Subject: [External] LAFCO detachment

My name is Stephen Brown. I live in Fallbrook, CA. I am very invested in my community and its future well being. I am an elected member of the Fallbrook Community Planning Group and serve on several committees as well. I am contacting you not as a member of the Planning Group, but as a concerned citizen and Rainbow Water rate payer. My wife and I live on a little over one acre which supports numerous fruit and nut trees as well as a significant garden that is maintained throughout the different growing seasons. We have watched our water bill climb continuously in the 12 years we have lived in Fallbrook. We see avocado groves being abandoned because of water costs. **I am in strong support of detachment.** The impact to the rest of the district will be approximately 1.5%, whereas the pure water program embarked on by San Diego will cost about 9% plus a per capita cost in addition. Do what is right and ethical. **VOTE IN FAVOR OF DETACHMENT.**
