

**SAN DIEGO LAFCO**

**June 6, 2016**

**9:00 A.M.**

**2016-17 San Diego County Wildland Fire Season Readiness Workshop**

**COUNTY ADMINISTRATION CENTER**

**1600 Pacific Hwy, Room 302**

**San Diego, CA 92101**

**2016-17 FIRE SEASON READINESS WORKSHOP PROGRAM**

1. FIRE CONDITIONS: CAL FIRE Unit CHIEF Tony Mecham
  - Drought conditions State/San Diego Region
  - Daily Weather/Fire Condition reports (Nat. Weather Service/Cal Fire)
  - CAL FIRE resources State/San Diego Region for 2016 Fire Season
  - Contractual agreement(s) for military and private aircraft
  
2. PRE-FIRE TRAINING: SDCFCA PRESIDENT & Viejas Fire Department CHIEF Don Butz
  - Wildland fire training
  - Strike Team Leader Training and Certification
  - Other training coordinated through SDCFCA network related to wildfires
  - Coordination with Tribal Fire Departments
  
3. AREA FIRE COORDINATOR: San Marcos CHIEF Brett Van Wey (Alternate Area Fire Coordinator)
  - Operational Zones in San Diego County
  - Deployment of “local” resources within San Diego County
  - Request for “outside” resources into San Diego County
  - Deployment of “local resources” outside of county
  
4. LOCAL AERIAL ASSETS: San Diego Fire Rescue CHIEF Brian Fennessy
  - Local aerial resources (City/County)
  - Coordination of ALL aerial resources
  - Night flying aerial resources
  - Cost recovery for local resources

# SAN DIEGO COUNTY

## WILDLAND FIRE PROTECTION SYSTEM

Tony Mecham, Fire Chief – CAL FIRE/San Diego County Fire

Brian P. Fennessy, Fire Chief – City of San Diego

Bret Van Wey, Fire Chief – City of San Marcos

Don Butz, Fire Chief – Viejas Reservation Fire Department

# WILDFIRE THREAT AND CAL FIRE/COUNTY PREPAREDNESS

Tony Mecham

Fire Chief – CAL FIRE/San Diego County Fire

# The Wildland Fire Problem

---

San Diego has one of the most severe wildland fire problems in the world because of:

- Population,
- Vegetation,
- Topography
- Climate

In San Diego, wildfire isn't a matter of "IF," it's a matter of "WHEN."

