do. Recently, we have been thrust into a political meat grinder. Some saw it coming, some did not. Just yesterday I had a Volunteer agency tell me that they did not know they were in Phase 1, and still fairly unclear on what Phase I actually means.

I have spent some time looking into Volunteer Programs, including a day in Riverside County at the Volunteer Fire Company Presidents meeting last month. If this was to be it, I wanted to touch it, see it, and smell it. We were told things would go fine for a while, and then you run head on into some hard core, state mentality that doesn't like Volunteers. I have bumped into a few of those types here, and they would eat us alive. I, personally, would not put myself through that...that is not why I volunteer.

CDF will not work well with the Volunteers. They will have good intentions, some will try, but some will not. The Riverside program was offered as a model, so I went to see for myself. With over 60 years of a partnership with CDF, they are left with a program where the Board of Supervisors were unaware late last year that there were any Volunteers left in the County. Only months ago, their Volunteer Firefighters Association met for the first time with the CDF union to try to solve some of the problems. Fire Chief John Hawkins stated in his presentation that they are unsure of how many Volunteers they have left, and estimated possibly 400 to 500. Assemblyman Kevin Jefferies has stated that CDF is what happened to the Volunteers. **I would ask you not to put the Volunteers in San Diego County under CDF.**

We are already experiencing our first failure with the training program, in reference to the statements being made about Volunteers not being willing to attend classes. Two Training Captains hired by DPLU are attempting, in good faith, to offer training to the Volunteers. They have all the right intentions, and have worked hard at the program. Not to take away any successes they have had, but without a training budget, they are left to do the best they can. Class after class has been cancelled due to lack of sign-up. It has been made to look as if the Volunteers are uncooperative and left them feeling inadequate. In reality, we just haven't gone far enough in figuring out a way to make it work. We recognize that part of that effort needs to come from within, and have formed a committee to come up with solutions.

Please continue and expand the training program through the current Fire Enhancement Program. To work, it will need funding, and much forethought on how best to get the training to the out lying rural departments that need it the most. The program must be flexible enough to account for time constraints on Volunteers schedules, and allow them different ways to accomplish the task. It must be geographically located so that the smaller departments can attend without stripping coverage from their district. It must be an understanding program, understanding that these are unpaid personnel, with jobs and lives and families to support. It must be a program administered with understanding and patience.

Please continue and expand the Fire Enhancement Program with assistance to needy Volunteer Departments. The County could very much assist those departments by providing them with help in staffing. Not a CDF contract, but through the Fire Enhancement Program. Allocate funds for them to hire one person who meets specific requirements for medical, fire, or rescue response with the capability of operating the apparatus. That paid person could be one of their qualified Volunteers. Assist them in their ability to draw in young, motivated, career oriented new comers that are hard to get due to geographic location and what they have to offer in the way of a career path. It can be a wealth of needed manpower, and with it comes their enthusiasm.

Maybe it is a pipe dream...but I do believe there is a way to make it work. **With fore thought in anticipation of labor issues that will occur with the Regional Fire Protection District, there is a way to create a cohesive work environment with Volunteers and Career working side-by-side, as partners.** It will take work from both sides. Volunteers will have to step up to the plate. Career personnel have to take off their union hats. But CDF is not the answer at this time, in this place. It is a short term attempt to fix a long term problem, and the consequences for failure will be financial. The ability to attract and retain Volunteer Firefighters is a difficult and delicate task. Those that do it well reap untold benefits. Those that do not, hide behind the terms Reserve and Paid Call. We have the opportunity to have the forethought to do it the right way with the County Fire Protection District. San Diego has a unique opportunity. Unique in that they could do something here that might be unlike anywhere in California. If done the right way, it could be a huge cost savings to the taxpayers and a model for other Counties.

And finally, with reference to the statements being circulated that the Volunteers have mishandled funds are unfortunate. The article in the paper referenced a Fire Protection District serving some 30,000 people, very different than the typical back country Volunteer departments. This occurrence does not represent us and should be delt with separately and not circulated to tarnish honest, hard working, giving Volunteers.

I think I speak for most, if not all the Volunteers in San Diego County in thanking LAFCO for recognizing the importance of the Volunteers in identifying us as critical to the success of any reorganization,, and that we could make the very difference in whether the reorganization is successful at being cost efficient, or unsuccessful...becoming a giant monster that must be fed enormous amounts of money.

No one doubts that someday, San Diego County will have a County Fire Department. And I do not believe that anyone thinks it bad idea if it were done the right way. The right way, with secured ongoing and sustainable funding, is not DPLU's Conceptual Reorganization. The right way, with time, without force, not as a reaction to an incredible fire that will be no different through this reorganization than it was in 2003.

Respectfully Submitted,

Dawn Pettijohn
