

# Memo

**To:** Mr. Pierce Rossum, County Water Authority

**From:** Mr. Adam Wilson, San Diego LAFCO Consultant

**CC:** Mr. Keene Simonds; Ms. Sandy Kerl

---

Dear Mr. Rossum,

I want to thank you again for giving a presentation on May 10, 2022 to our Ad Hoc working group related to the San Diego County Water Authority's water rates and how they are calculated and structured. It was extremely informative and a good cursory overview which will assist us in our review moving forward. As previously indicated, we anticipated there may be additional questions that warrant your response. Below they are the following:

1. What are the total contributed assets broken down by each member agency (in dollars) over the last 5 years?
2. What would the SDCWA rate increase to (each individually) Valley Center, City of Poway and City of San Diego be if Rainbow and Fallbrook detachment occurred using the Hanemann dollars (numbers)?
3. Do the San Diego County Water Authority's current rates take into account the funding for capital improvements that are specifically intended to benefit both Fallbrook and Rainbow, which have not been built to date?

If you could provide your answers by next Friday, June 3 that would be very appreciative. Again, thank you for your previous time presenting to our group and thank you advance to sharing more information related to the inquiries above. Please do not hesitate to contact me directly if you have any questions or comments upon receipt.

Best Regards,  
Adam Wilson