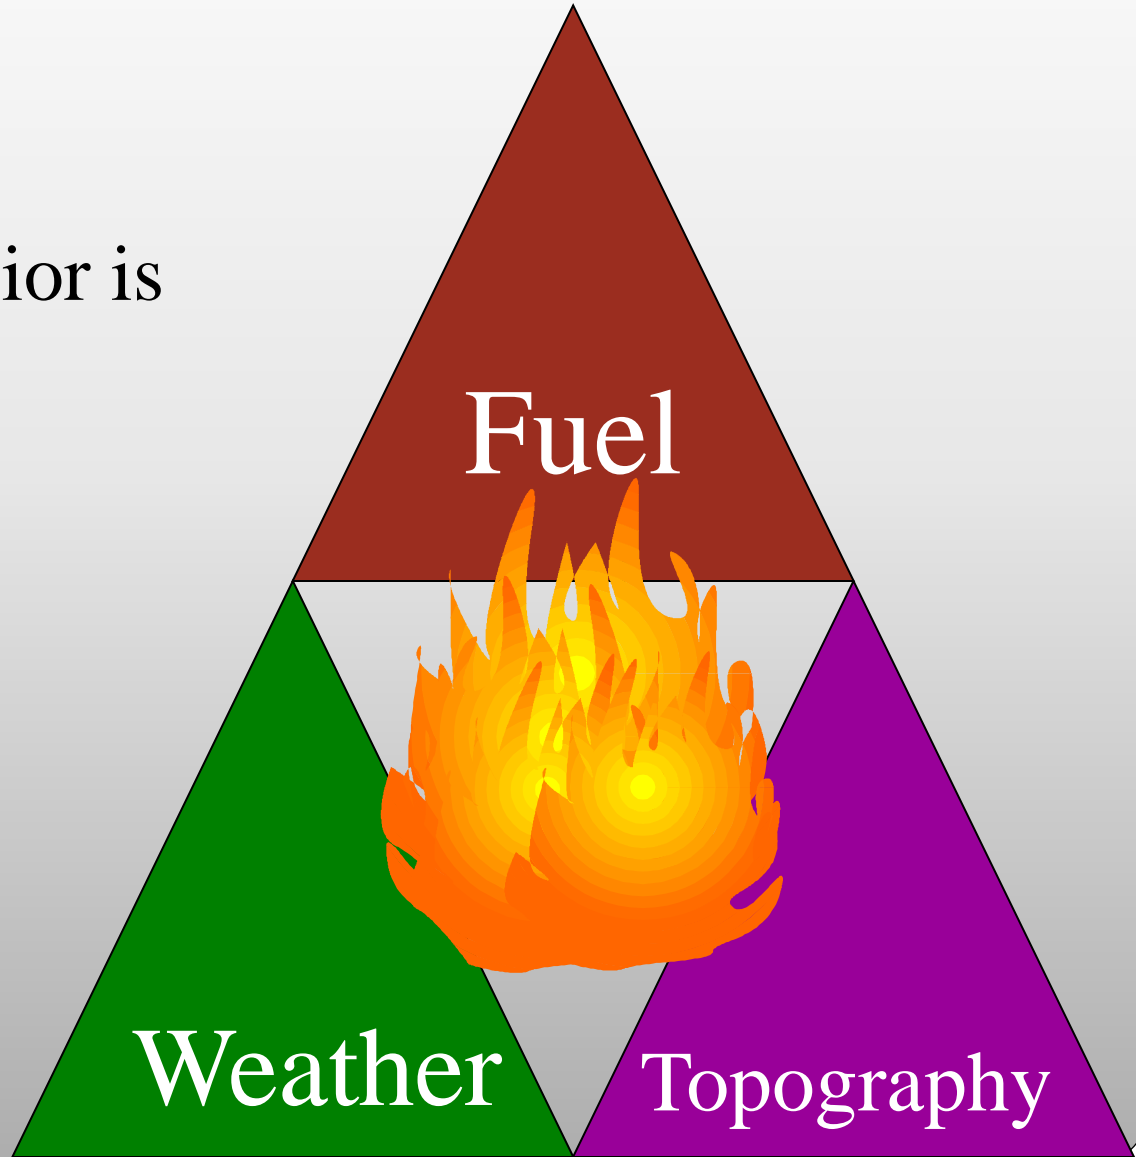

# The Wildland Fire Environment

---

Wildland Fire Behavior is based on three main factors,

- Fuel
- Weather
- Topography

# The Wildland Environment

---

## Fuels

- Live Fuels
- Dead Fuels
- Drought

## Weather

- Warm Mediterranean Climate
- Influenced by Desert & Ocean
- Santa Ana Winds

## Topography

- Lay of the Land
- San Diego Mountainous Terrain
- East West Aligned Drainages

# Local Conditions

---

## VEGETATION = FUEL

California's native plants and shrubs are among the most flammable in the world.

Chamise, buckwheat and sage are referred to as *chaparral*.

Local hillsides and canyons are covered with these flammable plant materials.

# Prolonged Drought Impacts to Wildland Resources

Increase in drought-induced woodland mortality

- Woodland trees are unable to defend against insect attacks
- Fuel load increase
- Established wildland fires more resistant to containment

# Tree Mortality & Rangeland Threats

## Gold Spotted Oak Borer (GSOB)

Detected in 2008

- Has Spread to over 75,000 acres
- Killed over 90,000 oaks in San Diego County alone
- Takes advantage of drought stricken oaks

# Tree Mortality & Rangeland Threats

## Shothole Borer

- Detected in 2012
- Killed over 100,000 trees in San Diego County
- Prefers more than 200 species of tree

# Long Term Effects of the Drought

---

## **VEGETATION = FUEL**

In mountain areas, 60% - 70% of trees are dead from the bark beetle.

San Diego will experience long term effects of the drought. What is happening now will change the landscape for generations.

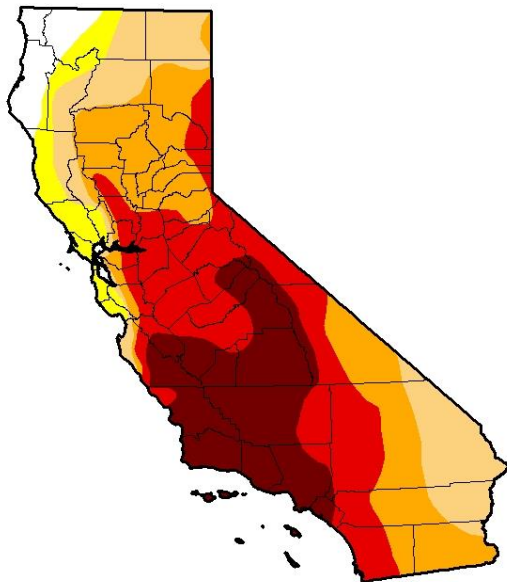

# 2016 Fire Season Outlook Southern California Drought Conditions

Majority of San Diego County in Extreme Drought  
 Winter 2015/2016 – Normal rainfall, warmest winter recorded  
 Above normal potential for large fires

U.S. Drought Monitor  
 California

May 10, 2016

(Released Thursday, May 12, 2016)

Valid 8 a.m. EDT

Drought Conditions (Percent Area)

	None	D0-D4	D1-D4	D2-D4	D3-D4	D4
Current	4.27	95.73	89.68	72.72	47.92	21.04

# SDFD Copter 1 - Bell 212HP

# Bernardo Fire

# NVG operations

- SDFD Copter 1 and 2

# Aerial Support to Regional Enforcement Agencies

- Formed in 1971
- Nine aircraft in use
- Patrol, fire suppression and search & rescue missions
- Night vision and Infrared capabilities

# CAL FIRE / ASTREA PROGRAM

- Joint CAL FIRE and San Diego County Sheriff Program
  - Sheriff provides the Helicopters and Pilots
  - CAL FIRE Provides Fire Staff (25 Personnel Assigned)
  - CAL FIRE Pays for flight costs when assigned to Fires
- Two Helicopters are staffed daily
  - One water dropping/Hoist
  - One water dropping with 1 9 Person Helitack Flight Crew
    - Able to engage in fire fighting activities
    - Also used to establish a helicopter base close to fire
    - Construct and staff Helispot to transport firefighting personnel

# BELL 205 A1 ++ FIRE/RESCUE HELICOPTER

The three fire/rescue helicopters are equipped with 375 gallon belly tanks and rescue hoists capable of lifting 600 pounds.

# CAL FIRE - Statewide

- 23 Grumman S-2T 1,200 gallon airtankers
- 11 UH-1H Super Huey helicopters
- 14 OV-10A airtactical aircraft
- 13 air attack and nine helitack bases located statewide

# OV-10A Air Attack Aircraft - ATGS

- Based Locally at Ramona and Hemet Air Attack Bases
- Used to coordinate Air Resources and Provide Information to Ground Commanders

- Type I Helicopter at the new Kitchen Creek Helibase

# Next Generation Air Tanker

# Defense Support To Civilian Authorities

- United States Marine Corps
- United States Navy

# Coordination of Aerial Resources

- The coordination of mutual aid aircraft in San Diego County is provided by Cal Fire Monte Vista Unit with simultaneous notification to North County Dispatch JPA “North Comm” on FIRE CC Intercom. When out of county aircraft are requested to support an incident, the order is placed through South Ops Geographical Coordination Center in Riverside.
- When aircraft are assigned to an incident, aerial supervision is provided by either an Air Attack (ATGS) or Helicopter Coordinator (HELCO) flying over the incident. The Air Attack or HELCO provides tactical directions to aircraft crews and relays information to and from the incident commander.

# Cost Recovery

- Agencies that operate aircraft such as SDFD, Cal Fire, SDSD and USFS have contracts or MOU's that have predetermined rates for the aircraft being operated. SDFD has an MOU with the County of San Diego for night firefighting and rescue in the county.
- SDFD and SDSD receive grant funding annually from SANDAG Safe Grant. The provides approximately \$375,000 to each agency to offset the costs of fighting fires that may impact county or state roadways.

# San Diego Operational Area

Brett Van Wey

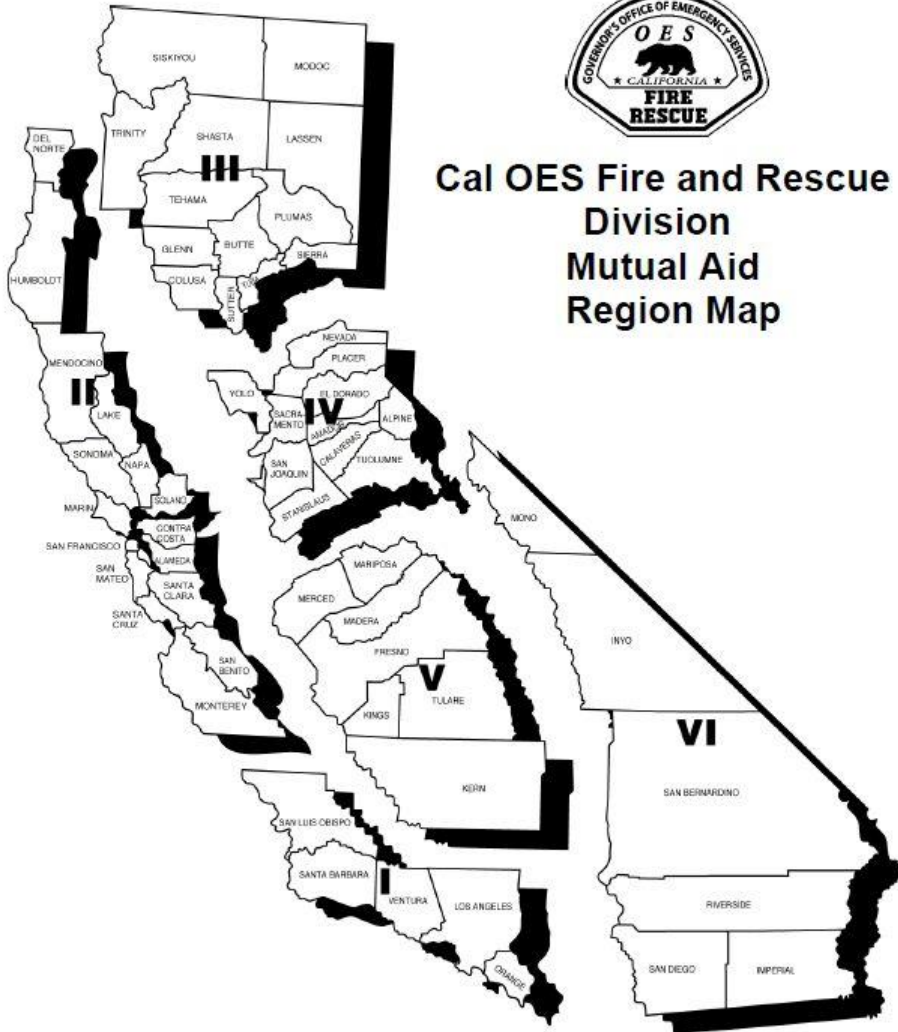

Fire Chief – City of San Marcos

Operational Area Coordinator

**Cal OES Fire and Rescue  
Division  
Mutual Aid  
Region Map**

- CA-six mutual aid regions
  - San Diego Region 6
  - Regional Coordinator
    - Chief Thom Porter
- CA-65 Operational Areas
  - 58 Counties
  - 6 in Los Angeles County
  - 1 -Tahoe Basin
- San Diego Op Area Coordinator
  - Chief Brett Van Wey
- San Diego has 4 Zones
  - Metro – Chief Fennessy
  - East – Chief Mecham
  - Central – Chief Paskle
  - North – Chief Van Wey

# San Diego(XSD) Operational Area

San Diego is comprised of 18 individual City Fire Departments, 12 Fire Districts, County Fire Authority, CAL Fire, USFS, and DOD Fire Departments. The San Diego Operational Area (XSD Op Area) is in Region VI under the California Office of Emergency Services (CAL OES) Master Mutual Aid Agreement (MMA) for the State of California.

The XSD Operational Area is comprised of four (4) Zones, the Central, East, Metro, and North Zones. The fire agencies are assigned to one of the four zones geographically and by dispatch center when feasible for coordination of fire and rescue resources.

# Operational Area Dispatch

## North Comm

The Operational Area Communications Center will maintain several duty lists, documents, and instructions in addition to those covered in the XSD Operational Area Daily Report. These documents will assist dispatchers who are responsible for carrying out some of the day to day Operational Area duties.

- XSD Op Area Strike Team Identifiers
  - XSD Op Area Committed Resources
  - OES Type III Strike Team Leader Duty Rotation
  - OES Type I Strike Team Leader Rotation
  - OES Notification Matrix (Out of Service)
  - Distribution of Incident Status Summary reports (209's)
  - XSD Op Area Special Equipment Resource List
- 
- Air resources are coordinated through CAL FIRE.

# Resources and Qualifications

- **CICCS:**

The California Incident Command Qualifications System is the most advanced in the United States. It helps provide California with some of the best firefighters in the nation through its rigorous training and standards. The proposed 2013 revisions to the Guide recognize the need to provide the California Fire Service with a document that captures the National Incident Management System (NIMS) all-hazard certification and qualification requirements.

- **ROSS:**

The Resource Ordering and Status System (ROSS) project is a National Wildfire Coordinating Group (NWCG) sponsored information systems development project. ROSS is a computer software program, which automates the resource ordering, status, and reporting process. Established in 1997 and chartered by the NWCG in June 1998, the scope of the project focuses on automating current processes enabling dispatch offices to electronically exchange and track information near real-time. ROSS tracks most tactical, logistical, service and support resources mobilized by the incident dispatch community.

# San Diego County Fire Chiefs Association

Don Butz

Fire Chief – Viejas Fire Department

President

# County Wildland Drill

- Dates:** June 6, 7, 8, 2016
- Instructors:** San Diego County Inter-Agency Cadre
- Location:** Viejas Indian Reservation
- Fees/Tuition:** No Cost to participating agencies.  
SDG&E is the fiscal sponsor for the exercise

# County Wildland Drill

**Topic Description:** This training will focus on wildland and interface fire operations:

- structure defense,
- resource utilization,
- equipment deployment,
- hoselays,
- entrapment,
- safety including electrical safety from SDG&E,
- communications,
- handline construction, and
- tactical priorities.

# County Wildland Drill

- The training will be a comprehensive full day preparedness exercise from check-in to demobilization
- The training is designed for engine company personnel and Strike Team/Task Force Leaders.
- A Training Specialist will be available to process training packets.
- All trainees must have an initiated task book by their home agency and be accompanied by a trainer qualified in the position being evaluated.

# County Wildland Drill

- In addition to the Fire agencies that participate this year's readiness exercise will include:
  - Emergency Communication Centers,
  - San Diego Sheriffs,
  - County and State Office of Emergency Services,
  - San Diego Gas & Electric,
  - National Weather Service, and
  - Military Aviation Assets.

# County Wildland Drill

- The exercise provides a unique opportunity for agencies throughout San Diego County to train on their area of responsibility during a wildland fire incident.
- The Exercise is set up to run like an actual incident including the establishment of a base camp, Incident Command post, and mobile Communications Center.
- San Diego county Sheriffs will be using these scenarios to train their deputies on evacuations and safety in the wildland fire environment.

# County Wildland Drill

- The new SCOUT incident mapping program will be field tested at the drill
  - with the information sent to the San Diego County OES to exercise their Emergency Operations Center (EOC).
- The EOC staff will use this opportunity to train their personnel on operations during a wildland fire event in San Diego County.

# County Wildland Drill

- California OES will be participating in the demobilization process and help educate the resources on the proper way to fill out reimbursement forms.
- They will also be training their new personnel on the processing of the state paperwork.
